Newcastle, 12, Grey Street.

SAN FRANCISCO PUBLIC LIBRARY
3 1223 90117 1588

MU CE

SCOTTISH PROVIDENT INSTITUTION.

ESTABLISHED 1837. INCORPORATED 1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

ITS DISTINCTIVE SYSTEM of **whole Life Assurance** offers to Members the advantage of **with profit** rates which differ but little from the non-profit rates usually charged.

Premiums for £100 payable at Death (with right to share in Surplus).

Age next Birthday.	25	30	35	40	45	50	55
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2	£5 2 3
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8	5 5 8

The **whole Surplus** goes to the Policy-holders on a system at once safe and equitable —no share being given to those by whose early death there is a **loss** to the Common Fund.

Endowment Assurance.

SPECIAL CLASS WITH SEPARATE FUND.

Policy-holders in this Class share exclusively in the whole Surplus thereof, and Bonuses are allotted on the compound system.

Annuities.

RATES MAY BE HAD ON APPLICATION.

FUNDS EXCEED: £17,000,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON: 3, LOMBARD STREET, E.C. 3; WEST END: 17, PALL MALL, S.W. 1.

For the long space of thirty-three years our name, associated with particular classes of good old-time British Woollens as summarized below, has occupied this page in WHITAKER, one proof of its stability. We continue still to hold large stocks of the same goods, and confine ourselves to cherishing the industries of our country as opposed to the indiscriminate policy usually adopted by traders to buy "in the cheapest market," and as fashion dictates. In former years we were able to quote approximate prices, but of late it has been found impossible to adjust such a cost as would be likely to hold good for a twelvemonth. 1923 is no exception. The lack of confidence at home and abroad, the instability of the foreign exchanges, and the vast stocks that have accumulated on manufacturers' and merchants' hands which had to be realized, and for which there was little or no market, accounts for this unsatisfactory position. We are, however, able to send priced samples when desired which would be current for short periods. Now that members of the third generation of the family are actively co-operating in the business, which has always been a private and personal one, our customers in all parts of the world may feel assured their interests will continue to be protected both in the cost and quality of our merchandize.—W. B.

HOMESPUNS—Irish and Scotch, peasant-made from all districts; for country wear, sport, and travelling.
SCOTCH CHEVIOTS; for warm, rough suits, and wraps.
IRISH FRIEZES; for heavy travelling and motoring ulsters.

Humber

products are unsurpassed for Quality, Reliability and Efficiency.

Cars

THE privilege of luxurious and trouble-free motoring enjoyed by Humber Car owners is provided for by the exceptional care and attention-to-details policy which is ever the dominating factor in the construction of Humber Cars.

The All-Weather equipment standardised on the open models is a feature which is greatly appreciated; and the new 8 h.p. Light Car is the latest and foremost in Light-Car value—a genuine Humber model in miniature.

8 h.p. Light Car.
11.4 h.p. All-weather 2-Seater (with double Dickey Seat).
11.4 h.p. Coupé (with double Dickey Seat).
11.4 h.p. All-weather 4-Seater.
11.4 h.p. Saloon.
15.9 h.p. All-weather 5-Seater.
15.9 h.p. Saloon de Luxe; 15.9 h.p. Saloon-Landaulette.

Motor Cycles

THE Humber 4½ h.p. Flat Twin Motor Cycle is unequalled for flexibility and silence, and suitable alike for solo and sidecar work. A 4½ h.p. Flat Twin Sports model is available for those interested in this type of mount. Whether on road or on track the Humber Flat Twin is a striking example of what a motor cycle should be.

Cycles

HUMBER Cycles are of world-wide repute, and there is a complete range of machines for Gentlemen, Ladies, and Juveniles. Every model is wholly reliable and trouble-free—a guaranteed machine with over half a century of experience at the back of it.

AN

Almanack

For the Year of Our Lord

1923

BY

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

ASTRONOMICAL AND OTHER PHENOMENA

A vast Amount of INFORMATION respecting the GOVERNMENT, FINANCES, POPULATION, COMMERCE, and GENERAL STATISTICS of the various Nations of

The World

with special reference to

The British Dominions

and

The United States

LONDON

OFFICE: 12, WARWICK LANE,

PATERNOSTER ROW

PRICE SIX SHILLINGS NET

NOTE.—WHITAKER'S ALMANACK was first published in 1868 (for the year 1869), and since 1887 there have been two editions. For 1923 the Popular Edition (in paper cover with Zodiac design) consists of 600 pages, and is sold for 3*s. net.*; the Half-Bound Edition (in red and green cloth cover) consists of 904 pages, and is sold for 6*s. net.*

*314 W58 55

PREFACE TO THE LV^TH ANNUAL VOLUME.

(1923.)

181692

WHITAKER'S ALMANACK for 1923 is published about 14 days before the usual date in order that its many readers may have an early and permanent record of the new Cabinet and the new Parliament. Many other new features are contained in the present issue, the Provisional Government of the Irish Free State and the Deputies of the Dail being amongst them, while the London County Council is also a newly elected body, containing many names which have not hitherto appeared in "WHITAKER."

Particular attention has again been paid to matters of general interest at the moment, and many of these are dealt with under the general heading of "Questions of the Day" (pp. 833–847), while the Honours conferred at the change of Government, the Geddes Report, the War Bonus, Statistics of Revenue and Expenditure and of Exports to the end of the September quarter, the Cost of London Government, regulations and statistics concerning Great War Pensions, the Cost of Social Services, Debts due to and from Great Britain, Gold Reserves, the Value of Sterling abroad, Public and Private Wealth, the Capital Levy in Switzerland, Bequests to Charities, Changes in the Coalition Ministry, Criminal Statistics, and many other matters, will be found in their appropriate setting.

An entirely new feature is an article entitled "Careers," in which advice is tendered to parents with regard to various professions and callings, and information is afforded concerning the steps to be taken to launch their sons or daughters on the sea of life.

The Index has again been enlarged and now contains upwards of 10,000 references, and readers with a statistical bent may be interested to learn that the present edition of "WHITAKER" contains upwards of 1,200,000 words in its 904 pages—about ten times the number contained in "If Winter Comes," which is sold to the public at seven shillings and sixpence!

The Editor's letter-bag has been unusually well filled during the past year, and it is hoped that many of the correspondents will notice the acceptance of the suggestions contained in their letters. In certain cases it has not been found possible to fall in with the proposals made, but the Editor is not the less grateful for the co-operation offered, and trusts that old correspondents will continue their interest and that others may join in keeping "WHITAKER" at concert pitch.

Past, present and future correspondents are earnestly requested to note the first day of October as the latest date for suggestions, if they are to receive full consideration, especially when statistics not hitherto given are called for by the correspondent.

Mean Longitude of Moon's Ascending Node, January 1, 174° 19′ ♏. 23.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks 6*h.* 2*m.* Civil twilight ends, 16*h.* 52*m.* Night begins, 18*h.* 5*m.* The length of the day from Sunrise to Sunset is 7*h.* 51*m.*

The ending of Civil twilight is here defined as the time when the Sun's centre is 7½° below the horizon. Day breaks and Night begins when it is 18° below.

Jan. 2, 23*h.* Earth at least distance from the Sun, 91,339,000 miles. Perihelion.

Jan. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 10·7*s.*

Jan. 10. Saturn in conjunction with ☽, 2*h.* 43*m.* ♄ 0° 10′ N.

Jan. 11. Jupiter in conjunction with ☽, 20*h.* 2*m.* ♃ 2° 59′ S.

Jan. 13. 10*h.* Mercury at greatest elongation. 18° 56′ E.

Jan. 13. Venus in conjunction with ☽, 12*h.* 49*m.* ♀ 0° 31′ S.

Jan. 18. Mercury in conjunction with ☽, 14*h.* 59*m.* ☿ 2° 24′ S.

Jan. 19, 19*h.* Mercury at a stationary point.

Jan. 22. Mars in conjunction with ☽, 7*h.* 33*m.* ♂ 0° 29′ N.

Jan. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 8·9*s.*

Jan. 27–28. Occultation of Aldebaran and other stars of the constellation Taurus (Hyades). See p. 83

Jan. 29, 4*h.* Mercury at inferior conjunction.

Jan. 30, 20*h.* Saturn at a stationary point.

Uranus, *Jan.* 1, R.A. 22*h.* 49*m.* Dec. 8° 21′ S. Sets 21*h.* 29*m.*

Jan. 31, sets 19*h.* 38*m.*

Neptune rises *Jan.* 1, 19*h.* 13*m.* *Jan.* 31, 17*h.* 10*m.*

In this month the Mornings increase 25*m.*, the Afternoons 45*m.*

Constellations near the South meridian at 22*h.*: Perseus, Taurus, Eridanus, Auriga, Orion, Gemini, Canis Minor, Canis Major.

The 24-hour Clock.—The hours of the day in this ALMANACK are numbered from 0 to 23, the hour after midnight being 0, and the abbreviations A.M. and P.M. are not used. In 1919 the Home Secretary appointed a Committee to consider and report as to the advisability of adopting this method in the United Kingdom for official and other purposes. The Committee decided to recommend the scheme. The change from the numeration of former practice is made by adding 12 to the number which indicated the hours from 1 to 11 in the afternoon and evening, so that the second hour after noon is called 13, and that immediately before midnight 23.

Time of High Water at the undermentioned Places.—

MORNING AND EVENING STARS.

☿ Mercury is an evening star setting 1½ hours after the Sun in the first part of the month, S.W. by W. It may possibly be seen near the S.W. horizon in the middle of the month.

♀ Venus is conspicuous in the morning sky, having been at greatest brilliancy on *Dec.* 31, 1922. In the S.E. at altitude 10° at 6*h*. Magnitude −4·4 to −4·1.

♂ Mars is in the western sky during the evening; it lies in the constellation Pisces where there are no very bright stars. Magnitude +1·0 to +1·2.

♃ Jupiter is a morning star in Libra. At 4*h*. in the middle of the month it will be in the S.E. at altitude 10° approximately. Magnitude −1·5.

♄ Saturn in the constellation Virgo rises about midnight S. of E. At 4*h*. in mid-January it will be in the S.S.E. at altitude 30° with Spica (Mag. 1·2) 5° below. Magnitude +0·9.

The Lords Commissioners of the Admiralty have given instructions that the hours of the day shall be numbered in accordance with this method in the "Nautical Almanac," beginning with the Greenwich day for the year 1925. Until that date the astronomical day, which begins at noon, will be used as hitherto, and for that reason in the column "Mean Time at 0*h*. Sidereal Time," on the second page of each month, hours are counted from 0 to 23, beginning at noon.

Perihelion.—The Earth is nearest the Sun at some date near January 1. It is not always the same date, nor is the distance always the same, partly because it is the centre of gravity of Earth and Moon, which describes the ellipse round the Sun, and the two bodies revolve round this centre.

MONTHLY NOTES.

Feb. 1. Pheasant and Partridge shooting ends.

4. Last day for Objections to persons on New List (Spring Register) to be sent to Registration Officer.

10. Last day for Claims (Spring Register).

—. Scottish general salmon-fishing begins.

16. Objections and New Claims to be published.

24. Last day for Objections to New Claims (Spring Register).

Half Quarter Days are—Feb. 8, May 9, Aug. 11, and Nov. 11.

RAIN FELL IN FEBRUARY, 1922, on 15 days; total fall 1·80 inches; *above* the average by 0·32 inch.

Mean Longitude of Moon's Ascending Node, February 1, 172° 41′ ♍.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5*h.* 45*m.* Civil twilight ends at 17*h.* 34*m.* Night begins at 18*h.* 43*m.* The length of the Day is 9*h.* 4*m.*

Feb. 4, 7*h.* Venus at greatest elongation. 46° 55′ W.

Feb. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 7·7*s.*

Feb. 6. Saturn in conjunction with ☽, 8*h.* 58*m.* ♄ 0° 3′ N.

Feb. 6, *morn.* Occultation of *θ* Virginis by the ☽. See p. 83.

Feb. 6. Neptune in Opposition. Distance from Earth 2,703,000,000 miles.

Feb. 8. Jupiter in conjunction with ☽, 6*h.* 34*m.* ♃ 3° 17′ S.

Feb. 9, 21*h.* Mercury at a stationary point.

Feb. 11. Venus in conjunction with ☽, 20*h.* 7*m.* ♀ 1° 59′ S.

Feb. 13. Mercury in conjunction with ☽, 18*h.* 3*m.* ☿ 2° 16′ S.

Feb. 20. Mars in conjunction with ☽ 8*h.* 2*m.* ♂ 2° 57′ N.

Feb. 23, 5*h.* Mercury at greatest elongation. 26° 42′ W.

Feb. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 5·6*s.*

Uranus is above the horizon almost wholly in daylight hours during *February*. *Feb.* 1, rises 8*h.* 48*m.*; sets 19*h.* 34*m.*

Neptune rises *Feb.* 1, 17*h.* 6*m.*; *Feb.* 28, 15*h.* 16*m.*

In this month the Mornings increase 51*m.*,; the Afternoons 49*m.*

Constellations near the S. meridian at 22*h.*: Auriga, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argo, Cancer, Hydra.

Note on Tables of Moon Rising, Southing and Setting.—The times in the second column are those of Moonrise on the day of the month shown by the adjacent figure in the first column, the hours being counted as explained in the note on p. 28. The figures in the third and fourth columns show the time of the southing and of the setting *which next follow that rising*, and these sometimes happen after midnight of the day indicated. In such cases the figures are in heavy type. It is therefore to be remembered, in using this Table, that these distinctive figures always indicate a time *on the morrow of the day of its line.* A similar system is followed in the Tables of the planets as may be seen on the opposite page.

Times of High Water at the undermentioned Places—

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

Rising, Southing, and Setting of Planets at intervals of Seven Days. (Noon = 12 h.)

MORNING AND EVENING STARS.

☿ Mercury is a morning star, rising in strong twilight, and is not likely to be seen by the naked eye.

♀ Venus is a morning star in Sagittarius, rising S.E. by E.

♂ Mars, as last month, is in the constellation Pisces, and is to be seen in the S.W. sky after twilight. Due west about 2h. Magnitude, +1·3 to +1·5.

♃ Jupiter, in the constellation Lib.a, rises about an hour after midnight. It will be in the S.E. at altitude 15° between 2 and 3 o'clock. Magnitude, −1·6.

♄ Saturn rises in the late evening south of east. It is now retrograding, i.e., moving from left to right in Virgo. Magnitude, +0·8 to +0·6.

In the Tables of the Moon figures are wanting for the day following that on which the Moon rises just before midnight. The next moonrise happens after midnight of the following day, and is therefore *two* days forward in the calendar.

Heliographic Elements.—The second column in the small Table at the bottom of page 2 of each month shows the position of the Sun's axis of rotation as seen on the disc, the figures giving the arc of the Sun's circumference between the North point and the end of the projection of the axis. The third and fourth columns give respectively the solar latitude and longitude of the centre of the disc (that is of the Earth), referred to parallels of latitude and meridians on the Sun's surface based on its axis of rotation and an adopted Prime Meridian. The fourth column shows that with respect to the Earth the Sun rotates on an axis in 27¼ days (see p. 90).

Mean Longitude of Moon's Ascending Node, March 1, 171°12′ np.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4*h*. 56*m*. Civil twilight ends 18*h*. 23*m*. Night begins 19*h*. 29*m*. The length of the Day is 10*h*. 48*m*.

Mar. 3, *morn.* The Moon will be partially eclipsed. Visible at Greenwich. See p. 82.

Mar. 5. Uranus in Conjunction.

Mar. 5. Mean time taken by Sun's semi-diameter in crossing the meridian, 1*m*. 5·0*s*.

Mar. 5. Saturn in conjunction with ☽, 15*h*. 43*m*. ♄ 0° 10′ N.

Mar. 6. 1*h*. Jupiter at a stationary point.

Mar. 7. Jupiter in conjunction with ☽, 14*h*. 55*m*. ♃ 3° 20′ S.

Mar. 13. Venus in conjunction with ☽, 16*h*. 38*m*. ♀ 2° 47′ S.

Mar. 15. Mercury in conjunction with ☽, 20*h*. 14*m*. ☿ 3° 49′ S.

Mar. 17. Annular Eclipse of the Sun. Not visible at Greenwich.

Mar. 21. Mars in conjunction with ☽, 7*h*. 47*m*. ♂ 4° 44′ N.

Mar. 21. 15*h*. 29*m*. Sun enters the sign Aries (Spring Equinox). Begining of the Tropical Year.

Mar. 23, *aft.* Occultation of Aldebaran by the ☽ in daylight. See p. 83.

The Zodiacal Light may be seen after sunset in the middle of this month, the Moon then being absent from the sky.

Uranus is not visible in the night sky during this month.

Neptune rises *Mar.* 1, 15*h*. 12*m*.; sets *Mar.* 1, 6*h*. 12*m*.; *Mar.* 31, 4*h*. 13*m*.

In this month the Mornings increase 67*m*.; the Afternoons 51*m*.

Constellations near the S. meridian at 22*h*.: Gemini, Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

Time in London.—The use of Greenwich Time in London is scarcely a century old. The first attempt at accurate public time-keeping was made by George III. when he established the Observatory at Kew in 1768, and instructed his Observer, Dr. Demainbray, to regulate the clocks at the Horse-Guards, St. James' Palace, and the Houses of Parliament, by observations of the Sun when it crossed the meridian. These clocks were for long s andard clocks of London, so it is probable that the time of the meridian of Kew, 75 seconds slow on Greenwich, was then considered correct time in the west end, if not in the City. In the early part of the nineteenth century, as the practice of navigation by chronometers and the "Nautical Almanac," which is based on the Greenwich meridian, developed, it

Morning and Evening Stars.

☿ Mercury rises before sunrise during the greater part of the month, but is not likely to be visible.

♀ Venus is a morning star rising in the E.S.E. in the dawn. Its brightness is slowly diminishing, the magnitude changing from $-3{\cdot}8$ to $-3{\cdot}6$.

♂ Mars is an evening star setting soon after 22h. in the W.N.W.

♃ Jupiter rises before midnight about S.E. by E. It is low in the sky, its meridian altitude being less than 23°. At this apparition Jupiter moves between and almost in line with the stars Spica and Antares. Magnitude in March, $-1{\cdot}8$ to $-1{\cdot}9$.

♄ Saturn rises in mid-evening, S. of E. About midnight it will be almost directly above the star Spica.

was necessary for makers of these instruments to have Greenwich time at their disposal, and procured it by private enterprise, which may have led to the display of the notice "Greenwich Mean Time" to be seen in a clockmaker's window. By the aid of the electric telegraph Greenwich time was brought to London officially, and about the years 1852 or 1853 a clock at Greenwich specially made for the purpose transmitted current which deflected a needle in the Post Office at Lombard Street as a time signal, caused a time-ball to drop in the Strand, and actuated a clock at the London Bridge Station of the S.E.R. For some years time-signals from Greenwich were at the disposal of this railway, who transmitted them direct to places on their system, but in 1883 this was discontinued, and signals were sent as now only to the G.P.O., where they are distributed by a Chronopher to the railways, and to those who pay the necessary fees. The public clock at the Royal Exchange was set up in 1844, and the Westminster clock called "Big Ben," which keeps Greenwich time within a few seconds, but is not actually controlled by Greenwich, was completed in 1858. In 1880 a Statute was passed making Greenwich time legal for the United Kingdom (see p. 102).

RAIN FELL IN APRIL, 1922, on 16 days; total fall 2·76 inches; *above* the average by 1·10 inches.

* Summer Time begins on Sunday, April 22, at 2*h.* G.C.T. *See* Note p. 42 and p. 101.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed.

5. Dividends on Consols, &c., due. Financial year, 1922–1923, for Treasury purposes ends.

7. Fire Insurances must be paid.

–. Quarter Sessions to be held this week unless otherwise fixed.

14. Parish Councils to hold their annual meeting on or within seven days of this date.

15. Spring Register of Voters comes into force.

Neptune sets *Apr.* 1, 4*h*. 9*m*.; *Apr.* 30, 2*h*. 15*m*.

Constellations near the South meridian at 22*h*.: Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

The Planet Mercury.—The opportunity for seeing this planet in April and May is similar to that which occurred in May of last year, but there was then the advantage that Mercury was near to bright Venus, which was a great help in finding the fainter planet. Greatest elongation in 1922 was on May 23, and Mercury was seen on May 8 an hour after sunset without instrumental aid, which was a somewhat exceptional achievement; but a week later it was not difficult to see the planet, though it was not conspicuous in the twilight sky, being described by one observer as "a tiny golden point of light." With an ordinary field-glass the possibility of seeing the planet was assured. Judging from this experience, it may be seen be ore 8 o'clock, which is rather more than half-an-hour after sunset, about April 25. Mercury describes its orbit, which is within that of the Earth, the

MORNING AND EVENING STARS.

☿ Mercury is an evening star after superior conjunction on the 8th. In the last week of the month it sets 1½ to 2 hours after the Sun, and there will be a favourable opportunity for seeing this planet by naked eye. At 20*h*. on April 29 Mercury will be at altitude 10° in the W.N.W., Aldebaran being rather higher, 12° to the left, and the Pleiades much nearer on its right.

♀ Venus is a morning star, rising about an hour before the Sun in the E.S.E. at the beginning of the month; in the East at the end. Magnitude − 3·6 to − 3·4.

♂ Mars is still an evening star. It is now in the constellation Taurus, and passes between Aldebaran and the Pleiades about the 20th.

♃ Jupiter, moving in the retrograde direction in Libra, rises in mid-evening in the E.S.E.

♄ Saturn being in opposition on the 7th is above the horizon from sunset till dawn. It will be seen in the late twilight in the S.E. at altitude 25°, Spica being about 8° lower. Magnitude + 0·5 to + 0·6.

mean distance being 36 million miles in 88 days, so that the synodic period, or the time from one Superior or Inferior conjunction with the Sun to the next is about 116 days, and Mercury, seen from the Earth, oscillates from one side of the Sun to the other and back again in this period, the extreme positions being called elongations. The average period from East to West elongation is 44 days; from West to East, 72 days. There are, therefore, three or four (as this year) Eastern elongations or evening apparitions in a year, and a corresponding number of Western. Because of the large ellipticity of the orbit the angular distance of the planet from the Sun on these occasions is very variable, and for this and other reasons the circumstances of apparitions differ.

Mean Longitude of Moon's Ascending Node, May 1, 167° 59′ ♏.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2*h.* 5*m.* Civil twilight ends at 20*h.* 12*m.* Night begins 21*h.* 50*m.* The length of the Day is 14*h.* 44*m.*

May 1. Jupiter in conjunction with ☽, 4*h.* 13*m.* ♃ 2° 58′ S.

May 5. 14*h.* Jupiter in Opposition. Nearest approach to the Earth (May 7) 409,580,000 miles.

May 5. 17*h.* Mercury at greatest elongation. 21° 7′ East.

May 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 6·1*s.*

May 13. Venus in conjunction with ☽, 0*h.* 36*m.* ♀ 0° 53′ N.

May 17. Mercury in conjunction with ☽, 6*h.* 10*m.* ☿ 6° 19′ N.

May 18. Mars in conjunction with ☽, 4*h.* 4*m.* ♂ 5° 57′ N.

May 26. Saturn in conjunction with ☽, 14*h.* 26*m.* ♄ 0° 27′ N.

May 28. Jupiter in conjunction with ☽, 9*h.* 20*m.* ♃ 2° 54′ S.

May 29. 3*h.* Mercury at Inferior conjunction.

Uranus rises *May* 1, 3*h.* 6*m.*

Neptune sets *May* 1, 2*h.* 11*m.*

May 31, 0*h.* 14*m.*

In this month the Mornings increase 44*m.*; the Afternoons 43*m.*

Constellations near the S. meridian at 22*h.*: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

The Planets in 1923.—Jupiter is in Opposition on May 5, 396 days after Opposition of last year, the mean synodic period being 399days. Jupiter is not specially bright at this Opposition, since it is not far from Aphelion, and because of its southern declination, the Apparition is not considered a favourable one for telescopic observers in northern latitudes, but the low position of the planet brings it more before the eyes of the casual observer, and it will be a striking object of the evening sky, the first seen after sunset this summer. Similar remarks as to position apply to Saturn which has the star Spica for its neighbour, though it is not so low as Jupiter. At this Opposition this planet is more distant than at the last, but is brighter because the ring-plane is more exposed to the Sun and Earth. Mars is not in Opposition this year, and during the first six months will be a permanent feature, but not a very bright one, of the mid-evening sky. Except in January, Venus also is not conspicuous this year, for it is at Superior Conjunction in September, and epochs of greatest elongation and of greatest brilliancy occur about 220 and 256 days on either side of this respectively.

MORNING AND EVENING STARS.

☿ Mercury is an evening star almost throughout the month. In the first week it sets more than 2 hours after the Sun, and, as last month, may be seen by the naked eye. At $20\frac{1}{2}h.$ the planet will be in the N.W. by W. at an altitude about 8°, Aldebaran being nearer the horizon, ten degrees to the left.

♀ Venus continues to be a morning star rising in the dawn, nearly due East at the beginning of the month; E.N.E. at the end. The planet is now not very bright. Magnitude −3·3.

♂ Mars, still in the constellation Taurus, is above the horizon for about 2 hours after sunset.

♃ Jupiter, being at Opposition on May 5, is above the horizon throughout the night. Mag. −2·0.

♄ Saturn is slowly retrograding in Virgo, and will be seen in the southern sky during the evening, Spica, which is less bright, being on its left.

Illuminated Portions of the Discs of Mercury and Venus, 1923.

Date.	Mercury.	Venus.	Date.	Mercury.	Venus.	Date.	Mercury.	Venus.	Date.	Mercury.	Venus.

Mean Longitude of Moon's Ascending Node, June 1, 166° 19′ m.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 11*h.* 7*m.* There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on *June* 1 is 16*h.* 13*m.* Its length is nearly 6 minutes 34*m.* from the 20th to the 24th.

June 5. Mean time taken by the Sun's semidiameter in crossing the meridian, 1*m.* 8·3*s.*

June 10. *Morn.* 6*h.* Mercury at a stationary point.

June 12. Venus in conjunction with ☽, 7*h.* 53*m.* ♀ 3° 28′ N.

June 12. Mercury in conjunction with ☽, 21*h.* 49*m.* ☿ 0° 42′ N.

June 15. Mars in conjunction with ☽, 23*h.* 56*m.* ♂ 5° 33′ N.

June 17. Saturn at a stationary point.

June 21. Mercury and Venus in conjunction 16*h.* 22*m.* ☿ 2° 38′ S.

June 22, 11*h.* 3*m.* Sun enters the sign Cancer (Summer Solstice).

June 22. Saturn in conjunction with ☽, 20*h.* 36*m.* ♄ 0° 7′ N.

June 23, 5*h.* Mercury at greatest elongation 22° 33′ W.

June 24. Jupiter in conjunction with ☽, 14*h.* 9*m.* ♃ 3° 4′ S.

June 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 8·7*s.*

June 28. A shower of meteors associated with the Pons-Winnecke comet may perhaps be seen.

Uranus rises *June* 1, 1*h.* 6*m.*; *June* 30, 23*h.* 8*m.*

Neptune sets *June* 1, 0*h.* 10*m.* *June* 30, 22*h.* 13*m.*

In this month the Mornings increase about 7*m.* up to the 18th, and then decrease 3½*m.* The Afternoons increase nearly 15*m.* up to the 26th, and then decrease slightly.

Constellations near the S. meridian at midnight: Corona, Hercules, Ophiuchus, Serpens, Scorpius, Lyra, Aquila, Sagittarius.

The Longest Day. — Though there is but slight difference in the length of the interval between sunrise and sunset on the days about June 21, there is in general one of these days which is a few seconds longer than any other. This is the day on which the Summer Solstice falls, and though this is June 22 in the greater number of years, the operation of the Gregorian calendar causes it to be sometimes June 20, sometimes June 22, which is to be explained as follows. Because the Tropical year is not an integral number of days, the solstice falls later in the calendar year by year by six hours, *nearly*. It is not permitted to be very late because the intercalation of the extra day in leap year brings it back one

MORNING AND EVENING STARS.

☿ MERCURY rises at sunrise at the beginning of the month, and an hour before at the end, but it is not likely to be seen, though the nearness of Venus, which will then be above and to the left after the 21st, may aid in its detection.

♀ VENUS is a morning star rising in daylight an hour before the Sun in the E.N.E Venus and Mercury are in conjunction on the 21st.

♂ MARS, now in the constellation Gemini lingers in the evening sky, but will be inconspicuous in the twilight. Sets nearly N.W.

♃ JUPITER is in the southern sky during the evening. At midnight in the middle of the month it will be in the S.W. at altitude 15° approximately. Magnitude −2·0 to −1·8.

♄ SATURN is in the S.W sky almost throughout the short night. Mag. +0·9 to +1·0.

whole day. This whole day is too much, because the solstice is later yearly by *not quite* 6 hours, and hence, on the whole, it falls earlier in the calendar as the century progresses. This acceleration of the date during the century is corrected by the omission of the intercalary day in the centennial year, which makes the date a day later, but because this does more than is necessary, a further compensation is made by making the fourth centennial year a leap year. This brings back the date of the solstice, and regarding a cycle of four centuries, the first of which follows a centennial leap-year, it will be seen that the date of the solstice is later century by century, but earlier at the end of a century than at its beginning. At the present time the date is specially late because we are in the fourth century of such a cycle, and early in that century. In the year 1903 the dates of Equinoxes and Solstices were as late as possible. They will be specially early in 2099. This principle holds for all places but there are differences of date and of length of day depending on longitude and latitude. This year the "longest day" at Greenwich is June 22, and is longer by a small amount than it might otherwise be because the Solstice happens near the time of the Sun's meridian passage at that place.

RAIN FELL IN JULY, 1922,

on 21 days; total fall 3·20 inches; *above* the average by 0·73 inch.

See note on page 40.

MONTHLY NOTES.

July 1. Special Sessions for Licences to deal in Game to be held this month.

5. Dividends due.

7. Quarter Sessions begin.

9. Fire Insurances to be paid.

15. Registration Officers to publish New Lists of all Electors on Autumn Register.

31. Gun and Game Licences expire.

Mean Longitude of Moon's Ascending Node, July 1, 164° 44′ m.

CONJUNCTIONS, ECLIPSES AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends 21*h* 23*m*. In this month there is no closed night in the latitude of London until after the 21st, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16*h*. 30*m*.

July 4. Mercury and Venus in conjunction, 14*h*. 36*m*. ☿ 0° 47′ S.

July 5, *midnight*. Earth at greatest distance from the Sun, 94,445,000 miles. Aphelion.

July 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m*. 8·4*s*.

July 7. Jupiter at a stationary point.

July 12. Venus in conjunction with ☽, 16*h*. 30*m*. ♀ 4° 37′ N.

July 13. Mercury in conjunction with ☽, 4*h*. 8*m*. ☿ 4° 59′ N.

July 14. Mars in conjunction with ☽, 18*h*. 8*m*. ♂ 4° 40′ N.

July 20. Saturn in conjunction with ☽, 3*h*. 15*m*. ♄ 0° 18′ S.

July 21. Jupiter in conjunction with ☽, 20*h*. 9*m*. ♃ 3° 24′ S.

July 22, 10*h*. Mercury in superior conjunction.

July 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m*. 7·1*s*.

July 26. Mercury and Mars in conjunction, 2*h*. 18*m*. ☿ 0° 39′ N.

Uranus rises July 1, 23*h*. 4*m*.; July 31, 21*h*. 5*m*.

Neptune sets, July 1, 22*h*. 9*m*.; July 31, 20*h*. 14*m*.

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34*m*., and the Afternoons 29*m*.

Constellations near the S. meridian at midnight: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

The Prime Meridian.—Apart from its use in connection with the Zone Standard Time system (see p. 102) the meridian of Greenwich is used as a basis for their maps by other countries. This was recommended by a resolution passed at a conference, attended by representatives of twenty-five Governments, held at Washington in 1884, which prescribed that the meridian of the Observatory at Greenwich should be the initial meridian of the world in place of the many meridians which then existed. This had been adopted by several leading countries previous to that time, but some based the longitudes of their maps on the meridian of their capital city, or one chosen for some arbitrary

MORNING AND EVENING STARS.

☿ Mercury is a morning star until the 21st, and an evening star later, but there will be no favourable opportunity for its naked-eye observation. In the earliest days of the month it will be near Venus, two or three degrees above the horizon at 3*h*. The rate of motion of Mercury from right to left having increased, there will be a second conjunction of these two planets on July 4 (see p. 41), and Mercury will then be to the left of the brighter planet.

♀ Venus is a morning star and may be seen in the dawn N.E. by E., at a low altitude. Magnitude, −3·3 to −3·4.

♂ Mars sets shortly after the Sun throughout the month. It will be near Mercury on the evening of the 25th, but neither planet is like y to be visible.

♃ Jupiter is a conspicuous object, low in the S.W. sky during the evening. Mag., −1·8 to −1·7.

♄ Saturn, in the following pa t of Virgo, will be to the right of Jupiter at about the same altitude with the star Spica somewhat lower between them. Magnitude, + 1·0 to + 1·1.

reason. The first geographers chos as their zero meridian that of the land they knew to be farthest west, and in the maps of Ptolemy (A.D. 70–147) Ferro, the westernmost of the Canary Islands, defines the zero meridian, and this remained so for several centuries, when other islands in that part of the Atlantic were chosen, the Peak of Teneriffe being used by the Dutch in the eighteenth century. A point in the island of St. Michael, the most easterly of the Azores, was used for the purpose at the beginning of the 17th century, because the magnetic declination was there zero, or the compass needle pointed to astronomical north, and it is said that Corvo, the most westerly of the group, was at one time chosen as fixing the zero meridian for the same reason.

Mean Longitude of Moon's Ascending Node, August 1, 163° 1′ ♍

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1*h.* 31*m.* Civil twilight ends at 20*h.* 44*m.* Night begins, 22*h.* 43*m.* The length of the day is 15*h.* 24*m.*

Aug. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 6·1*s.*

Aug. 8. Mars in conjunction with Sun.

Aug. 11. Neptune in conjunction with Sun.

Aug. 11. Venus in conjunction with ☽, 22*h.* 4*m.* ♀ 3° 46′ N.

Aug. 12. Mars in conjunction with ☽, 11*h.* 1*m.* ♂ 3° 22′ N.

Aug. 14. Mercury in conjunction with ☽, 1*h.* 27*m.* ☿ 0° 39′ N.

Aug. 16, *morn.* Occultation of Saturn by the ☽ in daylight (see p. 83). Geocentric conjunction, 12*h.* 8*m.* ♄ 0° 4′ S.

Aug. 18. Jupiter in conjunction with ☽, 5*h.* 6*m.* ♃ 3° 45′ S.

Aug. 23. Venus and Mars in conjunction, 16*h.* 3*m.* ♀ 0° 6′ N.

Aug. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 4·6*s.*

Aug. 26. Partial Eclipse of the Moon. Invisible at Greenwich. See p. 82.

Uranus rises, *Aug.* 1, 21*h.* 1*m.* ; *Aug.* 31, 19*h.* 2*m.*

Neptune is absent from the night sky during August.

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 10th to the 12th.

In this month the Mornings decrease 47*m.*, and the Afternoons 59*m.*

Constellations near the S. meridian at 22*h.* are those which were in that position at midnight in July: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

The Blue of the Sky. Light rays striking particles which are smaller than the wave length of the light are *scattered* or turned aside in all directions. The short waves which compose the blue and violet end of the spectrum are more completely scattered than the long red and yellow waves. Hence light passing through a medium containing a great number of such particles is left with an excess of red, while light emerging laterally has an excess of blue. The greater part of the sky appears blue because the light from it consists mainly of light scattered laterally from minute particles in the atmosphere. The smaller the particles the less intense is the light, but the greater the proportion of it that is blue. When the

MORNING AND EVENING STARS.

☿ Mercury is an evening star, but sets less than an hour after the Sun.

♀ Venus rises about half an hour before the Sun, N.E. by E. or E.N.E., and will not be conspicuous.

Magnitude, −3·4.

♂ Mars being in conjunction on the 8th, rises and sets with the Sun almost throughout the month.

The close conjunction with Venus in the afternoon of the 23rd may be seen telescopically, but the planets will be quite near the Sun.

♃, Jupiter, now in the constellation Libra, sets in mid-evening W.S.W.

♄ Saturn is above the horizon for about 2 hours after sunset, but will scarcely be visible.

particles are larger the proportion of blue is less as in the whiter sky of a haze. Near the horizon the sky is whiter than at the zenith because the rays of light from that region have passed through a greater thickness of the lower air where large particles are relatively more numerous. Sunset colours are reddish because the rays reaching us directly have lost much of their blue light by lateral scattering. The sky as seen from high mountains and from aeroplanes at a great height is of a deeper but purer blue because there are fewer large particles than at lower altitudes. (From the *Meteorological Glossary.*)

Stellar Magnitude.—The numerical magnitude of a star shows its order in a scale of brightness, the terms of which are in geometrical progression. Stars just visible to the naked eye are of magnitude 6. A 5th mag. is about 2½ times, a 1st mag. is a hundred times as bright as a 6th. Capella and Vega, which are nearly 2½ times as bright as magnitude 1, are mag. 0·2 and 0·1 respectively (zero magnitude). A star 2½ times as bright as zero is of negative magnitude, *i.e.*, −1, and so on. The brightness of the planets is shown according to this system.

RAIN FELL IN SEPTEMBER, 1922, on 14 days; total fall 1·70 inches; *below* the average by 0·55 inch.

* **Summer Time** ends on Sunday, Sept. 16, at 2*h.* G.C.T.

See note on page 42 and on page 101.

MONTHLY NOTES.

September 1. Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins. Partridge shooting begins.

11. Jewish New Year 5684.
24. Sheriffs of London to be sworn in.
29. Lord Mayor of London elected.
30. Accounts of Overseers to be made up.

Constellations near the S. meridian at 22*h.*: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

The Saros.—The Eclipse on September 10 will illustrate the operation of the Saros, which is one of the examples of very early accurate astronomical knowledge, for it is said to have been known to the Chaldeans about the year 1000 B.C. The Saros is a period of 18 years 10 days (or 11 according to the number of leap years) and a third of a day, and an eclipse of Sun or Moon is always followed by another of the same kind after that interval. There was a Total Solar Eclipse on August 30, 1905, when the path of totality ran from Canada to Southern Europe and North Africa, which was the precursor of that of the present month, and it will be noticed that the place of observation has moved 120° or one-third round the globe in longitude, which is the effect of the additional one-

MORNING AND EVENING STARS.

☿ Mercury is an evening star for the greater part of the month, but sets shortly after the Sun.

♀ Venus being in Superior conjunction on the 10th, rises and sets nearly with the Sun throughout the month.

♂ Mars is a morning star rising in the dawn E.N.E. at the beginning and E. by N. at the end of the month. It moves in the constellation Leo during September.

♃ Jupiter is above the horizon for two hours after the Sun, and may be visible in the twilight a few degrees above the horizon, S.W. by W. Magnitude, −1·5 to −1·3.

♄ Saturn sets 40 mins. earlier than Jupiter, and is not likely to be visible because of its small altitude. Magnitude, +1·0.

third of a day in the period. For recurrence of an eclipse, the Earth, Moon, Sun, and node of the Moon's orbit must be replaced very much as on the first occasion; this happens after the interval stated, but since this is not an integral number of days the same part of the Earth cannot be presented to Moon and Sun. Earlier eclipses of this same "family" happened in 1887, 1869, and 1851, each remarkable for some addition to knowledge or some incident. At the eclipse of July 28, 1851, which was observed from Norway, the brilliant prominences were an outstanding feature, and established themselves as a solar appendage. In 1869, during the eclipse of August 7, which was total from the western States of America, the spectrum of the corona was observed for the first time. In 1887 the path of totality crossed Asia, but the preparations made for its observation were rendered nugatory by bad weather. It will be noticed that, as in this case, after three Saros intervals the place of observation returns to the same longitude, though it is shifted somewhat southward.

Mean Longitude of Moon's Ascending Node, October 1, 159° 52′ ♏.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4*h*. 7*m*. Civil twilight ends at 18*h*. 24*m*. Night begins, 19*h*. 33*m*. The length of the Day is 11*h*. 39*m*.

Oct. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m*. 4·3*s*.

Oct. 7. Mercury at a stationary point.

Oct. 8. Mars in conjunction with ☽, 18*h*. 49*m*. ☌ 0° 3′ S.

Oct. 9. Mercury in conjunction with ☽, 2*h*. 8*m*. ☿ 1° 0′ S.

Oct. 9. Venus and Saturn in conjunction, 5*h*. 47*m*. ♀ 1° 22′ S.

Oct. 10. Saturn in conjunction with ☽, 15*h*. 24*m*. ♄ 1° 13′ S.

Oct. 10. Venus in conjunction with ☽, 18*h*. 2*m*. ♀ 2° 45′ S.

Oct. 12. Jupiter in conjunction with ☽, 11*h*. 24*m*. ♃ 4° 11′ S.

Oct. 14. Mercury at Greatest elongation. 18° 6′ W.

Oct. 17, 11*h*. Saturn in Conjunction.

Oct. 20. Occultation of Uranus by the Moon, 22*h*. 44*m*. See p. 83.

Oct. 27. Occultation of Aldebaran (mag. 1·1) and other stars of Taurus (Hyades cluster) by the Moon. See p. 83.

Oct. 29, *midnight*. Mercury and Saturn in conjunction.

Uranus, *Oct.* 1, rises 17*h*. 0*m*., sets 3*h*. 57*m*.; *Oct.* 31, sets 1*h*. 56*m*.

Neptune, *Oct.* 1, rises 1*h*. 30*m*.; *Oct.* 31, rises 23*h*. 32*m*.

In this month the Mornings decrease 52*m*., and the Afternoons 1*h*. 4*m*.

The Zodiacal light may be seen before dawn in the middle of this month, when the Moon is absent.

Constellations near the S. meridian at 22*h*.: Delphinus, Equuleus, Aquarius, Capricornus, Pegasus, Andromeda, Pisces, Piscis Australis, Cetus.

The Harvest Moon.—It will be seen that the interval between successive entries in the column of Moonrise in September is only 23 or 24 minutes near Full Moon (Sept. 23–27), which is a less interval than in other parts of the column. This is the characteristic of the Harvest Full Moon which happens this year in September.

The orbital motion of the Moon causes her to move among the stars rather rapidly from West to East, and she comes to the meridian of any place, or is due South, about 50 minutes later night by night. For this reason alone she would rise later night by night by this amount, but the time of rising (except at places on the Equator) is affected by her distance north or south of the celestial equator. In North lat. she rises earlier, with

Time of High Water at the undermentioned Places—

MORNING AND EVENING STARS.

☿ Mercury having been in Inferior conjunction in September is a morning star, and may be seen in the dawn in the latter half of the month near the horizon, 10 to 20 degrees South of East. Saturn will be a degree above Mercury in the E.S.E. at 6*h*. on the morning of October 30.

♀ Venus is neither morning nor evening star during this month.

♂ Mars is a morning star rising at about the same time as last month, almost due East. It passes [from Leo into Virgo.

♃ Jupiter is still above the horizon for an hour after sunset, and may possibly be visible, but will not be conspicuous. It is approaching the star Antares.

♄ Saturn in conjunction on the 17th sets about sunset during this month. It rises an hour later than the Sun at the beginning, and an hour earlier at the end of the month.

increased north declination. There is a certain period in each lunation when the Moon is moving northward rather rapidly, and this acceleration modifies the 50 minutes' retardation in the time of rising already mentioned, and in a high latitude the difference between time of rising on successive nights at this epoch of northward movement is small. This happens in every lunation, and in general passes unnoticed; but in the September or October lunation it happens when the Moon is Full, and then the Moon, Full or nearly so, rises about sunset on two or three consecutive nights. The phenomenon is known as the Harvest Moon. The details vary according to circumstances, and in some years the retardation on successive nights is much less than 23 minutes. When the longitude of the Ascending Node is 0° it is about 9 minutes in this latitude, and at the present time it is about a maximum. Also, for certain reasons, two Full Moons may have equal claims (compare Oct. 22–24), but the term is always applied to the Full Moon nearest to the Autumnal Equinox.

RAIN FELL IN NOVEMBER, 1921,

on 11 days; total fall, 1·76 inches; *below* the average by 0·51 inch.

MONTHLY NOTES.

November 1. Fox-hunting begins. Salmon-fishing with rod and line ends (with some local exceptions).

– Ordinary day of election of Borough Councillors.

– Holiday at London Stock Exchange.

9. Lord Mayor's Day. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.

12. County Sheriffs for next year nominated.

15. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.

In these columns is shown the order in which Jupiter's four larger satellites are eclipsed or transit the planet's disc, as seen in the telescope. The letters are taken in order from E. to W. and read left to right. The ● shows that the Satellite is behind the planet, and the ○ that it is in front of the planet. The circle shown indicates the planet's disc; the black circle ● shows that the Satellite whose number is wanting is either in eclipse or is occulted, whilst the sign ☌ shows that it is in transit across the disc. See note below.

Jupiter's Satellites. — The four satellites of Jupiter discovered by Galileo (see p. 91) are nearly bright enough to be seen by the unaided eye, and it is sometimes said that this has been done, but the fact is doubtful. These Satellites move round Jupiter at different distances from the primary, the orbit of I being the smallest, and that of IV the largest, the direction of revolution being the same as that of the planets round the Sun. Consequently, a satellite when in the part of its orbit between Jupiter and the Earth is seen to move from East to West; when on the side of Jupiter remote from the Earth from West to East. The periods of revolution of these four satellites are 1·77, 3·55, 7·17 and 16·75 days respectively; hence they change their relative apparent positions fairly rapidly, and on the third page of

MORNING AND EVENING STARS.

☿ Mercury at Superior Conjunction on the 15th is neither morning nor evening star during this month.

♀ Venus is an evening star setting within an hour of sunset. It may be seen about 16½*h.* at the end of the month a few degrees above the S.W. horizon.

♂ Mars continues to be a morning star rising south of east. It is now in Virgo moving from right to left, as will be seen by noting the changes in its position relative to the planet Saturn and the star Spica. At 5*h.* in the morning of the 16th Mars will be in the E.S.E. at altitude 8°, 5 degrees above Spica with Saturn 6 degrees to the left, and on the 30th it will be quite near that planet which is the brightest of the three objects. Magnitude of Mars, +1·8; of Spica, +1·2.

♃ Jupiter sets shortly after the Sun until the 25th.

♄ Saturn is now a morning star near Spica (see Mars note) rising E. by S. Magnitude +0·9.

each month their order as seen in an inverting telescope is shown for the moment of the night stated in the heading. The meaning of the symbols is given in a note on this page, and in general it is not difficult to assign the satellite to which each refers, but an extreme case occurs on May 16 which requires consideration. Comparison with the configurations on adjacent days in conjunction with the facts above given will help in elucidation, but the actual facts are that I and III are undergoing occultation and reappear from eclipse 2 hours later (see p. 82); Satellite II is in transit across the disc of the planet. Concerning Satellite IV, see p. 82.

Besides these, in recent years five Satellites have been discovered, all so faint that they can only be seen by the most powerful telescopes (see p. 94).

Jupiter is in conjunction on November 22. Because the planet is near the Sun, and therefore above the horizon almost wholly in daylight hours, the Satellites will not be visible from the end of October until the middle of December.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Mean Longitude of Moon's Ascending Node, December 1, 156° 38′ m.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5*h.* 40*m.* Civil twilight ends 16*h.* 45*m.* Night begins 17*h.* 57*m.* The length of the Day is 8*h.* 9*m.*

From *Dec.* 18 to 25 the length of the Day is about 7*h.* 46*m.*

Dec. 2. Mars and Saturn in conjunction, 7*h.* 42*m.* ♂ 1° 30′ S.

Dec. 4. Saturn in conjunction with ☽, 23*h.* 0*m.* ♄ 1° 43′ S.

Dec. 5. Mars in conjunction with ☽, 1*h.* 22*m.* ♂ 3° 19′ S.

Dec. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 10·3*s.*

Dec. 7. Jupiter in conjunction with ☽, 4*h.* 59*m.* ♃ 4° 23′ S.

Dec. 8. Mercury in conjunction with ☽, 22*h.* 45*m.* ☿ 6° 47′ S.

Dec. 9. Venus in conjunction with ☽, 17*h.* 15*m.* ♀ 5° 29′ S.

Dec. 22, 20*h.* 54*m.* Sun enters the sign Capricornus. (Winter Solstice.)

Dec. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1*m.* 11·0*s.*

Dec. 27, 16*h.* Mercury at Greatest elongation, 19° 46′ E.

Uranus, *Dec.* 1, R.A. 23*h.* 1*m.*; Dec. 7° 8·6′ S. Sets, *Dec.* 1, 23*h.* 49*m.*; *Dec.* 31, 21*h.* 57*m.*

Neptune rises, *Dec.* 1, 21*h.* 30*m.*; *Dec.* 31, 19*h.* 30*m.*

In this month the Mornings decrease 24*m.*, the decrease continuing throughout the month. The Afternoons decrease 4*m.* up to the 13th, and then increase 9*m.*

Constellations near the S. meridian at 22*h.*: Andromeda, Triangulum, Aries, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion.

The Moon. The numbers on pp. 38 and 66 show that the distance of the Moon at Perigee is exceptionally small in April and November of this year. These occasions of close approach occur when the time of Perigee is not far distant from that of Full or New Moon.

Length of Lunations.—If the times of New Moon are compared it will be found that the Sept.-Oct. lunations are the shortest of this year. There is considerable variation in the length of a lunar month. It may be more than 29*d.* 19*h.* or less than 29*d.* 7*h.*

The Duration of Moonlight.—Since the Full Moon is opposite the Sun, it is low in Summer, and above the horizon for comparatively few hours. In the winter, on the contrary, the Full Moon is high, and she remains above the horizon through the long night. In the spring months the Moon is high between First Quarter and Full, and as she is then in the south during the evening, the

MORNING AND EVENING STARS.

☿ Mercury is an evening star in the constellations Scorpius and Sagittarius. It sets later as the month goes on, and may be seen in the last week near the horizon in the S.W. shortly before 17*h*.

♀ Venus in Sagittarius and Capricornus is coming more into view as evening star, but is still not above the horizon for long after sunset. It sets in the S.W. at the beginning of the month; S.W. by W. at the end.

♂ Mars still rises about 4*h*. It is passing away from Saturn and Spica (see last month's note), being in conjunction with the former on the 2nd. Mars moves into Libra and is therefore low in the sky and rises E.S.E. Magnitude, +1·8.

♃ ♄ Jupiter in Scorpius is now a morning star, rising in the dawn, S.E. by E., and Saturn, as last month, is not far from the star Spica. At 6*h*. at the end of December the three planets Jupiter Mars and Saturn will be ranged nearly equally spaced in a line, from the S.E. horizon towards the south, with Spica at its upper end. Magnitude of Jupiter, −1·3; of Saturn, +0·9.

large share of moonlight is very evident, whereas in the autumn months the high Moon happens between Full and Last Quarter, and the long duration of moonlight occurs largely in non-waking hours. The Full Moon is estimated to give nearly ten times as much light as she does at the quarters, and we receive twice as much light from a high Full Moon as from a low one.

Moon's Phases.—The half of the Moon illuminated by the Sun is continually changing. The half we see is practically always the same, the combined effect being the changing shape of the Moon that is presented. The line of separation on the Moon, between the illuminated and the dark regions, is called the Lunar Terminator.

NOTES FOR THE YEAR 1924.

BEING BISSEXTILE OR LEAP YEAR, AND 14 AND 15 OF KING GEORGE V.

Jan. 2. 2h. Earth in Perihelion. Distance, 91,341,000 miles.

Venus is an evening star, above the horizon 2 or 3 hours after sunset. Saturn, Mars and Jupiter are morning stars, and are ranged in this order across the constellations Libra and Scorpius, Mars being nearer to Jupiter than it was last month.

Jan. 4. 1h. and *Jan. 31. 17h.* Jupiter in conjunction with ☽.

Jan. 13. 4h. Mercury in Inferior conjunction.

Jan. 17. Aft. Occultation of Aldebaran (Mag. 1·1) and other stars of Taurus. (See p. 83.)

Jan. 28. 19h. Saturn in conjunction with ☽. ♄ 2° 6′ S.

RISING, SOUTHING, and SETTING of PLANETS at intervals of Seven Days. (Noon = 12 h.)

Tidal Constants,

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER *at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.*

NOTE.—The time thus found will be Greenwich Time for British, French and Belgian Ports, and Irish Ports, and Amsterdam time for Dutch Ports.

Example 1.—Required the time of high water at Aberdeen on *January 8th*:

Time of high water at London Bridge	5*h.* 7*m.*	Morn.
Subtract tide interval	0 50	
Time of high water at Aberdeen	4 17	Morn.

Example 2.—Required the time of high water at Scarborough on *January 9th*:—

Time of high water at London Bridge	5*h.* 54*m.*	Morn.
Add tide interval	2 55	
Time of high water at Scarborough	8 9	Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 24 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after the midnight following:

Example 3.—Required the time of high water at Aberdeen, *January 14th aft.*:—

Time of high water at London Bridge on *January 15th*	0*h.* 11*m.*	Morn
+ 24 hours =	24 11	
Subtract tide interval	0 52	
Time of high water at Aberdeen, *Jan. 14th*	23 21	After.

Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found the *local apparent time* of sunset. Subtracting this from 12*h*. will give the *local apparent time* of sunrise. To obtain from this the local mean time, the quantity in the second column on the second page of each month (which is known as the Equation of Time) appropriate to the day in question must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versâ*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack are the times when the centre of the Sun's disc is on the visible horizon at sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34½′. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge, of the Sun is on the visible horizon is given as

Declination.	LATITUDE.

the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign −, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the *same* moment lie in a straight line across the map, the lines for different moments being parallel. The lines change their inclination to the meridian throughout the year Similarly for the setting.

The corrections in Tables II. and III. are always to be added; 1′ is to be subtracted from the final result because the quantities in Table III. above have been increased by that amount in order that they may all be additive.

Solar and Sidereal Time.

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND *VICE VERSA*.

THE length of a Sidereal day is $23h.\ 56m.\ 4{\cdot}09s.$ of Mean Time. One hour of Sidereal Time is, therefore, equivalent to $59m.\ 50{\cdot}17s.$ of Mean Time, and one hour of mean solar time is equivalent to $1h.\ 0m.\ 9{\cdot}86s.$ of Sidereal Time. This may be expressed otherwise by saying that the Mean Time clock loses or retards $9{\cdot}83s.$ per hour on the sidereal clock, and that the sidereal clock gains or accelerates $9{\cdot}86s.$ per hour on the Mean Time clock. These quantities—"acceleration" and "retardation"—are tabulated below for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. On the other hand, if it is considered to be Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Acceleration.	Argument.	Retardation.	Acceleration.	Argument.	Retardation.	Acceleration.	Argument.	Retardation.	Argument.	Acceleration or Retardation.	Argument.	Acceleration or Retardation.

See p. 101.

ECLIPSES IN 1923.

In the year 1923 there will be four Eclipses, two of the Sun, and two of the Moon.

I. A Partial Eclipse of the Moon in the night of March 2 (early morning of March 3). Visible at Greenwich. At Greatest Phase, a segment of the upper portion of the Moon's disc, slightly less than two-fifths of its diameter in breadth will be in the shadow of the Earth.

Moon enters Penumbra	March 3rd.	1*h.* 13*m.*
,, ,, Shadow	,, ,,	2*h.* 28*m.*
Middle of Eclipse	,, ,,	3*h.* 32*m.*
Moon leaves Shadow	,, ,,	4*h.* 36*m.*
,, ,, Penumbra	,, ,,	5*h.* 51*m.*

The point of the Moon's disc first to enter the Shadow is at 54° from the North Point towards the East. The point where it leaves the Shadow is 20° from the North Point towards the West.

II. An Annular Eclipse of the Sun at mid-day of March 17, Invisible at Greenwich.

The path from which an Annulus or ring of light round the Eclipsing Moon may be seen, begins its course in Patagonia, crosses the South Atlantic Ocean and South Africa, Bulawayo being nearly on the central line. A Partial Eclipse will be seen from places as far north as Rio de Janeiro in South America and the Gold Coast in Africa. Details for certain Observatories are given below :—

	Eclipse Begins.	Greatest Phase.	Eclipse Ends.	Mag.
	H. M.	H. M.	H. M.	
Cape of G. Hope ...	11 35	13 18	14 48	0·77
Johannesburg	12 11	13 49	15 12	0·83
Mauritius	13 6	14 18	—	0·85

These times are Greenwich Civil. At Mauritius the Sun sets before the Eclipse ends. First contact happens at these places about 108° from the North Point towards the West. Last contact about 56° to the East.

III. A Partial Eclipse of the Moon in the forenoon of August 26. Invisible at Greenwich. The beginning of the Eclipse is visible generally from North America, the western part of South America, the Pacific Ocean and Australia. The end is visible from a region somewhat farther west, which comprises most of the above territory and the eastern part of Asia.

The Moon enters the Shadow at 26*d.* 9*h.* 52*m.*, at a point 140° East of the N. point, and leaves it at 26*d.* 11*h.* 27*m.* G.C.T. 171° West of the N. point. The magnitude of the Eclipse is 0·17.

IV. A Total Eclipse of the Sun in the evening of September 10 (Greenwich). Invisible at Greenwich. The path of totality begins its course in the ocean south of Kamchatka, crosses the Pacific Ocean, and after landing north of the Californian peninsula, passes over Mexico and ends its course in the Caribbean Sea, Belize, in British Honduras, being south of the path. A Total Eclipse *may* be seen from San Diego, on the western coast of California, which is just on the northern limit, at 21*h.* G.C.T. The duration of totality on the central line in this longitude is about 3½ mins., which is nearly the maximum. Central Eclipse begins at 19*h.* 17*m.* in longitude 154° 18′ W., latitude 48° 16′ N., and ends at 22*h.* 17*m.* in longitude 63° 51′ W., latitude 13° 43′ N. (See p. 60.)

A Partial Eclipse will be visible from the whole of North America, the circumstances for Montreal being :—Eclipse begins, 10*d.* 20*h.* 38*m.* ; greatest phase, 10*d.* 21*h.* 29*m.* ; Eclipse ends, 10*d.* 22*h.* 17*m.* First contact 107° from N. point to West. Last contact 149° to East. Magnitude, 0·38.

ECLIPSES OF JUPITER'S SATELLITES.

The following Table gives the times of Disappearance (D.) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will be visible from Greenwich in the year 1923. The local mean time of the phase for any place other than Greenwich may be found by applying the longitude (in time) to the times given in the Table, adding if the place is *East* of Greenwich, and subtracting if it is *West*. If Standard Time be required the zone difference is to be treated in the same way ; or, in other words, the phenomena of Jupiter's Satellites are seen simultaneously from all places where the planet is above the horizon at the time.

From January to the Opposition of Jupiter (May 5) and in November and December the disappearances take place on the Western side. In this period I. and II. generally disappear by Eclipse and reappear at the Eastern edge. From May to Oct. the eclipse phenomena take place on the East of the planet. Satellites I. and II. disappear by occultation at the Western edge, and reappear after eclipse on the Eastern side in those months. There will be an interesting exception on Aug. 29. At 19*h.* 58*m.* Satellite II. will emerge from occultation at the eastern edge, and will be immediately immersed in the shadow of the planet.

There are no eclipses of Satellite IV. in the list. In alternate periods of about 3 years this satellite is not eclipsed nor occulted, nor is it seen in transit across the disc of the planet. The present period of non-eclipse began at the end of 1921.

The above is a list of the stars of the 6th magnitude (to mag. ·6·2) and brighter that will be seen occulted from Greenwich during the year, with the times of disappearance and reappearance. The occultations if seen from other places will be *in general*, earlier if the place is West, later if it is East. Disappearances usually happen on the East or left-hand side of the Moon, reappearances on the West; the exact position is shown in the fourth and sixth columns, which give the angle from the North Point, or the point of the Moon's disc nearest the North Pole of the heavens, counting towards the East from 0° to 360°. Occultations of Aldebaran on several occasions are to be noted, also of Saturn and Uranus on Aug. 14 and Oct. 20 respectively. BD +14° 657 and −7° 3728 are double stars.

Large Telescopes.—The Hooker telescope of the Mount Wilson Observatory, California, with mirror 100 inches in diameter is still the largest in the world at time of writing. It is announced that a reflecting telescope having an aperture of 10 feet and a focal length of 50 feet is in course of construction, and is to be mounted at the Frye Observatory that is yet to be established, and will be located in Seattle, Washington, U.S.A.

Fixed Stars.

The position of a star is defined by its Right Ascension and Declination, which are analogous to terrestrial longitude and latitude, and have for their basis the plane of the Earth's Equator and a certain line which marks a point in the sky called the First Point of Aries. Because of certain movements of the Earth this plane and point, and therefore these co-ordinates, are continually changing. The changes in the co-ordinates are called Precession and Nutation. A star *actually* changes its position by Proper Motion (see p. 88), and *apparently* by Aberration, and by Parallax, in some cases. The position of a star as seen in the sky affected in this way is called the Apparent place. The Mean place on January 1, 1923, given in the Table on the opposite page is the Apparent place referred to the Equator of date (that is Precession is taken into account) with the periodic effects eliminated. For purposes of navigation and surveying it is the Apparent place that should be used, and on this page the Apparent places of the Pole star and of some other stars are given.

There are in the list certain stars which are double, and in general the Mean place given for these is that of the brighter star, and the figure affixed to the Greek letter shows whether this is the first or second in order of Right Ascension. In the case of Castor (α^2 Geminorum) the second of the components is the brighter, and the place of this is given. Sirius, Procyon, which have faint companions, and α Centauri are binary stars, and of these the Mean place given is that of the centre of the orbit, but the Apparent places refer to the brighter star. The Apparent places of these three stars and of Altair are affected with a parallax: Sirius, 0·38″; Procyon, 0.33″; α Centauri, 0·75″; Altair, 0·23″.

Alternative names.—Polaris = α Ursæ Minoris; Aldebaran = α Tauri; Rigel = β Orionis; Capella = α Aurigæ; Betelgeuse = α Orionis; Sirius = α Canis Majoris; Castor = α Geminorum; Procyon = α Canis Minoris; Pollux = β Geminorum; Regulus = α Leonis; Spica = α Virginis; Arcturus = α Boötis; Antares = α Scorpii; Vega = α Lyræ; Fomalhaut = α Piscis Australis; Altair = α Aquilæ; Markab = α Pegasi; Achernar = α Eridani; Canopus = α Argûs.

The variation of light of Betelgeuse is irregular: its magnitude ranges from about 0·2 to 1·2. α Herculis is a bright red star, said to be variable by early observers; but little, if any, variation has been detected recently. β Lyræ is a variable of distinctive type ranging in brightness from magnitude 3·4 to 4·1 in a period of 13 days, which includes two minima of differing brightness. η Argûs might be considered to be of the Nova class. In the first half of the nineteenth century this star was of the 1st magnitude. By 1870 the light had diminished to about the 7th magnitude, at which it now remains. (For note on Stellar magnitude, *see* p. 57.)

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the different classes of objects are at very different distances. The stars are the farthest away, and individual stars are at great and very various distances from us, and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, and their possible movements. There are about 10,000 stars visible to the naked eye in the whole celestial sphere, the number including the cases where two or more faint stars close together combine to form one which is so visible. The number naturally depends on the efficiency of the observing eye and the clearness of the atmosphere, and the estimate will be less generous if stars to magnitude 6·0 and no fainter are included, which is sometimes taken as the limit of naked-eye visibility. The whole number of stars down to this limit of magnitude is 4,300, of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid. One hundred millions is an under-estimate of the number of stars already photographed, and it may be supposed that this number would be much increased with increased exposure, though 2,000,000,000 has been assigned as a limit to their number. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th magnitude. A star of magnitude 21 has been photographed.

STRUCTURE OF THE UNIVERSE.

It is believed that the mass of the stars we see as separate entities are arranged in space in a form which may be likened to a watch or lens. In other words, the stellar Universe is considerably flattened on both sides, the median plane being marked out in the sky by the band of star cloud of irregular shape which is seen crossing the sky on a clear night, known as the Milky Way or Galaxy. This follows from star-gauges, or counts, which show that the stars are more dense in the direction of the central plane, called the Galactic plane, than elsewhere. On either side of this the stars lie thick, but the number becomes progressively less as the distance from that plane increases, until at its poles they are relatively few. The Milky Way is seen to consist of clouds of faint stars, of star-clusters other than globular and gaseous nebulae (see p. 88). It is also the location of an early type of stars known as Wolf-Rayet and Novae. This galaxy was formerly pictured as a girdle made up of these bodies, surrounding the lens-shaped system of stars, and at a distance from the Sun of the order of 3,000 or 4,000 light years. The Sun is not supposed to be precisely central, but nearly so. A recent description (Shapley) of the structure of the Universe dispenses with the idea of an actual girdle; and affirms that the members of these classes, and also the globular clusters, which are not seen within the limits of the Milky Way, form an aggregation, which is named the Galactic system. A class of objects, known as White or Spiral Nebulae (see p. 88), which are seen in directions other than Galactic, possibly do not form part of this aggregation, but may be "Island Universes," though this is a pointstill under discussion. The size of the Galactic system is almost conjectural, but according to Prof. Harlow Shapley its greatest diameter is of the order of 300,000 light years, and its dimension at right angles to the galactic plane a twentieth of this, so that the aggregation is extremely flattened. An opposite view estimates the dimensions at about a tenth of these. The great majority of the nearer stars to the Sun are members of a local flattened cloud, or cluster, which has a greatest diameter of the order of 6,000 light-years. It is recognised that in the space which comprises the Universe of stars there is dark obscuring matter which it is suggested is the cause of some of the dark patches in the Milky Way. As seen in the sky the Galaxy always passes through the same constellations, sharing with them the diurnal motion, but its direction bears no special relation to the direction of the Ecliptic, Equator, or horizon. Such a relation is not to be expected, for these three planes pertain only to our Sun and Earth, which are minor bodies of the Cosmos of which the Galaxy is a main outstanding feature.

SIZE OF THE STARS.

The stars are too remote for even the largest to show an appreciable disc in any telescope as do the planets, and obviously it is impossible to estimate the size of a star from its brightness, as we see it, for this depends on its distance, and on its intrinsic brightness, which may depend on its temperature or other physical condition. A recent theory of stellar evolution (*q.v.*) involves the idea that the stars are of very different size and luminosity, some being known as "giants," some as "dwarfs." It has been found, with some probability, that the surface brightness of a star has a relation to its spectrum (*v. infra*), and, assuming this, the angular diameter of a star is to be found by dividing its total brightness by the surface brightness per unit area, which last is shown by its spectrum. A more direct way has, however, lately been found, and, by utilizing an optical principle long since proposed by Fizeau, and elaborated independently by Michelson later, it has been possible to obtain some remarkable results with the large telescope of the Mount Wilson Observatory. With an apparatus known as an "interferometer," the angular diameter of Betelgeuse, the well-known red star in Orion, has been measured as 0·″047 and, adopting 0·″018 as the parallax, the diameter of this star is found to be 240 million miles. The diameter of Arcturus, measured in the same way, was found to be 0·″024 in angular measure, which corresponds to 19 million miles linear. Antares was similarly found to have an angular diameter of 0·″040, and, since 0·″030 is an extreme value of its parallax, its diameter is at least 120 million miles and may be much larger. It is satisfactory that these angular diameters agree closely with the value derived from consideration of the assumed surface brightness of each star.

ABSOLUTE MAGNITUDE.

This phrase is much in use in the astronomy of the present day, and implies the luminosity of a star irrespective of its distance. The precise definition of absolute magnitude is that it is the number that expresses according to the usual system of stellar magnitude (*see* p. 57) the brightness of the star as it would be seen at the distance of 10 parsecs (parallax 0·1″). It is

The last column of each table shows the brightness, irrespective of distance, compared with that of our Sun, which is taken as a star of apparent magnitude −26·57 on the stellar scale. A star marked thus * is the brightest component of a binary or multiple system. The first star in the list seems to be physically connected with the α Centauri system. Munich 15040 : this star has the greatest proper motion yet observed. Barnard found it to be moving at the rate of 10·3″ per year. In actual size it is probably the smallest star known.

clear that if the distance of a star is known, its absolute magnitude can be computed from its apparent, *or* by reversing the formula, if the absolute and the apparent magnitudes are known, the distance of the star can be determined.

DISTANCE OF THE STARS.

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from opposite points of the Earth's orbit, which is now usually done by photographing the star and its surroundings at appropriate epochs and finding by measurement the change of position of the stars with relation to its neighbours. A spectroscopic method of finding parallax has recently been evolved. It is found that the absolute magnitude of a star is shown by the intensity of the lines in its spectrum, and comparison of this absolute magnitude with the magnitude as observed gives a value of the parallax. Both these methods are now being pursued with vigour, and it may be said that by means of these, and some other less direct methods, the distances or parallax of more than 3,000 individual stars are now known. If by any means it is possible to find out the mean parallactic movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars.

In a sphere round the Sun as centre with a a radius of a hundred billion miles (five parsecs), there are within it, so far as is known, about 20 stars. The nearest of these is the faint star of the α Centauri system. The immense distances of the stars are expressed as multiples of some correspondingly large unit. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros ; another unit is the parsec, which is 3¼ times the light year and is represented roughly by 2 followed by 13 zeros. There is also a unit little used called the Siriometer, which is equivalent to a million times the distance of the Earth from the Sun. A short list of some of the nearest stars is given above. It will be seen that this comprises some of the faint stars which are therefore of small absolute luminosity (Dwarf). On the other hand in the list of bright stars in the adjoining list there are some which are very distant, and these must therefore be intrinsically of great magnitude (Giant).

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen, and have some affinity to planetary nebulæ. Stars whose spectra range between A and F—and it is to be remarked that there is no rigorous line of division between the classes—are white or blue stars, and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls within the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are red. Antares, Betelgeuse, and α Herculis are notable stars in sub-classes of this type. (*See* Table above.)

STELLAR EVOLUTION.

It is realised that the spectrum of a star shows not only the materials of which it is composed but also its physical condtion. Stars of the M

type are of low temperature, whereas those of A and B are hot stars. This has led to hypotheses of stellar evolution, but whereas it has been supposed that each star passed through stages from hot to cold as indicated by the order of spectra shown above, a recent theory affirms that a star begins its existence as a large cool body (Giant star Type M) and after increasing in temperature and density through the types K, G, F, A, B, passes with diminishing temperature and decreasing volume in reverse order through the types to become a Dwarf Star of the M type. This theory, which resembles in some respects one propounded by the late Sir Norman Lockyer, is in its present form the result of researches on stellar masses and magnitudes by Prof. H. N. Russell, of Princeton, U.S.A.

STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. Consideration of these proper motions has led to the conclusion that they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19·5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, but there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral type F and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type.

STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together, sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light; the latter are called nebulæ, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue.	Messier's or Herschel's Number.	R.A. 1920.	Declination 1920.	Constellation.	Appearance.
		h m	° ′		
224	M 31	0 38	+40 50	Andromeda ...	Very brilliant oval nebula, visible to naked eye.
598	M 33	1 29	+29 38	Andromeda ...	A large nebula.
869 & 884	H VI. 33, 34	2 15	+56 45	Perseus	Fine double cluster, visible to naked eye.
1952	M 1	5 30	+22 0	Taurus	The well-known "Crab Nebula" of Lord Rosse.
1976	M 42	5 31	− 5 27	Orion	Large and splendid nebula, visible to naked eye.
2099	M 37	5 47	+32 30	Auriga	A fine cluster of stars.
2070	.....	5 39	−69 19	Dorado.....	Great "Looped" nebula—visible to naked eye.
2168	M 35	6 4	+24 20	Gemini.....	Magnificent cluster of stars.
2632	M 44	8 35	+20 15	Cancer	Called "Præsepe," or the "Bee Hive"—visible to naked eye.
3372	.....	10 42	−59 16	Argo	Great nebula surrounding η Argûs.
5194	M 51	13 26	+47 35	Canes Venatici	Brilliant spiral nebula.
5272	M 3	13 38	+28 45	Canes Venatici	Splendid cluster of stars.
6205	M 13	16 39	+36 35	Hercules.....	Very fine cluster of stars, visible to naked eye.
6494	M 23	17 52	−19 0	Ophiuchus	Fine cluster of stars.
6543	H IV. 37	17 59	+66 35	Draco	Bright planetary nebula.
6720	M 57	18 51	+32 55	Lyra	Beautiful ring of bright nebulosity.
6853	M 27	19 56	+22 30	Aquila	Large nebula formed like a "Dumb-Bell" or "Hour-Glass."
7089	M 2	21 29	− 1 10	Aquarius.....	Splendid globular cluster of stars.
7078	M 15	21 26	+11 49	Pegasus	Magnificent cluster of stars.

Besides the obvious separation into these two classes there is further subdivision. There are loose clusters of stars of which the Pleiades is the best known example, and there are globular clusters whose character is described by their name. Among the nebulæ there are some that are small, regular in outline, and show a uniform disc of light known as planetary nebulæ, and analogous to these are some which are dark in the centre called annular or ring nebulæ. Beyond this the spectroscope divides the nebulæ into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas. Later investigation showed that the spectra of some nebulæ are continuous, from which it may be inferred that these are in a later stage of progress, assuming the evolution of celestial bodies from a primitive nebula. The nebulæ with continuous spectrum are called "white" nebulæ, in distinction to those with bright line spectra, which are "green" or gaseous. Photography has brought the means of studying the number and form of these objects in great detail, and it is found that the white nebulæ are as a rule of a spiral form, and that there are many thousands of them. The gaseous green nebulæ are in a small minority. The great nebula in Andromeda is a notable example of the spiral class. Its spectrum is perfectly continuous, unmarked by any lines or bands, either bright or dark, and its shape is that of a convoluted mass seen edgewise. The position of these bodies and the method of their distribution in space have already been mentioned (*see* p. 86). The larger gaseous nebulæ lie mostly in the Milky Way, and the smaller, the so-called planetary and stellar nebulæ, though they do not do so entirely, do not markedly avoid it as do the spirals which lie in a zone of the sky, roughly at right angles to the Galaxy.

MINIMA OF ALGOL (β PERSEI) IN 1923.

January.	February.	March.	April.	July.	August.	September.	October.	November.	December.
D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.

31 19	...	30 3	30 16	31 10	31 23	...	31 5	...	30 10

These times are *approximately* the middle of minimum phase.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude, but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude, remains so for about 20 minutes, and then regains its light. The whole eclipse occupies about 10 hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table above. The position of Algol is given by R.A. *3h. 3m.*, Declination 40° 39′ N.

There are variable stars of types other than the Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. Stars of the β Lyræ type pass from minimum to minimum in about 6½ days, but are not of the same brightness at all minima, the alternate being equal. There are variable stars of long period (about 330 days) of which Mira Ceti is the most famous and others more capricious in their variation whose peculiarities can scarcely be summarized.

The variation of stars of the Algol type is believed to be caused by the partial eclipse of the bright star by a dark companion which moves in an orbit round it. A secondary minimum that has been noted in the period of variation of Algol can be accounted for by this theory. The variation of the Cepheid variables, on the other hand, is not caused by eclipse, though many of them have been found to be binary stars. It has been suggested that it may be due to a pulsation or periodic swelling and contraction of the star. A curious relation has been found between the absolute magnitude and the period of variation of Cepheids, those of longer period being the brighter, and from this the distances of these stars may be inferred.

NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration, or as an alternative theory a mass of dark nebulous gas may by some means have become igneous. The great brilliancy which occurs very suddenly, is short-lived, for there follows a rapid fall, and in a few months the object emits, perhaps, 1 per cent. of its light, whilst in a decade it has fallen to its original condition and luminosity. As these changes go on the spectrum undergoes equally remarkable variations. The few observations that have been made during the increase of brightness show a spectrum of the ordinary type crossed by dark lines which are much displaced from their normal position. Just as the maximum light is reached the spectrum is full of bright bands flanked by dark lines on the side of the shorter wave length towards the violet. The lines of hydrogen are most conspicuous, but helium is present, and other bands can be identified with enhanced lines or lines which are produced in the laboratory when metallic vapour is very strongly excited to luminosity by a powerful electric spark. Later on as the light begins to fall the characteristic nebular lines in the green and violet make their appearance and become the most conspicuous feature of the spectrum while the other lines fade away. At a still later stage the spectrum resembles that of the nucleus of a planetary nebula or of one of the Wolf-Rayet stars which are found here and there in the Milky Way. Below will be found a list of the Novae (12 in number) that have been visible to the naked eye since 1848. The two last in the list are now of about 10th magnitude, and apparently are still becoming fainter. Nova Persei 1901 is of about the 13th magnitude, but is varying in brightness with a range of about a magnitude. Novae which are not of naked eye visibility are not infrequently found on photographs.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, is not unlike many of the stars we see in magnitude and constitution. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets and a thousand minor planets, or asteroids, circulating round him at varying distances in oval-shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals, since they move in elongated elliptical orbits of which the Sun is at one focus are also members of the Solar system, but shine partly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (*see* p. 59) is used as a fundamental plane of reference. The other planets move, at varying distances from the Sun, in planes inclined but little to the plane of the Ecliptic, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form. The time of rotation about the axis, or the length of the day of the planet, is added where this is known.

THE SUN.

The surface of the Sun, seen in a telescope, presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice-grains or willow leaves. On this surface black spots appear sporadically, and around these are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. Associated with the faculae there are brilliant clouds of calcium vapour that are revealed by the spectrohe iograph, an instrument by means of which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. The nature of the spots is not known with certainty. Formerly they were thought to be saucer-shaped depressions at a lower level than the surrounding surface, which is called the photosphere; modern views describe them as columnar vortices which have a deep-seated origin far below the photosphere, and assume that a sun-spot is a vast tornado in which electrified particles are rapidly whirled. This view is confirmed by the invariable presence of a magnetic field in the neighbourhood. There is apparently a connection between the solar activity, as shown by the spots, and terrestrial magnetism for the coincidence in time, between certain exhibitions of its variations and the appearance of sun-spots is too marked to be fortuitous. It is suggested that the connection is made by stream-like emanations of corpuscles from the Sun which envelop the earth. The spots vary in size and number, and their total area reaches a maximum about every eleven years. They seldom appear more than 30° of latitude from the solar equator, north or south, and the spotted regions converge towards that equator as minimum approaches. From measures of their position the latitude and longitude of the spots on the Sun's surface (Heliographic) can be computed. Elements necessary for this computation are given on page 2 of each month. The Sun rotates on its axis in about 25 days 9 hours, which is shown by the apparent movement of the spots. They cross the visible disc from the eastern to the western edge in 13 or 14 days, the average period of the Sun's rotation with *respect to the Earth* being 27¼ days, because of the orbital movement of the Earth in the interval. Like Jupiter, the Sun appears not to rotate as a whole, the period of rotation being different in different latitudes. The Equator makes a sidereal rotation in less than 25 days, whereas the period for latitude 35° is nearly 27 days. Except for outbursts of some size in February and March, when there was a group visible to the unaided eye, the spots on the sun in 1922 were few and small, and the minimum is evidently at hand. There was a small spot in a high solar latitude in June, which is always a precursor of a new cycle.

DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima.		Minima.	
1805·2	1870·6	1810·6	1867·2
1816·4	1883·9	1823·3	1878·9
1829·9	1894·1	1833·9	1889·6
1837·2	1906·1	1843·5	1901·7
1848·1	1917·7	1856·0	1913·1
1860·1			

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, certain red prominences are seen projecting from the Sun's edge, which consist of masses of glowing hydrogen gas arising from the chromosphere. Sometimes these are of remarkable shape and extend to enormous heights, occasionally being detached from the body of the Sun. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen, the upper is a beautiful mass of silvery white light, in form of feather-like plumes, with dark spaces between, which have been traced from the Sun's edge to a distance as great as twice the Sun's diameter. Occasional streamers of the corona have been followed to a greater length than this. The corona does not retain a constant form, but appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are only seen total at places where the shadow of the Moon falls, and an eclipse is partial at localities off this line of totality, because the change in the observer's position puts the Moon out of the direct line joining her to the Sun. Total eclipses of the Sun are rare in this country. There will be an eclipse in June 1927 which will be momentarily total from a track running across North Wales and North-West Yorkshire.

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and the times and distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 29°. The period of revolution round the Sun—in other words, Mercury's year—comprises 88 solar days, and he turns on his axis either in the same time, and therefore always presents the same face to the Sun, like the Moon with respect to the Earth, or in about 25 hours. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West.

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbour, the angles of Elongation exceed those of Mercury, and extend to 47°. The disc of Venus is not telescopically interesting, for owing to her dense cloud-laden atmosphere very few markings are visible, and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth, whilst others have concluded that it is equal to the year of Venus, or in other words, that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she appears as a beautiful crescent like the Moon when about 5 days from New. There was an epoch of this kind on December 31, 1922, so that Venus will be a bright morning star in January, but beyond that there is no other epoch of Greatest Brilliancy in 1923.

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth. It will not be in Opposition in this year (*see* p. 44), but the next occasion will be on August 23, 1924, when Mars will be of magnitude $-2{\cdot}7$, which is brighter than Jupiter can be at any time. Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. His disc departs from exact circular form, or is gibbous only to the extent of one-eighth of its diameter. The other superior planets are too far away to show any very appreciable phase, though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained; there are, besides, white spots at the poles of rotation. These are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely, which it does rarely. The remainder of the disc is divided into greyish and ruddy areas, which have been called seas and lands. The dark grey patches are now not considered to be oceans, but are usually regarded as marshes or areas covered with some sort of vegetation. These areas are seen to change their colour and intensity with the Martian seasons very much as our vegetation would appear to do if viewed from a celestial neighbour. Certain fine, dark, straight markings seen across the ruddy areas have been named "canals," perhaps a little unfortunately, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof.

MINOR PLANETS.

Between the orbits of Mars and Jupiter a large number of small planets have been discovered, and every year a considerable number are added to the list. At present the total number known is about a thousand, and there may still be thousands awaiting detection. The four largest found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 118 miles; and Vesta, 243 miles in diameter. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or 4½ years. Some of the orbits are very oval, and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35°, whilst that of Juno is only 13°. One of these small bodies, named Eros, at some oppositions approaches nearer to the Earth than Mars does at any time, and this affords a good opportunity for determination of the solar parallax. Oppositions happen at intervals of about 2⅓ years, the circumstances being very different at the different occasions. There was one in September, 1921, when Eros was distant about 60 million miles: there will be another in 1923–24 when the distance will be somewhat less, and there will be a very close approach at the opposition in 1931.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only ⅓th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid, is believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. The planes of their orbits are but slightly inclined to that of Jupiter about the Sun, and in consequence these bodies

which shine by the light of the Sun, are eclipsed every Jovian lunation, except Satellite IV., which escapes under some circumstances (*see* p. 94).

The Great Red Spot on Jupiter.

This may be considered the most remarkable and the best observed planetary feature of modern times. There are records of an observation of a spot by Hook in 1664 which may have been an early appearance of this, but the first modern observation was by the Rev. W. R. Dawes when he figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857. It came again into prominence in 1878 and the following years. A curious bay or hollow on this belt has been visible since 1831; and if we accept this as identical with the one now intermittently perceptible (which includes the red spot), then the rotation of this object during the 88½ years from 1831 to 1920 was $9h.\ 55m.\ 36{\cdot}9s.$ from more than 78,000 rotations.

In the early months of 1919 the great red spot and its immediate surroundings underwent some surprising changes. The bay or hollow in the S. side of the southern equatorial belt disappeared, and the red spot seemed almost obliterated. The south tropical disturbance, visible since 1901, consisting of an extensive dusky marking reaching halfway round the circumference of Jupiter, and situated in the usually bright zone between the southern side of the south equatorial belt and the south temperate belt, apparently disappeared. The apparition of 1919-20 was again remarkable. The features mentioned above, the Bay, the Red Spot Hollow, and the S. Tropical disturbance, had all reappeared, and the Red Spot, though without its colour, was well defined and of abnormal length.

At the opening of the year 1923 the position of the latter object will be approximately 125°, or a little more than 3½ hours, preceding the zero meridian (System II.) of Jupiter, and if the previous motion is continued, the values above given will increase at the rate of about 2°, or 3 minutes per month. There is much to repay a careful study of the portion of Jupiter's surface referred to through adequately powerful telescopes. The transit of the zero meridian (II.) of the planet on various dates in 1923 will be as under in astronomical time:—

1923.	H. M.	1923.	H. M.
Jan. 7	19 39	Apr. 27	10 43
,, 9	21 38	,, 29	12 21
Feb. 5	18 58	May 1	13 59
,, 7	20 36	,, 3	15 37
,, 11	23 53	,, 28	11 14
Mar. 6	17 54	,, 30	12 52
,, 8	19 32	Dec. 20	2 20
,, 31	13 30	,, 30	10 35

The times for other dates may be found by adding periods of $9h.\ 55m.\ 40s.$

Note.—Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9h.\ 50m.\ 30s.$ System II. applies to the Temperate Zones, and in this the time of rotation is $9h.\ 55m.\ 40{\cdot}63s.$

It is to be remembered that in March, 1923, the Red Spot will come to the Central Meridian of Jupiter about $3h.\ 30m.$ before the times given in the foregoing list, and that this interval of the precedence of the spot will probably increase by about 3 minutes per month.

Saturn.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. His figure shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as 13½ to 15.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is about the same size as our satellite.

Titan was discovered by Huyghens in 1655, Tethys, Dione, Rhea and Iapetus (*see* table p. 94) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell in September, 1848. The most distant, Phœbe, which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter VIII. and IX. Themis, which is called the tenth satellite, though it appears not to be the farthest from the Sun, has been observed once only since its discovery by Pickering in 1900.

Uranus.

Discovered by William Herschel at Bath in 1781, this planet is only just visible to the naked eye. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than 4″ in diameter, and by the quality of his light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787; the two inner by Lassell in 1851. All four move in a plane which is almost at right angles to the ecliptic and their motion is considered to be retrograde.

Neptune.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. The motion of its single satellite, which was discovered by Lassell in 1846, is retrograde.

The Moon.

Neither Mercury nor Venus, so far as is known, has a satellite; the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the earth, but every region of the Moon is presented to the Sun in turn and as there is no sign of water or vapour on the disc, and con-

sequently no atmosphere, the surface must be exposed to the most violent changes of temperature: in the lunar day of half a month it must be heated to a very high temperature, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles, and her rate of motion through the firmament 13° 10′ 35″ per day and 32′ 56″ per hour. Thus she travels over a space slightly exceeding her own diameter in one hour. The actual time she takes to move around the Earth is *27d. 7h. 43m. 11·5s.*, but the time from one New Moon to another is *29d. 12h. 44m. 3s.* When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits.

Attempts have been made to interpret some small variations in certain of the lunar features as seasonal changes due to the change of temperature of the Moon. Some observations made during a recent lunar eclipse, when presumably the Moon suffers considerable change of temperature, gives no support to this view.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase for lunar eclipse is the same for all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but because the Sun's light is scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a copper-coloured disc, the precise shade being different at different eclipses. It will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

In a note on page 64 it is explained why the Full Moon, near the time of the Autumnal Equinox, rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and 3½-5¾ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles; highest summit (Huygens) reaches 18,000 feet.

Aristarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

Mare Crisium.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon, and about 142 miles in diameter. Situated on S. limb.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

COMETS.

In addition to the planets, there are other interesting objects belonging to the Solar system, called comets. Some of these revolve in elliptical orbits, and return at intervals, which, in the case of those that have been observed, range from 3½ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from 3½ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their paths extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets.

The following are the approximate dates when some members of this family should return to perihelion in 1923 and 1924, but the actual appearance of several of them is doubtful:—

Returns	Name.	Year of Discovery.	Period in Years.
1923 May	Giacobini	1896.....	6·647
,, June	Coggia	1873.....	6·202
,, Dec.	Denning	1894.....	7·418
,, Dec.	Swift	1889.....	8·534
1924 June	Barnard	1892.....	6·309
,, May	Swift	1895.....	7·186
,, Oct.	Encke	1786.....	3·299

The comets of this class move in elliptic orbits not much inclined to the Ecliptic. Without exception they travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two-thirds have a retrograde (westerly) motion.

There are other families of comets, none so large as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for reasons similar to that given above. Halley's comet belongs to the Neptunian family.

The most probable date for the return of Di Vico's comet of 1846 was November 1921, but as the period is uncertain by 2 or 3 years a later return is possible. It is therefore possible that it may re-appear in 1923.

None of the periodic comets due to return to perihelion were observed in 1922 (to October 31). Three new comets were discovered in the same period.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. From examination of the spectrum of the head, comets appear to consist of carbon in various forms, and cyanogen has also been detected. Secondly, there are bright metallic lines due to sodium, magnesium and iron which appear only when the comet is near perihelion, and in some cases have become very strong upon close approach to the Sun. The spectrum of the tail shows certain characteristic bands that are due to carbon monoxide of very low density. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS.

Another class of objects which belong to the Solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, which are all the same class of object, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena. The year 1916 was notable because of a remarkably abundant and previously unknown stream on June 28, which had a distinct connexion with Pons-Winnecke's periodical comet, the orbits being nearly the same. This comet returned to perihelion on June 12, 1921, but the attraction of Jupiter had so disturbed the comet's orbit that it passed outside the earth's path by about

two million miles, and the expectation of a brilliant meteoric shower was not realized. Some fine meteors were, however, observed on June 27, 28, and the few following nights at Bristol and Stowmarket. They were directed from radiant points in Draco, nearly conforming with that of particles radiating from Pons-Winnecke's comet, and probably were derived from that object. Meteorites are composed of terrestrial elements, iron, chromium, magnesium, and nickel being in large proportion.

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of the period of moonlight and sunlight during the twelve hours from 18*h*. to 6*h*. These small diagrams have four divisions, each representing three hours, and a division is left unblacked if the moon or the sun is above the horizon for at least half of the period represented. The diagrams used for the greater part of the year

when it is light or dark during the periods named. In the summer, when the sun is above the horizon for more than half the first and last intervals, these

reduce to

EXAMPLES.—From Jan. 1–Jan. 5. 1923, there is moonlight from 18*h*. till 6*h*. (*approximately*), but on Jan. 6 the Moon does not rise until nearly 21*h*. On the nights Jan. 13–Jan. 19 there is no moonlight between these hours except for a small amount at the limiting dates. On June 24 and 25 the moon sets before 3*h*., but the diagram given is the same as for night of full-moon.

THE AURORA BOREALIS.

This phenomenon is more terrestrial than celestial, and this paragraph, with that which follows, would have been more suitably placed in a later section. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations, and it is desirable to record the varying phases and times of these features. Its chief manifestations recur at fairly regular intervals of about eleven years, and seem to be associated with magnetic disturbances and Sun-spots, which have similar periods. The aurora is sometimes regarded as showing the outer limit of our atmosphere and its height has been determined. The general result is that the elevation of an aurora is between 50 and 200 miles. The great majority are about 60 miles high, and there are few above 100 miles. There is some suggestion that, with magnetic storms, the period of their appearance follows that of the Sun's synodic rotation (27¼ days). On March 22, 1920, there was a very extended group of spots at the middle of the Sun's disc, a magnetic storm, and splendid display of aurora during the night. A similar coincidence occurred in 1921 (May 14).

THE ZODIACAL LIGHT.

This is an appearance which is little understood, and therefore deserves the attention of observers. It shows as a band of faint light which stretches up slantingly from the Sun before sunrise in the autumn months and after sunset in Spring. It may be the manifestation of a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems. It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain, but its true nature is not clearly distinguishable on the evidence before us.

APPARENT DIMENSIONS OF SATURN'S OUTER RING, 1923.

Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.	Date.	Major Axis.	Minor Axis.
	′	″		″	″		″	″		″	″
Jan. 10	39·19	+8·11	April 16	43·32	+7·61	July 21	38·02	+6·40	Oct. 25	35·10	+ 8·41
Feb. 11	41·37	+8·51	May 18	42·18	+6·83	Aug. 22	36·31	+6·82	Nov. 26	35·76	+ 9·40
Mar. 15	43·00	+8·31	June 19	40·15	+6·37	Sept. 23	35·30	+7·52	Dec. 28	37·20	+10·40

This table give the angular dimensions of the outer limit of Saturn's outer Ring as seen from the Earth. The + sign shows that the North side of the Ring is presented to the Earth throughout the year. The plane of the ring last passed through the Sun's centre on April 10, 1921.

Time Signals by Wireless Telegraphy.

IF a stone is dropped on a still sheet of water, there will proceed from the point where it falls a wave which will travel away in a widening circle. The wave will gradually diminish as it goes farther away until at last no perceptible undulation will remain. If stones be dropped continuously at regular intervals, say of one second, waves will follow one another, with equal spaces between consecutive waves. This distance between the crests of the waves is the wave-length and depends on the rate at which the stones are dropped, combined with the rate at which the waves leave the centre of disturbance. The distance to which the wave travels before dying out depends on the violence of the disturbance.

Similarly, the transmitting instrument at a wireless station disturbs the ether, and the waves in the ether, resulting from the disturbance, travel in widening circles which become less marked as they go until no perceptible undulation remains. The sending station can set the distance which separates successive waves as it pleases by using apparatus which fixes the number of times per second at which the ether shall be disturbed.* It cannot control the rate at which the waves travel from their source, which is the same as the speed of light, 186,000 miles per second, but it can set the wave-length on which it shall transmit its

* It is perhaps necessary to say that this does not refer to the action of the sending key. From the sending station a continuous train of waves is sent out and actuates the receiving instrument at a distant station properly tuned, so long as the transmitting key at the sending station is held down. By manipulating that key the continuous train is broken up into short and long pieces (dots and dashes).

signals to suit its own convenience, and the distance to which a wave travels before dying out being dependent on the amount of energy employed is also within the control of the sending station.

A receiving instrument can only operate if adapted to some particular set of circumstances, and must be attuned to the particular wave-length of the sending station that it is desired to receive.

WIRELESS TIME-SIGNALS THROUGHOUT THE WORLD.

Batavia	600	1	0			Dots at 1*h.* 0*m.* 0*s.*, 1*m.* 0*s.*, 2*m.* 0*s.*, 3*m.* 0*s.*, 4*m.* 0*s.*, with warning signals between of a kind similar to Shanghai.
Surabaya	600	2	10			Dots at 2*h.* 10*m.* 0*s.*, 12*m.* 0*s.*, 14*m.* 0*s.*, with
Perth	600	3	0	15	0	B. [warning signals between.
Adelaide	600	2	30	14	30	B
Melbourne	600	2	0	14	0	B.
Awanui	2,000	10	0			Dashes, 10*h.* 0*m.* 0*s.*, 1*m.*, 2*m.*, 4*m.* and 5*m.* 0*s.*
Wellington	600	9	0			Dashes, 9*h.* 0*m.* 0*s.*, 1*m.*, 2*m.*, 4*m.* and 5*m.* 0*s.*, with
Honolulu (Pearl Harb.)	600	0	0			As for San Francisco. [warnings between.
San Francisco	2,400	6	0	20	0	Dots each second from 5*h.* 55*m.* 0*s.* to 5*h.* 59*m.* 49*s.*, omitting second 29 and last 5 of each minute. Dash at 6*h.* 0*m.* 0*s.* (signal).
Arguello Point	1,512	20	0			
San Diego	2,400	20	0			
Balboa (Panama)	7,000	10	0	18	0	
Valparaiso	1,100	1	0			Dots each second from 0*h.* 55*m.* 0*s.* for five minutes omitting 29th second and last 10 of each minute with dot at 1*h.* 0*m.* 0*s.* (end of signal).

* For more complete descriptions of these signals reference may be made to the Admiralty List of Wireless Signals *This list is subject to alterations made after June, 1922.*

When signals are sent twice in the day as indicated in the third column, or when the description applies to more than one place, the times in this column are to be read, *mutatis mutandis*.

† Signals A consist of (1) a series of dashes (—) from 10*h.* 44*m.* 0*s.* to about 10*h.* 44*m.* 55*s.* with a (.) at 10*h.* 45*m.* 0*s.* (first Time signal). (2) and (3) Similar series of (— . . .) and (— . . .) from 10*h.* 46*m.* 0*s.* and 10*h.* 48*m.* 0*s.* respectively, with dots for time signals at 10*h.* 47*m.* 0*s.* and 10*h.* 49*m.* 0*s.*, the beginning of the dot (about ⅓ sec.) being the time.

Signals B are in accordance with the resolution of the International Time Conference of 1912 and consist of a series of the letter x (Morse — . . —) from 9*h.* 27*m.* 0*s.* to 9*h.* 27*m.* 50*s.* followed by letter O (— — —) ending 9*h.* 28*m.* 0*s.* (preparatory signals); a series of the letter N (— .) the dot being made at every tenth second of the minute 9*h.* followed by O ending 9*h.* 29*m.* 0*s.* and a series of letter G (— — .) ending with O at 9*h.* 30*m.* 0*s.* The end of the third dash of the O gives the time.

In all other cases in above list when the signal is a Dash, the beginning gives the time.

Meteorological Summary (British Isles), 1921–1922.

THE results in the table below are for London (Westminster, Kew and Kensington Palace)—barometer readings reduced to Mean Sea Level, from October 1921 to September 1922 inclusive.

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900·0 miles and the diameter of the Equatorial circle 7,926·7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5·5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and the Earth revolves round this centre not remaining precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of 23½°, and because of this inclination the Sun is high in the sky in the Summer months and low in the Winter. It is this tilt which causes the seasons, for not only does the high altitude in Summer cause the days to be longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres, the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versâ*. The dates when the Sun is in the line of intersection of the planes of the Equator and Ecliptic are called the Equinoxes, and on these dates day and night are of equal duration all over the globe. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is 18½ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time. Because the Earth moves round the Sun in the same direction as it rotates on its axis, the length of a solar day is more than the length of a rotation by about four minutes (*see* p. 101). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a curve, roughly spiral, about the pole of figure as centre at a distance of a few feet from it.

THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a series of periodic terms, and when these terms are each carried forward to some future date their recombination gives the predicted tide. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes. Taking the mean sea-level as datum, high water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs 2½ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports.

TERRESTRIAL MAGNETISM.

A phenomenon of the Earth, the origin of which is obscure, but on which some light has been thrown by recent investigations, is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to Chichester the declination is the same as at Greenwich. Along a parallel line through Dover the West declination is at present about a degree less; from Newcastle to Plymouth it is about 1½° greater; whilst at Dublin the declination West is 3° or 4° greater than at Greenwich. Observations of magnetic declination are made and charted to show the amount of this magnetic element over our globe, and from such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. The position of the North Magnetic Pole is about latitude 73°, longitude 100° W.; the South is in latitude 72°, longitude 150° E., but these positions apparently undergo secular change. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs is given in the table on p. 100. That the compass needle does not in general point true north and south,

but that it is inclined a certain amount east or west, and that the amount varies with the locality was recognised among western nations by the end of the 15th century, Columbus being credited with the discovery. That there is a secular change in the magnetic declination, or that the amount at any place changes slowly year by year, was discovered by Gellibrand in 1634.

Magnetic Declination at London.

Year.	°	′	
1580	11	15	East.
1665	1	30	West.
1765	20	0	West.
1800	24	0	West.

In 1819 the westerly declination at Greenwich was about 24° 25′, which was probably its maximum. The needle has been since moving slowly eastward. The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only. The figures for 1921 and 1922 are provisional.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
	° ′		° ′
1900	16 29·0	·1846	67 8·5
1910	15 41·2	·1855	66 52·6
1917	14 37·0	·18477	66 52·0
1918	14 27·8	·18464	66 52·8
1919	14 18·2	·18454	66 53·3
1920	14 8·6	·18456	66 51·8
1921	13 57·6	·18449	66 52·0
1922	13 48·0	·1845	66 52·0

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about 12′ in summer and 7′ in winter. The needle occupies its mean position in the morning about 10*h*., and again about 18*h*., throughout the year. It reaches its most westerly position about 14*h*., and its most easterly position during the night or early morning according to season of the year. The inclination or dip also varies in a similar manner to the declination. Since these variations of the magnetic elements are mainly confined to the hours of daylight, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the variation is larger at times of Sun-spot maximum than at minimum—it may be concluded that they are in some way dependent on solar radiation, and it is suggested that the ionisation of the upper atmosphere by the Sun, which causes it to be highly conducting, may produce the effect.

MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth-currents, which, if unusually violent cause hindrance to the working of cable and telegraph systems. These storms begin suddenly, and practically simultaneously all over the Earth. Dates when magnetic storms of some violence occurred are: Nov. 17, 1882; Feb. 13–14, 1892; Oct. 31, 1903; Sept. 25, 1909; August 9, 10, 1917; August 11, 1919; March 22, 1920; and May 13, 1921.

GRAVITY.

The law of attraction or universal gravitation affirms that two bodies exert on one another an attraction directly proportional to their masses and in inverse ratio to the square of the distance between them, and since this is so the terrestrial mass exerts an attraction upon all the bodies at its surface. The combination of this attraction with the (so-called) centrifugal force due to the rotation of the earth produces a resultant force which is known as gravity. The direction of this force is the vertical.

It is found by experiment that the force of gravity (generally indicated by the letter g) is different in different latitudes. At the Pole the force exceeds that at the Equator by rather more than a two-hundredth part or, in other words, a person who weighs 200 lbs. at the Equator by a spring balance would weigh by the same balance 201 lbs. at the Pole.

The experiments consist in finding the time of oscillation of the same pendulum in different latitudes, the time being smaller as g is larger. A pendulum which makes a swing in exactly one second is longer at places where g is large.

The following table gives the relative values of the force of gravity and the length of the seconds pendulum at various places—g is the acceleration due to gravity in centimetre-seconds, l is given in centimetres.

	g.	l.
Equator	978·05	99·097
Latitude 45°	980·63	99·359
Greenwich	981·21	99·418
Edinburgh	981·60	99·457
Pole	983·23	99·622

EARTHQUAKES.

Earthquakes, or earth tremors, are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the breaking point. This gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface, sometimes with disastrous effects. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus. That part of the Earth which is vertically above this centre is called the epicentre. The waves transmitted through the Earth may come to the surface hundreds, or even thousands, of miles from the epicentre, and the times of arrival are recorded. The first indications on the seismograph are made by longitudinal waves (P), which are followed after an interval by direct transverse waves (S) in approximately the same path, but which travel at a different rate. From the length of the interval of time between the arrival of the (P) and the (S) waves, the distance of the epicentre from the recording station may be inferred, and from three or more such distances it is possible to make an estimate of the position of the epicentre on the earth's surface. There is no very certain method for determining the depth of the focus, but judging from particular cases for which estimates have been made, this may range from 50 to 450 km. A violent earthquake in Japan on April 26, 1922, was, as well as many others, recorded at Oxford.

Greenwich Mean Time.

APART from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars. The speed of the Earth's rotation is itself uniform, but the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun, which is in the same direction as the rotation of the Earth on its axis, but is not constant throughout the year because of the ellipticity of the orbit, and also by the circumstance that the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant, but that of the apparent, or the interval from one transit of the Sun across the meridian to the next varies for the reasons above given, and it happens that the longest solar day is December 22, which is the shortest day from sunrise to sunset in the northern hemisphere. This is 30 seconds longer than the mean. The shortest solar day is on September 16 or thereabouts, and falls short of the mean by about 21 seconds.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent diurnal journey round the Earth, is on some chosen meridian. When the meridian chosen is that which passes through some particular place, the time is called the Local Mean Time of that place. Usually some standard meridian, such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time arises (see Zone Standard Time, p. 102).

Apparent Solar Time.

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, and is to be used according to the precept in the heading.

The Astronomical Day.

For purposes of Astronomy the day begins at noon, and the hours following noon are numbered successively from 0 to 23. There is therefore no use of the letters A.M. and P.M. in astronomical tables, but January 1*d.* 2*h.* is the equivalent of January 2*d.* 10*h.* a.m. in ordinary parlance, and January 2*d.* 9*h.* in astronomy is recognised as being January 2*d.* 9*h.* p.m. of ordinary life, or 2*d.* 21*h.* according to the system used in these pages. The abbreviation G.M.T. indicates the time of a day which begins at Mean Noon, except when otherwise stated. In 1919 the Lords of the Admiralty directed that a day beginning at midnight should be substituted for the Astronomical Day in the *Nautical Almanac*, beginning with the edition for 1925. A day of 24 consecutively numbered hours beginning at midnight is used in the Admiralty Tide Tables and in some other publications, and has been used in this Almanack since 1921. This is generally called Greenwich Civil Time, and is indicated by the letters G.C.T.

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars. This is of uniform length, and is divided, like the mean solar day, into 24 equal hours, which are shorter than a solar hour by about 9·83 seconds of mean time. As the sidereal day is about 4 minutes shorter than the mean solar day (*see* page 81), it begins earlier day by day by about that amount. The instant of the beginning of the sidereal day in G.M.T. is given on p. 2 of each month. In actual observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation (*see* below). The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian or are due south, and comparison of this with the known time of transit (star's R.A.) will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing the instant by the Mean Time clock when the stars cross the meridian.

Ex.—To find the Mean Time which corresponds to 12*h.* 5*m.* 53*s.* Sidereal Time on Aug. 15:

(Interval from Noon in Sid. Time	2	34	24
Retardation for 2*h.* is 19·66*s.* (page 81)			
,, 34*m.* ,, 5·57*s.*			25
,, 24*s.* ,, ·07*s.*)			
Corresponding Mean Time ...	2	33	59

"Summer" Time.

In the spring of 1916 the Government adopted as a war-measure the principle of a scheme proposed by Mr. William Willett about the year 1907 and an Act was passed, known as the Summer Time Act (1916), the first clause of which runs: "During the prescribed period in each year in which this Act is in force the time for general purposes in Great Britain shall be one hour in advance of Greenwich Mean Time." Summer Time has been used in the following periods in accordance with an Order in Council issued in each year. Last year (1922) a Bill was passed which ordained that Summer Time shall last from 2 o'clock in the morning of the day next following the third Saturday in April, or if that day is Easter Day, the day next following the second Saturday in April, until 2 o'clock in the morning of the day next following the third Saturday in September. The Bill is to have effect for the first time in 1923, and is to be an annual one, renewable year by year.

1916.	May 21*d.* 2*h.*	to	Oct.	1*d.* 2*h.*
1917.	April 8*d.* 2*h.*	to	Sept.	17*d.* 2*h.*
1918.	Mar. 24*d.* 2*h.*	to	Sept.	30*d.* 2*h.*
1919.	Mar. 30*d.* 2*h.*	to	Sept.	29*d.* 2*h.*
1920.	Mar. 28*d.* 2*h.*	to	Oct.	25*d.* 2*h.*
1921.	April 3*d.* 2*h.*	to	Oct.	3*d.* 2*h.*
1922.	Mar. 26*d.* 2*h.*	to	Oct.	8*d.* 2*h.*

The hour being Greenwich Civil in each case.

The Act (1922) applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. (*See* p. 102, note.)

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian.* Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now nearly all the countries of the world use as Standard the Time of some meridian which differs from that of Greenwich by a multiple of 15°, and therefore differs from Greenwich Mean Solar Time by an integral number of hours, either fast or slow. In a few cases differences including a half hour have been adopted.

The countries in which Standard Time has been adopted according to this scheme are given in the accompanying table. In the United States and Canada five different standard times are used, these large territories being divided into zones approximately 7½° on either side of five central meridians. This arrangement is not strictly adhered to, because towns and cities near the dividing lines adopt which of the two times is the more suitable to railway or local requirements. The same plan is followed in Brazil, which is divided into three zones, and in these the time, 3 hours, 4 hours, or 5 hours slow on Greenwich, is adopted as standard respectively.

Fast or Slow on Greenwich Time.			
12	hrs.	F.	Fiji Islands.
11½	,,	F.	New Zealand.
11	,,	F.	New Caledonia and dependencies, Caroline Is., east of 154° E., Marshall Is.
10	,,	F.	Victoria. New South Wales, Queensland, Tasmania, New Guinea, Bismarck Archipelago, Caroline Is., Marianne Is. (except Guam).
9½	,,	F.	South Australia, Northern Territory of Australia.
9	,,	F.	Japan, Corea, Yap (Caroline Is.).
8	,,	F.	Port Arthur, East China, Hong Kong, Philippine Is., Formosa and Pescadores Is., North Borneo and Labuan, Macao, Portuguese Timor, West Australia.
7	,,	F.	French Indo-China, Hoihau and Pakhoi, Siam, Federated Malay States, Straits Settlements.
6½	,,	F.	Burma.
5½	,,	F.	India (except Calcutta and Portuguese India), Ceylon.
5	,,	F.	Chagos Archipelago, Portuguese India.
4	,,	F.	Mauritius, Seychelles, Réunion.
3	,,	F.	French Somaliland, Madagascar, Italian Somaliland, Aden.
2½	,,	F.	British East Africa, Uganda.
2	,,	F.	Turkey. Greece, Bulgaria, Roumania, Russia (time of Pulkovo 2 hours 1 minute fast on Greenwich), Egypt, Rhodesia and Union of South Africa, Portuguese East Africa, Cyprus, Finland.
1	hr.	F.	Sweden, Norway, Denmark, Germany, Luxembourg, Austria, Hungary, Switzerland, Italy, Bosnia, Servia, Malta, Czecho-Slovakia, Tunis, Nigeria, French Equatorial Africa, Cameroons, Belgian Congo, Portuguese West Africa, South-West Africa, Angola, Libya, Serbia.
Greenwich Time			Great Britain, Ireland, France, Belgium, Spain, Portugal, Faröe Is., Gibraltar, Algeria, St. Thomas and Princes Is., Ivory Coast, Dahomey, Morocco, Bathurst (Gambia), Gold Coast (Jan.–Aug.).
1	hr.	S.	Iceland, Madeira, French Guinea, Senegal, Portuguese Guinea, Liberia, Sierra Leone.
2	hrs.	S.	Azores, Cape Verde Is., Fernando and Trinidad Is. (Brazil).
3	,,	S.	Eastern Brazil.
4	,,	S.	New Brunswick (East), Nova Scotia, Quebec (East), Prince Edward Is., Porto Rico, Trinidad, the Leeward Is., Grenada, Guadeloupe, Tobago, Martinique, St. Lucia St. Vincent, St. Pierre, Central Brazil, the Argentine Republic, Uruguay, French Guiana,
4½	,,	S.	Venezuela.
5	,,	S.	Quebec, Ontario to 82° 30′ W., New Brunswick, Eastern Zone of the United States, Jamaica, Bahama Is., Peru, Panama, Western Brazil.
6	,,	S.	Central Zones of Canada and United States, Honduras.
7	,,	S.	Mountain Zones of Canada and the United States.
8	,,	S.	British Columbia, California, Nevada, Oregon, Washington.
9	,,	S.	Yukon, Alaska, Sitka.
10	,,	S.	Low Archipelago, Marquesas, Austral and Society Is.
10½	,,	S.	Sandwich Is.

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European. The time appropriate to Eastern Canada, 4 hours slow on Greenwich, has been called alternatively Maritime, Inter-Colonial, and Atlantic Time. The standard times in use in the other four zones of the North American continent are called respectively Eastern, Central, Mountain, and Pacific Time.

The time to be used in Samoa is under consideration. When the island was under German rule the Standard Time was 11½ hours slow on Greenwich. It is now proposed that the time shall be the same as that of New Zealand, in the part of the island under the Protectorate of that Colony. If this scheme is adopted it will involve an alteration in the Date line. It had previously been proposed that the time of New Zealand should be 12 hours fast on Greenwich.

THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group of the same side of the line, or for political reasons. The line is indicated by joining up the following eight points :—

(1) Lat. 60° S., long. 180°.
(2) ,, 51½° S., long. 180°.
(3) ,, 45½° S., long. 172½° W.
(4) ,, 15½° S., long. 172½° W.
(5) ,, 5° S., long. 180°.
(6) ,, 48° N., long. 180°.
(7) ,, 52½° N., long. 170° E.
(8) ,, 65° N., long. 169° W.

Then through the centre of Bering Strait to a point lat. 70° N., long. 180°.

* Summer Time is the "legal" time during the period in which its use is ordained. (See p. 101).

THE AGE OF THE EARTH.

VARIOUS estimates have been made of the Age of the Earth, but scientific investigation showed the inaccuracy of unscientific computations, which gave the year 4004 B.C. for the "Creation of the World" (Ussher); 3760 B.C. (Jewish Chronology); 4713 B.C. (Julian Epoch); or 5508 B.C. (Era of Constantinople). From the assumption that the Sun's heat is sustained solely by contraction of its bulk Lord Kelvin deduced 20,000,000 years as the time during which it has existed, but this period is much too short to be accepted by geologists. The discovery of radio-active substances brought a new factor into consideration, and it has been lately estimated that as *the abode of life* (Lord Rayleigh, *Brit. Assoc.*, 1921) a moderate multiple of 1,000,000,000 years is the possible and probable duration of the earth's crust.

GEOLOGICAL PERIODS.

I. AZOIC ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.

II. EOZOIC ("Dawn of Life"), characterized by the first appearance of animal life.

III. PALÆOZOIC ("Old Life") or PRIMARY, containing traces of extinct animal life:—
- i. *Cambrian*, exemplified in Wales (Cambria), Cumberland, etc.—the earliest group which possesses a connected suite of fossils.
- ii. *Ordovician*, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
- iii. *Silurian*, named after the ancient British inhabitants (Silures) of S.E. Wales.
- iv. *Devonian* or *Old Red Sandstone*, from the prevalence of the system as a marine formation in Devonshire.
- v. *Carboniferous*, including *Coal Measures*, Millstone Grit and Mountain Limestone.
- vi. *Permian*, from the Russian province of *Perm*, where these strata are widespread.

IV. MESOZOIC ("Middle Life") or SECONDARY, with intermediate forms of animal life:—
- i. *Triassic*, from the *three* (tri-) divisions of the type formation in Germany.
- ii. *Jurassic*, typically displayed in the *Jura Mountains*.
- iii. *Cretaceous*, from the *chalky* nature of its representatives where first studied.

V. CAINOZOIC ("New Life") or TERTIARY, containing forms of existing life:—
- i. *Eocene*, the *dawn* or beginning of *new* forms of life, *i.e.*, existing species.
- ii. *Oligocene*, containing *a few* still existing species.
- iii. *Miocene*, containing a *minority* of existing species—less than 50 per cent.
- iv. *Pliocene*, the fossil remains show a *majority* of still existing species.

VI. QUATERNARY ("Fourth in Order") or POST-TERTIARY:—
- i. *Pleistocene* or *Glacial*, the *greatest number* of the remains are those of still existing species. Period of last Great *Ice* Age.
- ii. *Recent* or *Post-Glacial*.

Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. i.). Traces of *human* life are first found in V. iv.

THE ANTIQUITY OF MAN.

Pithecanthropos erectus (Erect Ape-man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pliocene times (*see* Geological Period, *ante*), about midway between the Orang-utan and Man in development.

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the earliest Pliocene Period. The difficulty of assigning dates to the Heidelberg or Trinil remains is shown in the conflict of authority, as one estimate gives 140,000 years (Rutot) for the whole, and another gives 700,000 years (Sturge) for a portion only of the Pliocene Period.

The Piltdown Skull.—Discovered in 1912 at Piltdown, Sussex, and ascribed to primitive man (Eo-anthropos) of early Paleolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1859 in the Neanderthal Ravine, near Düsseldorf, Rhenish Prussia, and others found at *Spy*, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era.

Homo Primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brüx and Brünn, Moravia, and at Galley Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION.

The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. This may be better understood when it is remembered that while races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., there were races in Oceania still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages. Dates appended to the various stages are necessarily conjectural and they are based on parallel discoveries of remains of extinct or still existing animal life.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence against predatory mammals and for the slaughter of animals for food, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithic* (or Dawn of the Stone Age), and this period may have extended to 600,000 years B.C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments, from the chipped, leaf-shape forms, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were found). The Mousterian period is held to have lasted until about 10,000 B.C., when *Neolithic*

(or New Stone Age), weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging, the graves being only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil.—Cultivation is believed to have followed the interment of the dead about 10,000 B.C., and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Mesopotamia) no later than 6,000 B.C., and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Mesopotamia and Egypt.

The Bronze Age.—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements of cast bronze superseded the more primitive polished stone weapons, while utensils and ornaments of the same alloy replaced those of wood or horn or bone. The designs and decorations of the Bronze Age suggest that this stage of culture was introduced into Europe from Asia, and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age.—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, Chaldaea, Assyria and Egypt about 4000 B.C.; in South-Eastern Europe about 2000 B.C., spreading over the rest of Europe from 1000 B.C. to 100 A.D., by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age. With the Iron Age was reintroduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age. The later Iron Age has developed into the *Steel Age*, and the transition from iron to steel marks a stage in the progress of civilization at least as great as that from the Bronze to the Iron Age.

EPOCHS AND CALENDARS.

Abyssinian.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D. (See also "Coptic," *post.*)

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 20th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Archbishop of Armagh, published his *Annales Veteris Testamenti*, and *Ussher's Notation* was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Christian.—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Annus Domini*), the conventional abbreviation A.D. signifying *Anno Domini*, "in the year of the Lord." The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, 3760 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. The date of the Nativity of Christ does not in fact correspond with 1 A.D., but is placed in an earlier year from B.C. 4 to B.C. 9. A "Christian Era Calendar," giving the days of the week of any year in the Christian Era, was given on pp. 98–9 of the 1921 issue.

Coptic.—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year, and in these years there are 6 complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar. The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic Calendar for the year 1639 and part of 1640 is appended :—

Year 1639.	A.D. 1922.	Year 1639.	A.D. 1922.
Tūt	Sept. 11	Būnah	June 8
Bābah	Oct. 11	Abīb	July 8
Hātur	Nov. 10	Masrī	August 7
Kihak	Dec. 10	Complementary days ...	Sept. 6–11
	A.D. 1923.	Year 1640.	
Tubah	Jan. 9	Tūt	Sept. 12
Amshīr	Feb. 8	Bābah	Oct. 12
Barmahāt ...	March 10	Hātur	Nov. 11
Barmūdah ...	April 9	Kihak	Dec. 11
Bashuns	May 9		

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyu-ga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1922 A.D. is, therefore, the year 1979 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1922 A.D. is 1844 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned

from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Japanese and Chinese.—Japan in 1872 and the Chinese Republic in 1912 adopted the calendar of Western Europe.

Jewish.—In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1923 A.D. is *Annus Mundi* 5683–4 in the Jewish Calendar. A calendar for 5683–5684 is appended:—

(A.M. 5683 and part of A.M. 5684.)

			A.D. 1922.

Note.—All Jewish Sabbaths and Festivals begin the previous evening at Sunset.

Macedonian.—The epoch was the occupation of Babylon by Seleucus Nicator in 311 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

Muhammadan.—The Muhammadan Epoch is the Hijira (Flight of Muhammad) from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadan Era corresponds to 16th July, 622 A.D. The year 1922 is therefore 1340–1 of the Hijira, a calendar for which year is appended:—

Year of Hijira		A.D. 1922.
1341.		
Muharram		August 24
Saphar		September 23
Rabia I.		October 22
Rabia II.		November 21
Jomada I.		December 20

Dulheggia		July 15
1342.		
Muharram		August 14
Saphar		September 13
Rabia I.		October 12
Rabia II.		November 11
Jomada I		December 10

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1922 is, therefore, 1291 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which they signified by the abbreviation A.U.C., *Anno Urbis Conditæ* (In the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution; it was revised and reformed in 46 B.C. by Julius Cæsar, who added months named "Julius" and "Augustus" before the former *seventh* month, and thus caused *Septem-* *Octo-*, *Novem-* and *Decem*ber to become the 9th, 10th, 11th and 12th months. It remained unchanged in the British Dominions until the year 1752 A.D. (See "Old and New Style," *post.*) In the Roman (Julian) Calendar the days of the month were not counted onward from the beginning, as with us, but three fixed points were taken, and the intervening days were said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and (3) the Ides, which always fell eight days after the Nones. After the Ides the days were reckoned as being so many "before the Kalends of the next month" or *ante-diem—Kalendas*, the last day being called the day before the Kalends of the next month, thus Dec. 31 would have been *Pridie Kalendas Januarias*.

CHRONOLOGICAL TERMS.

The *Day, Week and Month.*—Measurements of time are based on the time taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. As these motions are not exactly commensurable with one another, it has been necessary to adopt average or mean intervals of time for ordinary use. Of these the first is the *Day*, which commences at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are called 1 to 24 from midnight to midnight.

For the *Astronomical Day see* p. 101.

With the *Jews* and *Muhammadans* the day begins, not at midnight, but at sunset on the previous day, and the hours between sunset and midnight belong to the *succeeding* day in the Jewish and Muhammadan calendars.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the length of the different months varies as follows:—

January, March, May, July, August, October, and December have each 31 days.
April, June, September, and November have each 30 days.
February has 28 days, except in leap year, when it has 29 days.

The *Jews* and *Muhammadans* use the *Lunar Month*, based on the length of time that the moon takes to revolve round the earth. The month commences, not at true new moon, but at sunset of the day when the new moon is first seen after sunset. The length of the lunar month varies, and the Jewish and Muhammadan months have sometimes 30 and sometimes 29 days.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, which is 365·2422 mean days. The *Calendar Year* consists of 365 days, but every year the date of which is divisible by 4, without remainder, is *Leap Year* and consists of 366 days, except the last year of each century that is not divisible by 400 without remainder (*e.g.* the years 1800 and 1900 had only 365 days). The extra day in every fourth year was added by Julius Cæsar in order to reconcile the Tropical and Calendar years, and four Julian years thus contained 1461 days. There was therefore an error amounting to 3·12 days in 400 years, which was partly remedied by the omission of 3 days in every 400 years under the reform of 1582 (*see* "Old and New Style" *post*).

The *Muhammadan* year always consists of twelve lunar months, and is sometimes 354 and sometimes 355 days in length.

Old and New Style.—Towards the close of the 16th century there was a difference of 10 days between the tropical and calendar years (*see above*). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that only every fourth (instead of every) end-century year should be a leap year. This change was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This "Gregorian" Calendar was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1917, and by Yugo-Slavia and Rumania in 1919. The *difference* between the Old and New Styles since 1900 is 13 days (11 days after 1700, 12 days after 1800 and 13 days after 1900).

New Year's Day.—The Civil year in the British Dominions (exclusive of *Scotland*) commenced with March 25, "Lady Day" or "The Feast of the Annunciation," until 1751. But on and from 1752 the civil year has commenced with Jan. 1. The Old Style reckoning is still maintained to some extent by the British Treasury, and certain dividends are payable at the Bank of England on the Old Style Quarter Days, while the "Financial Year" is still reckoned as commencing on "Old Lady Day," April 5. *Scotland* in 1600 changed New Year's Day from Mar. 25 to Jan. 1. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1725, Tuscany 1751.

Golden Number, so called from its importance in calculating the date of Easter, is the number of any year in a lunar cycle of nineteen years. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

Easter Day is the first Sunday after the *Paschal Full Moon* (*i.e.*, the full moon which happens upon, or next after, March 21; if that full moon occurs on a Sunday, Easter Day is the Sunday after). A bill was introduced in Parliament in 1921 to regulate the date of Easter, and under this regulation Easter Day would fall each year on the second Sunday in April.

Epact.—The age of the Moon at the commencement of the year, thus indicating the difference between the solar and lunar cycles.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period.—"A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting of the product of the number of years in the solar and lunar cycles and the cycle of the indiction ($28 \times 19 \times 15$)."—*New English Dictionary.*

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

CHRONOLOGICAL LANDMARKS.

B.C.

430 Anglo-Saxon raids into Britain.
432 St. Patrick landed in Ireland.
439 Carthage captured by Vandals.
451 Attila defeated by Aëtius.
455 Rome sacked by the Vandals.
493 Theodoric (Ostrogoth) became King of Italy.
500 Welch defeated Saxons at Mt. Badon.
544 Scythian invasion of India
553 Italy reconquered by Justinian.
565 North Italy conquered by Lombards.
570 Birth of Muhammad.
577 Saxons defeated Welch at Deorham.
596 St Augustine landed in England.
613 Anglo-Saxons defeated Welch at Chester.
616 Persian conquest of Egypt.
622 The Hjira, or Flight of Muhammad.
634 Syria conquered by Omar.
638 Jerusalem occupied by Omar.
640 Alexandrian Library destroyed.
643 Othman became Caliph.
650 Saracen conquest of North Africa.
693 The Laws of Ine promulgated.
711 Saracens invaded Spain from Africa.
732 Charles Martel defeated Saracens.
735 Death of Bede, Anglo-Saxon chronicler.
741 Death of Charles Martel.
778 Offa's Dyke built, Dee to Wye.
800 Charlemagne became Emperor of the West.
802 Egbert became King of Wessex.
865 Danish invasions of England.
878 Alfred's treaty with Guthrum the Dane.
912 Rolf the Northman invaded France.
935 Algiers founded by Muhammadan Arabs.
962 Otto I. of Germany Western Emperor.
969 Cairo founded by the Saracens.
982 Renewal of Danish invasions
991 First payment of Gafol (Danegeld).
1000 Viking voyages to North America.
1000 Norway conquered by Danes.
1011 Canterbury sacked by Danes.
1014 Scandinavians defeated at Clontarf.
1018 Lothians conquered by Scots.
1057 King Duncan murdered by Macbeth.
1065 Westminster Abbey dedicated.
1066 The Norman Conquest of England.
1086 Domesday Book completed.
1095 The First Crusade.

1099 Godfrey de Bouillon captured Jerusalem.
1147 The Second Crusade.
1169 Saladin became Sultan of Egypt.
1172 Henry II. landed in Ireland.
1187 Saladin captured Jerusalem.
1189 The Third Crusade.
1190 Death of Frederick Barbarossa.
1202 The Fourth Crusade.
1204 Capture of Constantinople by Latins.
1206 Muhammadan State founded at Delhi.
1212 The Fifth (Children's) Crusade.
1214 Peking captured by Jenghiz Khan.
1215 Magna Carta signed at Runnimede.
1219 Mongol invasion of India.
1228 Sixth Crusade and capture of Jerusalem.
1240 Mongolian conquest of Russia.
1244 Jerusalem captured by Mongols.
1249 Oxford University founded.
1250 Mameluke conquest of Egypt.
1258 Baghdad destroyed by Hulagu Khan.
1261 Constantinople recaptured by Greeks.
1265 First representative Parliament in England
1271 Travels of Marco Polo.
1284 Cambridge University founded.
1293 Death of Roger Bacon.
1300 Inca rule established in Peru.
1305 Removal of Papacy to Avignon.
1308 Death of Duns Scotus.
1321 Death of Dante.
1324 Death of Marco Polo.
1346 Battle of Cressy.
1348 The Black Death in Europe.
1348 Jacquerie movement in France.
1374 Death of Petrarch.
1375 Death of Boccaccio.
1377 Return of Papacy to Rome.
1378 Popes at Rome and at Avignon.
1381 Popular revolt in England (Wat Tyler)
1384 Death of Wycliffe.
1398 Tamurlane captured Delhi.
1400 Aztec rule established in Mexico.
1400 Death of Geoffrey Chaucer.
1410 Dawn of the Renaissance in Italy.
1411 University of St. Andrews founded.
1415 Huss burnt at Constance.
1415 Battle of Agincourt.
1431 Joan of Arc burnt at Rouen.
1445 Cape Verde discovered by Portuguese.
1446 Books printed at Haarlem.
1450 University of Glasgow founded.
1453 Constantinople captured by Turks.
1455 Wars of the Roses in England.
1462 The Bible first printed at Mentz.
1468 Death of Gutenberg.
1471 Caxton set up his printing press.
1486 Diaz sailed round Cape of Good Hope.
1492 Columbus discovered "West Indies."
1492 Vasco da Gama's voyage to India.
1494 University of Aberdeen founded.
1497 Cabot discovered Newfoundland.
1498 Death of Savonarola.
1499 Independence of Switzerland established.
1499 Ojeda discovered Venezuela.
1500 Portuguese landed in Brazil.
1500 Death of Bartholomew Diaz.
1506 Death of Columbus.

1922 Irish Free State inaugurated.
1922 London "Reparations" Conference.
1922 Turkish reconquest of Smyrna.
1922 Abdication of King Constantine.
1922 Fall of British Coalition Ministry

METEOROLOGICAL NOTES AND RECORDS.

BRITISH ISLANDS: The *maximum temperature* of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The *lowest temperature* of the air recorded in the shade at 4 feet above the ground is −22° Fahr., or 54° below freezing point, at Blackadder, Berwickshire, on Jan. 17, 1881.

The *greatest rainfall* in a day was at Bruton, Somerset, when 9·56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The *total rainfall* for a year at Stations in the British Islands during the 20 years 1884 to 1903 ranged from 240·05 inches at the summit of Ben Nevis in 1898 to 12·01 inches at Chatteris, Cambs, in 1884.

The *maximum wind-velocity* on record in the British Islands was recorded at Quilty, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

GENERAL: The *maximum temperature* on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The *wettest station* in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 551½ inches. From June 12 to 16, 1876, 114·14 inches was collected, or an average daily fall of 22·83 inches. On one of these days, June 14, 40·80 inches fell in 24 hours.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926¼ English miles, and at the Poles 7,900 English miles. The Equatorial *Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	400,000,000
Asia	17,000,000	910,000,000
Africa	11,500,000	180,000,000
North America	8,000,000	120,000,000
South America	6,800,000	38,000,000
Oceania	3,450,000	8,000,000
Polar Regions	5,000,000	...
	55,500,000	1,656,000,000

The British Dominions extend over the largest area (14,220,000 sq. miles); Russia is the second largest country (8,400,000 sq. miles); France is third, with 4,336,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area.	Estimated Number.
Mongolian	Asia	665,000,000
Caucasian	Europe & Orient	645,000,000
Negro	Africa	190,000,000
Semitic	North Africa	81,000,000
Malayan	Australasia	52,000,000
Red Indian	America	23,000,000
		1,656,000,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere*, of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*, of the Races of Mankind *Ethnology*, of their location *Ethnography*, of extinct organic life *Palæontology*, and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 105 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901·8 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (584,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2100, at the present rate of increase.

THE LARGEST CITIES.

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Oceans.		
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Seas.		
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	*Pola* Deep, 12,276
Behring	878,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	*about* 10,500
Hudson Bay	472,000	*about* 1,500
Japan	405,000	*about* 10,200
Andaman	305,000	*about* 11,000
North Sea	221,000	Skaggerak, 1,998
Red Sea	178,000	20° N., 7,254
Baltic	158,000	*about* 12,000

THE HIGHEST MOUNTAINS.

Name.	Range.	Height in Feet.
Everest	Himalayas	29,002
Godwin-Austen (K 2)	,,	28,250
Kanchanganga I.	,,	28,146
,, II.	,,	27,803
Makalu	,,	27,790

THE SEVEN WONDERS.

The *Seven Wonders of the World* are generally enumerated as follows:—

*The Pyramids.
The Hanging Gardens of Babylon.
*The Tomb of Mausolus.
*The Temple of Diana at Ephesus.
The Colossus of Rhodes.
The Statue of Jupiter by Phidias.
The Pharos (lighthouse) of Alexandria.

* The Pyramids may be visited from Cairo. The "Ephesus" Room at the British Museum, Bloomsbury, contains the remains of the Temple of Artemis (Diana) at Ephesus (the Temple of "Diana of the Ephesians" of Acts xix. 28); the "Mausoleum" Room at the British Museum contains the remains of the tomb built at Halicarnassus for Mausolus, in the 4th century B.C.

A considerable number of vessels, which are not yet completed, appear in the Register Book and are therefore included in this Table.
Steamers of less than 100 tons gross, and Sailing vessels of less than 100 tons net, are not included.
Vessels trading on the Caspian Sea, and *Wood* vessels trading on the Great Lakes of North America, are not included.
Japanese Sailing vessels are not recorded in Lloyd's Register Book and therefore do not appear in this Table.

The League of Nations.

ONE of the results of the War of 1914–1918 was the formation of a League of Nations, with a Covenant, and a Charter of XXVI Articles.

The High Contracting Parties agreed to the Covenant in order to promote International Co-operation and to achieve International Peace and Security, by the acceptance of obligations not to resort to War

"by the prescription of open, just and honourable relations between Nations;

by the firm establishment of the understandings of International Law as the actual rule of conduct among Governments;

and by the maintenance of justice and a scrupulous regard for all Treaty Obligations in the dealings of Organized Peoples with one another."

The territorial integrity and existing political independence of all members of the League is guaranteed by Article X of the Covenant. In case of any dispute between members, likely to lead to a rupture, they will submit the matter to arbitration or enquiry, and agree not to resort to war until three months after the award by the arbitrator or the report by the Council, such award to be made within a reasonable time, and such report to be made within six months of the submission of the matter in dispute. Any member resorting to war in disregard of these rules shall be deemed to have committed an act of war against all the remaining members of the League, who undertake to subject the aggressor to the severance of all intercourse and trade or financial relations, while the Council of the League shall recommend to the Governments concerned what effective force shall be contributed by each to protect the covenants of the League.

In the event of a dispute between a member of the League and a State which is not a member (or between States that are not members) invitation shall be made to the State or States that are not members to accept membership, with its privileges and obligations. If the invitation be refused, and the State that is not a member resort to war against a member of the League, such State shall be deemed to have made war on every member of the League and shall be so dealt with. If the invitation be refused by States that are not members, the Council shall take such steps as may be possible to avert hostilities and to settle the dispute.

Article XXIII provides for securing fair and humane conditions of labour for men, women and children in the countries of members, and in those in which members have commercial and industrial relations, and provides for the just treatment of natives; for the suppression of the "White Slave" traffic; for the supervision of the traffic in opium and dangerous drugs, and in arms and ammunition; for the freedom of communications and trade between members, and for the prevention and control of disease.

The formation of the League was very largely the work of Woodrow Wilson, President of the United States of America 1913–21, but his action in committing the United States to participation in the League was repudiated by the Foreign Relations Committee of the Senate of the U.S. and was not endorsed by the electors in the Presidential Election of 1920.

The *Council of the League* consists of representatives of the British Dominions, France, Italy and Japan, together with representatives of four other members of the League selected by the Assembly of Representatives of the members of the League. Any member of the League not represented on the Council shall be invited to send a representative to sit as a member of the Council during the consideration of matters specially affecting the interests of that member of the League.

The original members of the League were the Signatories of the Treaty of Peace at Versailles on behalf of the Allies, June 28, 1919, such signatories being indicated by an asterisk (*) in the following list, but the *United States, Ecuador* and *The Hejaz* (whose representatives signed the Treaty) did not send delegates to Geneva.

The following Nations were represented at the *First Assembly of the League of Nations* at Geneva, Dec., 1920.

Argentina	*Guatemala	*Poland
*Australia	*Haiti	*Portugal
*Belgium	*Honduras	*Rumania
*Bolivia	*India	Salvador
*Brazil	*Italy	*Siam
*Canada	*Japan	Spain
Chile	*Liberia	Sweden
*China	Netherlands	Switzerland
Colombia	*New Zealand	*Union of South Africa
*Cuba	*Nicaragua	
*Czecho Slovakia	Norway	*United Kingdom
Denmark	*Panama	*Uruguay
*France	Paraguay	Venezuela
*Greece	Persia	*Yugo-Slavia
	*Peru	

The following Nations have since been admitted:—

Albania	Costa Rica	Latvia
Austria	Esthonia	Lithuania
Bulgaria	Finland	Luxemburg

Any fully self-governing State, Dominion or Colony, not named as an Original Member, may become a member of the League if its admission is agreed to by two-thirds of the Assembly.

Any member of the League may, after two years' notice of its intention to do so, withdraw from the League, provided that all its international obligations, and all its obligations under the Covenant, shall have been fulfilled at the time of its withdrawal.

In July 1922 the League had a membership of 51 States. The budget of the League estimates the expenditure for 1922 at 20,873,945 *gold francs* (at par of exchange £822,730), recoverable from the Nations in agreed proportions.

Members of the Council, Paul Hymans (*Belgium*), Gastao da Cunha (*Brazil*), Wellington Koo (*China*), Léon Bourgeois (*France*), The Earl of Balfour (*Gt. Britain*), The Marquis Imperiali (*Italy*), Viscount K. Ishii (*Japan*), Quinones de Leon (*Spain*).

Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (*and entertainment allowance* £6,000) £4,000

Deputy Secretary-General, Jean Monnet.

Financial Director, Sir Herbert B. Ames, LL.D.

Director, International Labour Office, M. Albert Thomas.

London Office, Trafalgar House, Waterloo Place, S.W. 1.

LEAGUE OF NATIONS UNION, 15, Grosvenor Crescent, S.W. 1.—*President*, Viscount Grey of Fallodon, K.G.; *General Sec.*, J. C. Maxwell Garnett.

NOTES.—† Died in office. § Assassinated. (*a*) Elected as Vice-President.

The Family of King George III.

GEORGE III. was the eldest son of Frederick, Prince of Wales (eldest son of George II.) and of Princess Augusta (youngest daughter of Frederick, Duke of Saxe-Coburg-Gotha). His Majesty was *born* at Norfolk House, St. James's Square, June 4, 1738; *succeeded* to the Throne Oct. 25, 1760; *married* Princess Charlotte (daughter of Charles, Duke of Mecklenberg-Strelitz); and was *crowned* with her on Sept. 22, 1761. The government was carried on, from Feb. 5, 1811, until the death of King George III., by his eldest son George, under the title of *Prince Regent*. King George III. *died* at Windsor, Jan. 29, 1820, his issue being :—

1. GEORGE IV. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline of Brunswick, succeeded to the Throne, Jan. 29, 1820, and died without surviving issue June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica of Prussia, was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. WILLIAM IV. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne, June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, who succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. KING OF HANOVER. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenberg-Strelitz), succeeded as King of Hanover June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851.

9. Augustus, *Duke of Sussex*, born Jan 27, 1773, died without succession April 24, 1843.

10. Adolphus, *Duke of Cambridge*, born Feb. 24, 1774, married Princess Augusta (daughter of Frederick, Landgrave of Hesse), *see* below.

11. Mary, born April 25, 1776, married William Frederick, *Duke of Gloucester*, died without issue April 30, 1857.

12. Sophia, born Nov. 3, 1777, died unmarried May 27, 1848.

13. Octavius, born Feb. 23, 1779, died May 3, 1783.

14. Alfred, born Sept. 22, 1780, died Aug. 26, 1782.

15. Amelia, born Aug. 7, 1783, died unmarried Nov. 2, 1810.

DESCENDANTS OF H.R.H. ADOLPHUS, DUKE OF CAMBRIDGE, born Feb 24, 1774, died July 8, 1850.

1. H.R.H. Prince George, *Duke of Cambridge*, born March 26, 1819, Field-Marshal, Commander-in-Chief of the British Army, 1856–1895, died without succession March 17, 1904.

Surgeons in Ordinary, Edgar Seymour, M.V.O., M.B.; D. C. Rice Oxley, M.C., M.B.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations, which were adopted by the House of Commons:—

Their Majesties' Privy Purse	£110,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Princess Christian	6,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,200	Duchess of Albany	6,000
Unappropriated	8,000	Princess Beatrice	6,000
		King Edward VII.'s Daughters	18,000
	£470,000		

The Peerage.

In a broad sense this heading is commonly taken as identical with that of the House of Lords, although there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the House of Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed : a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

Contractions.—*S.* or *I.* appended to the date of creation denotes a *Scottish* or *Irish* title ; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords. For the mark ◦ see heading to Marquesses ; *b.*, signifies born ; *s.*, succeeded ; *m.*, married ; *w.*, widower or widow ; *div.*, divorced ; *M.*, minor.

COMPLETE LIST OF THE PEERS.

ROYAL DUKES (3).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

		Eldest Son or Heir.
1337	*Cornwall*, Edward, Prince of Wales, Duke of Cornwall (1337), Scottish Duke of Rothesay (1398). K.G., *b.* 1894, *s.* 1910 (*see* p. 125)	(None)

Usher of the Black Rod, Samuel Murray Power, C.B.

THE ORDER OF MERIT (1902)—O.M.

Ribbon, Blue and Crimson.

O.M.Civ. O.M.Mil.

This Order confers no precedence, but authorises the holders to place its designating initials next after those denoting membership of Grand Cross of the Order of the Bath. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

Military Members.

Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B., G.C.V.O.

Field-Marshal Rt. Hon. Earl of Ypres, K.P., G.C.B., G.C.V.O.

Admiral of the Fleet Rt. Hon. Viscount Jellicoe, G.C.B., G.C.V.O.

Field-Marshal Rt. Hon. Earl Haig, K.T., G.C.B., G.C.V.O., K.C.I.E.

Admiral of the Fleet Rt. Hon. Earl Beatty, G.C.B., G.C.V.O., D.S.O.

Civil Members.

Rt. Hon. Viscount Morley of Blackburn, F.R.S.

Thomas Hardy, Litt.D., LL.D.

Rt. Hon. Sir George Otto Trevelyan, Bart.

Sir Edward Elgar, Mus. Doc.

Sir Joseph John Thomson, F.R.S.

Sir Archibald Geikie, K.C.B., F.R.S.

Rt. Hon. Viscount Haldane, K.T.

Rt. Hon. Earl of Balfour, K.G.

Rt. Hon. David Lloyd George.

Sir James Matthew Barrie, Bart., LL.D.

Honorary Members.

Admiral Count Togo.

Field-Marshal (Marshal of France) Ferdinand Foch.

Marshal Joseph Jacques Césaire Joffre, G.C.B.

Secretary and Registrar, Col. Hon. Sir Henry Charles Legge, G.C.V.O.

G.C.V.O. K.C.V.O.

THE MOST EXCELLENT ORDER OF THE BRITISH EMPIRE (1917).

Ribbon, Purple (Civil Division); Purple, with Red Centre Stripe (Military Division).

The Sovereign; *Grand Master*, H.R.H. the Prince of Wales; *Prelate*, Rt. Rev. the Bishop of London; *King of Arms*, Gen. Rt. Hon. Sir Arthur H. F. Paget, G.C.B., K.C.V.O.; *Registrar*, The Comptroller of the Lord Chamberlain's Dept. (*ex officio*); *Secretary*, The Permanent Under-Sec. of State for Home Dept. (*ex officio*); *Gentleman Usher of the Purple Rod*, Sir Frederic G. Kenyon, K.C.B. For services rendered to the Empire, whether at home or abroad, open to both men and women. G.B.E., Knights Grand Cross or Dames Grand Cross; K.B.E., Knights Commanders; D.B.E., Dames Commanders; C.B.E., Commanders; O.B.E., Officers; M.B.E., Members. The Order was divided into *Military* and *Civil* divisions in Dec., 1918.

THE KNIGHTS BACHELOR.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*Principal*, Sir Henry Pellatt, Kt., C.V.O.; *Vice-Principal*, Sir William Bull, Kt., M.P.; *Hon. Registrar*, Sir Park Goff, M.P.; *Clerk*, H. Whelbourn; *Registry and Library*, 2 Mitre Court, Temple, E.C. 4.

ORDER OF THE COMPANIONS OF HONOUR (1917)—C.H.

Ribbon, Carmine, with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire, *i.e.*, Kts. Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon, Red, with Blue Edges.

Bestowed in recognition of especial services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Ribbon, Crimson, with Blue Centre.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the Sovereign, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (100 European and 100 Indian) and 250 to the services of Dominions, Colonies and Protectorates.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Ribbon, White Moiré.

Instituted in 1862, and enlarged in 1864, 1865, and 1880, but no fresh conferments are now made.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1878. *Ribbon*, Light Blue, with White Edges.

Knights Grand Cross, Knights Grand Commanders, and Knights Commanders

OF THE BATH, STAR OF INDIA, ST. MICHAEL AND ST. GEORGE. INDIAN EMPIRE, ROYAL VICTORIAN ORDER AND KNIGHTS AND DAMES OF THE BRITISH EMPIRE.

*Precedency in Great Britain and Ireland.

The Sovereign.
The Prince of Wales.
Younger Sons of the Sovereign.
Grandsons of the Sovereign.
Sovereign's Brothers.
Sovereign's Uncles
Sovereign's Nephews.
Ambassadors.
Archbishop of Canterbury.
Lord High Chancellor.
Archbishop of York.
Prime Minister.
Lord Chancellor of Ireland.
Lord President of the Council.
Speaker of the House of Commons.
Lord Privy Seal (if of Baronial rank).
Five following State Officers if Dukes:
(1) Lord Great Chamberlain (on duty)
(2) Earl Marshal.
(3) Lord Steward.
(4) Lord Chamberlain.
(5) The Master of the Horse.
Dukes, according to their Patents of Creation:
1. Of England; 2. Of Scotland; 3. Of Great Britain; 4. Of Ireland;
5. Those created since the Union.
Eldest sons of Dukes of Blood Royal.
Five above State Officers if Marquesses.
Marquesses, in same order as Dukes.
Dukes' eldest Sons.
Five above State Officers if Earls.
Earls, in same order as Dukes.
Younger sons of Dukes of Blood Royal.
Marquesses' eldest Sons.
Dukes' younger Sons.
Five above State Officers if Viscounts.
Viscounts, in same order as Dukes.
Earls' eldest Sons.
Marquesses' younger Sons.
Bishops of London, Durham and Winchester.
All other English Bishops, according to their seniority of Consecration.
Five above State Officers if Barons.
Secretaries of State, if of the degree of a Baron.
Barons, in same order as Dukes.
Treasurer of H.M.'s Household.
Comptroller of H.M.'s Household.
Vice-Chamberlain of Household.
Secretaries of State under the degree of Baron.
Viscounts' eldest Sons.
Earls' younger Sons.
Barons' eldest Sons.
Knights of the Garter if Commoners.
Privy Councillors if of no higher rank.
Chancellor of the Exchequer.
Chancellor of the Duchy of Lancaster.
Lord Chief Justice of England.
Master of the Rolls.
The Lords Justices of Appeal and President of the Probate Court.
Judges of the High Court.
Viscounts' younger Sons.
Barons' younger Sons.
Sons of Life Peers.
Baronets of either Kingdom, according to date of Patents.
Knights Grand Cross of the Bath.
G.C.S.I.; G.C.M.G.; G.C.I.E.; G.C.V.O.; G.B.E.
Knights Commanders of the above Orders.
Knights Bachelor.
Judges of County Courts and Judges of the City of London Court.
Serjeants at law.
Masters in Lunacy.
C.B.; C.S.I.; C.M.G.; C.I.E.; C.V.O.; C.B.E.; D.S.O.; M.V.O.(4th); O.B.E.; I.S.O.
Eldest Sons of younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights in order of their Fathers.
M.V.O.(5th); M.B.E.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military, and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.*

Local Precedency. — No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first after him the Aldermen, Sheriffs, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For taller tables (and for *Scottish and Irish Precedency*) see Introduction to "Whitaker's Peerage, Baronetage, Knightage and Companionage," a companion volume, price 25s. net.

Welch Sovereigns and Princes.

Wales was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welch chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

Independent Princes, A.D. 840 to 1282.	
Roderick the Great	840
Anarawd, son of Roderick	877
Howel Dda, the Good	942
Jefan and Jago	948
Howel ap Jefan, the Bad	972
Cadwallon, his brother	984

The Distinguished Service Cross.—1914.—D.S.C.—In substitution for the Conspicuous Service Cross, 1901: is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander.

The Military Cross.—1915.—M.C.—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross.—1918.—D.F.C.—Designed for bestowal upon officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross.—1918.—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

The Military Medal.—1916.—M.M.—Awarded to non-commissioned officers and men for individual or associated acts of bravery in the Field. In exceptional circumstances the Medal may be awarded to women of all nations.

The Distinguished Service Medal.—1914.—D.S.M.—Is designed for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A., and to all other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war.

The Distinguished Flying Medal.—1918.—D.F.M.—and the **Air Force Medal**, for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

The Conspicuous Gallantry Medal. — C.G.M. — Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

The Volunteer Officers' Decoration. — V.D.—Was an honour for rewarding the meritorious services of officers of the force in question, who must have been in commission and have served twenty years.

The Territorial Decoration. — T.D. — Established in 1908; is restricted to commissioned officers of twenty years' good service in the Territorial Force, and not holders of the Volunteer Decoration. Similarly a **Territorial Long Service Medal** has been substituted for that formerly awarded to Volunteers.

The Royal Red Cross—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Order of Mercy.—Both sexes; was established in 1899 in connexion with the **League of Mercy**, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

The Indian Order of Merit.—Instituted in 1837, as a reward for personal bravery, to Indian officers and men.

The Kaiser-i-Hind Medal.—Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

The Albert Medal.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on Land."

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1905 the office of Prime Minister was officially recognised. The first mention of a King's Secretary of State is under Henry III. In 1433, owing to press of work in France, two Secretaries were appointed, and until 1794 two seems to have been the normal number. From 1688 to 1782 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home, Irish, and Colonial business. In

1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed, and in 1918 the Royal Air Force was constituted, with a Secretary of State as President of the Air Council.

*** **All the above vacate office on a change of Government.**

CABINET MINISTERS PENSIONS.—Former Cabinet Ministers in receipt of political pensions are:—Lord George Hamilton (£2,000 *per annum*) and Viscount Chaplin (£1,200 *per annum*). Pensions were granted to the following Ministers, but have been resigned by them: Rt. Hon. J. A. Pease, now Lord Gainford (£1,200 *per annum*) and Rt. Hon. G. W. Balfour (£1,200 *per annum*).

THE constitution of the Government which went to the country at the General Election in December 1918, was as under:

War Cabinet (Dec. 1918).

Prime Minister and First Lord of the Treasury, D. Lloyd George, M.P.
Lord President of the Council and Leader of the House of Lords, Earl Curzon.
Chancellor of the Exchequer and Leader of the House of Commons, A. Bonar Law, M.P.
Ministers without portfolio, G. N. Barnes, M.P.; Lieut.-Gen. J. C. Smuts; A. Chamberlain, M.P.

Other Ministers.

Lord High Chancellor, Lord Finlay.
Lord Privy Seal, Earl of Crawford.
Foreign Office, A. J. Balfour, M.P.
Home Office, Sir George Cave, M.P.
Colonial Office, W. Long, M.P.
War Office, Visct. Milner.
India Office, E. S. Montagu, M.P.
Air Dept., Lord Weir.
Ministry of Munitions, W. S. Churchill, M.P.
First Lord of the Admiralty, Sir E. Geddes, M.P.
Minister of Blockade, Sir L. Worthington Evans, M.P.
Local Government Board, Sir A. Stanley, M.P.
National Service, Sir Auckland Geddes, M.P.
Minister of Reconstruction, Dr. C. Addison, M.P.
Minister of Labour, G. H. Roberts, M.P.
Minister of Food, J. R. Clynes, M.P.
Minister of Shipping, Sir J. P. Maclay.
Board of Agriculture, R. E. Prothero, M.P.
Board of Education, H. A. L. Fisher, M.P.
Office of Works, Sir A. Mond, M.P.
Chancellor of the Duchy of Lancaster, Lord Downham.
Director War Trade Department, Lord Emmott.
Postmaster-General, A. H. Illingworth, M.P.
Minister of Pensions, John Hodge, M.P.
Secretary for Scotland, R. Munro, M.P.
Secretary for Ireland, E. Shortt, M.P.

General Election 1918.

The new Ministry contained several changes, and was as follows:

War Cabinet.

Prime Minister and First Lord of the Treasury, D. Lloyd George, M.P.
Lord President of the Council and Leader of the House of Lords, Earl Curzon.
Lord Privy Seal and Leader of the House of Commons, A. Bonar Law, M.P.
Chancellor of the Exchequer, A. Chamberlain, M.P.
Ministers without Portfolio, G. N. Barnes, M.P., and Lt.-Gen. J. C. Smuts.

Other Ministers.

Lord Chancellor, Lord Birkenhead.
Minister without Portfolio, Sir E. Geddes, M.P.
Home Office, E. Shortt, K.C., M.P.
Foreign Office, A. J. Balfour, M.P.
Colonial Office, Viscount Milner.
War Office and Air Ministry, W. S. Churchill, M.P.
India Office, E. S. Montagu, M.P.
Admiralty, W. Long, M.P.
Board of Trade, Sir A. Stanley, M.P.
Local Government Board, Dr. Addison, M.P.
Board of Agriculture, Lord Ernle.
Board of Education, H. A. L. Fisher, M.P.
Ministry of Munitions, Lord Inverforth.
Ministry of Food, G. H. Roberts, M.P.
Ministry of Shipping, Sir J. P. Maclay.
Ministry of Labour, Sir R. Horne, M.P.
Ministry of Pensions, Sir L. Worthington Evans, M.P.
Ministry of National Service and Reconstruction, Sir A. Geddes, M.P.
Secretary for Scotland, R. Munro, K.C., M.P.
Chief Secretary for Ireland, J. I. Macpherson, M.P.
Chancellor of the Duchy of Lancaster, Earl of Crawford.
First Commissioner of Works, Sir A. Mond, M.P.

In October, 1919, ten months after the General Election, the "Standing Committee of Home Affairs" and the "War Cabinet" were dissolved, and a full Cabinet of some 20 members was reconstituted. The Cabinet as reconstituted in October, 1919:

Prime Minister and First Lord of the Treasury, D. Lloyd George, M.P.
Lord Chancellor, Lord Birkenhead.
Lord Privy Seal and Leader of the House of Commons, A. Bonar Law, M.P.
Chancellor of the Exchequer, A. Chamberlain, M.P.,
Lord President of the Council, A. J. Balfour, M.P.
Minister without Portfolio, G. N. Barnes, M.P.
Home Office, E. Shortt, M.P.
Foreign Office, Earl Curzon.
Colonial Office, Viscount Milner.
War Office and Air Ministry, Winston Churchill, M.P.
India Office, E. S. Montagu, M.P.
Admiralty, W. Long, M.P.
Board of Trade, Sir A. Geddes, M.P.
Ministry of Health, Dr. Addison, M.P.
Board of Agriculture, Lord Lee.
Board of Education, H. A. L. Fisher, M.P.
Ministry of Labour, Sir R. Horne, M.P.
Ministry of Transport, Sir E. Geddes, M.P.
Secretary for Scotland, R. Munro, K.C., M.P.
Chief Secretary for Ireland, J. I. Macpherson, M.P.

In March, 1921, Mr. Bonar Law, on account of a complete breakdown in his health, resigned his office as Lord Privy Seal and Leader of the House of Commons, and was succeeded by Mr. Austen Chamberlain, whose position as Chancellor of the Exchequer was filled by the appointment of Sir Robert Horne. The post of Minister of Labour had, in the meantime, gone to Dr. T. J. Macnamara. On Mr. Long being made a Peer in 1921, his vacated office of First Lord of the Admiralty was filled by the appointment of Lord Lee, who was succeeded as President of the Board of Agriculture by Sir A. G. Boscawen. In April, 1921, Dr. Addison left the office of Minister of Health, and was followed by Sir A. Mond, and in the same year Sir Eric Geddes vacated the office of Minister of Transport. Viscount Peel succeeded Mr. Montagu as Secretary for India. On Viscount Milner relinquishing the post of Secretary of State for the Colonies in February, 1921, Mr. Winston Churchill left the War Office to succeed him, and the War Office appointment went to Sir L. Worthington Evans. In April, 1920, Mr. Macpherson left the Chief Secretaryship for Ireland to become Minister of Pensions in succession to Sir L. Worthington Evans, and Sir Hamar Greenwood became Irish Secretary. These, and a few other minor changes, left the Cabinet which resigned on Oct. 19, 1922, composed as follows:

Prime Minister and First Lord of the Treasury, D. Lloyd George.
Lord Privy Seal and Leader of the House, A. Chamberlain.
Lord President of the Council, Earl of Balfour.

Lord Chancellor, Viscount Birkenhead.
Chancellor of the Exchequer, Sir R. Horne.
Home Office, E. Shortt.
Foreign Office, Marquess Curzon.
Colonial Office, Winston Churchill.
India Office, Viscount Peel.
War Office, Sir L. Worthington Evans
First Lord of the Admiralty, Lord Lee.
Board of Trade, Stanley Baldwin.
Ministry of Health, Sir A. Mond.
Board of Education, H. A. L. Fisher.
Board of Agriculture, Sir A. G. Boscawen.
Ministry of Labour, Dr. T. J. Macnamara.
Chief Secty. Ireland, Sir H. Greenwood.
Office of Works and Ministry of Transport, Earl of Crawford.

The Secretaryship for Scotland had been rendered vacant by the acceptance by Mr. Munro of the position of Lord Justice Clerk.

THE ELECTORATE.

Owing to the reduction in the Irish membership the electorate is smaller than at the General Election of 1918 by nearly 2,000,000. The following table shows the growth in the electorate through the extensions of the franchise under various Acts of Reform:

1832	(Men only)	1,000,000
1867	,,	2,500,000
1885	,,	5,000,000
1918	(Men and Women)	21,392,000

The latest official return for the United Kingdom (1920), showed the number of voters as under:

England and Wales	17,465,638
Scotland	2,306,996
Ireland	2,002,949
Total	21,775,583

A more recent return for England and Wales puts the number of voters at 17,657,723. The average population per member is:

England (Counties and Boroughs)	71,005
Wales (Counties and Boroughs)	72,099
England and Wales together	71,078
Scotland	66,852
Ireland	43,020

Votes recorded 1922.—Over 82 per cent. of the Electors and Electresses recorded their votes in Constituencies where the election was contested. The Electorate in such Constituencies numbered (approximately) 17,200,000, and nearly 14,110,000 votes were recorded.

PARLIAMENTARY MAJORITIES.

The Parliamentary majorities of recent Governments are shown below:

Year.		Majorities.
1895	Unionist	114
1892	Liberal	40
1895	Unionist	152
1900	Unionist	134
1906	Liberal	356
1910 (Jan.)	Liberal	124
1910 (Dec.)	Liberal	126
1918	Coalition	263
1922	Conservative	79

After the General Election of Dec., 1918, the state of parties was declared to be as follows:—

COALITION:		
Unionists	338	485
Liberals	137	
National Democratic Party	10	
NON-COALITION PARTIES:		
Labour	59	222
Unionists	48	
Liberals	26	
National Party	2	
Independents, &c	7	
Sinn Feiners	73	
Irish Nationalists	7	
Total returned		707
COALITION MAJORITY		263

The General Election of Nov. 15, 1922, resulted as under:—

GOVERNMENT:		
Conservative	347	
OPPOSITION:		
Labour	142	268
National Liberal	59	
Liberal	59	
Independent	5	
Nationalist	2	
Sinn Fein	1	
Total returned		615
CONSERVATIVE MAJORITY		79

DISSOLUTION HONOURS.

(Announced Nov. 11, 1922.)

To be Earls.

Evans, Sir E. V.
Jowett, Rev. Dr. J. H.

DISTRIBUTION OF SEATS
(After the Dissolution).

After the Dissolution of the Parliament elected in December, 1918, the number of Members was reduced from 707 to 615, through the decrease of Irish representation from 105 to 13 Members :—

England:			
London	62		
Boroughs	193	492	
Counties	230		
Universities	7		
Wales:			
Boroughs	11		
Counties	24	36	
University	1		
Scotland:			
Burghs	33		
Counties	38	74	
Universities	3		
Northern Ireland:			
Ulster	13	13	
Total			615

POLITICAL PARTIES.
(At the Dissolution.)

The following table shows the membership of the House of Commons by political allegiance, at the Dissolution of Parliament, Oct. 26, 1922 :—

Coalition Unionists	346
Ulster Unionists	22
Independent Unionists	9
Coalition Liberals	119
Independent Liberals	33
Labour Party	76
Coalition Labour	4
National Democratic Party	7
Independents	9
Sinn Fein	73
Nationalists	7
Speaker and Chairman	2
Total	707

The New House of Commons.

The fourth Parliament of King George V. and the *first Parliament of Great Britain and Northern Ireland* (the successor to the 31st Parliament of the United Kingdom) was elected on November 15, 1922, and met on November 20, 1922. The General Election had returned 347 Conservatives; 142 Labour; 59 Liberals; 59 National Liberals; 2 Nationalists; 1 Sinn Fein; and 5 Independents, distributed as shown in the following table :—

	Distribution of Members.				Party Strength (Nov. 20, 1922).		
	Counties.	Boroughs.	Universities.	Total Members.	Government	Opposition.	Majority.
England	230	255	7	452	315	177	+ 138
Wales	24	11	1	36	6	30	− 24
Scotland	38	33	3	74	15	59	− 44
Northern Ireland	4	8	1	13	11	2	+ 9
Total	296	307	12	615	347	268	+ 79

ALPHABETICAL LIST OF MEMBERS OF PARLIAMENT.

The following list gives Surname, Initials, Politics, Key Number of Seat on pp. 106–208, Name of Division, and Majority at Last Election of each of the 615 Members of Parliament.

C. = Conservative; *Lab.* = Labour; *N.L.* = National Liberal; *L.* = Liberal; Co-op. = Co-operative Movement Candidate; *Ind.* = Independent; *Agri.* = Farmers' Candidate; *N.D.P.* = National Democratic Party; *N.* = Nationalist; *Com.* = Communist; *S.F.* = Sinn Fein.

Do. (*Asst. Editor*), T. H. Parr .....£400 to £450

SECOND SESSION, 1921.

THE IRISH SETTLEMENT.—The shortest Session within modern times, and one of the most memorable in its results, was opened on *Dec.* 14, 1921, for the purpose of giving assent to the Articles of Agreement signed by the representatives of the Government and the Irish Delegation, by which it was hoped, as the King expressed it in his speech from the Throne, that "the strife of centuries may be ended, and that Ireland, as a free partner in the Commonwealth of Nations forming the British Empire, will secure the fulfilment of her national ideals." Three days later the Treaty was ratified by large majorities—by 166 to 47 in the House of Lords and by 401 to 58 in the House of Commons—and on *Dec.* 19 Parliament was prorogued. For so historic an occasion Viscount Morley emerged from his retirement and moved the Address in reply, which was seconded by Lord Dunraven, while in the other Chamber Sir Samuel Hoare and Mr. George Barnes respectively moved and seconded the Address. The Prime Minister on the opening day reviewed the Treaty and declared that the pledge that Ulster would not be coerced had been kept, announcing that the boundaries would be readjusted by a Commission. Ireland, he declared, would henceforth be able to take her partnership in the Empire, not only without loss of self-respect but with an accession of honour to herself and glory to her nation. The opposition was led in the Upper Chamber by Lord Carson, who denounced the proposals as treachery, and in the Commons, by Colonel Gretton, while support was afforded by Mr. Bonar Law, Mr. Asquith, Mr. Henderson, Mr. Churchill, Mr. Chamberlain and the Lord Chancellor, the amendments being defeated by the figures given above and the Address in each House agreed to.

SESSION, 1922.

THE KING'S SPEECH.—Accompanied by the Queen, the King on *Feb.* 7 opened the new Session in State, and in his Speech from the Throne outlined a legislative programme of comparatively small importance. The Treaties signed as a result of the Washington Conference for peace in the Pacific, and for relief from the burden of armaments were referred to with satisfaction, and on the subject of Ireland the King declared that the final establishment of the Irish Free State as a partner in the British Commonwealth was anxiously awaited throughout the world. With regard to the reductions in the public expenditure the Speech agreed that retrenchment upon so great a scale must involve hardship, but in a time of great industrial depression it was a necessity of the situation that economy should be practised by all, and in every direction. In the Upper Chamber the Earl of Pembroke moved and Lord Clwyd seconded the Address in reply, and after the rejection by 46 to 39 of an amendment moved by Lord Londonderry respecting the integrity of Northern Ireland this was agreed to on the following day. The Address in the Commons was moved by Capt. D. H. Hacking and seconded by Capt. Ernest Evans. Replying to the debate, the Prime Minister described the Washington Conference as one of the greatest achievements for peace in the history of the world, and said that the new Irish constitution would be framed by representatives of the Irish people themselves. Amendments on the subject of unemployment, the Geddes reports and unrest in India were rejected, and the Address was agreed to on *Feb.* 14.

THE IRISH TREATY.—Although the question of Ireland's new constitution was not reached during the first part of the Session, Parliament had to deal with the new situation created by the Treaty. On *Feb.* 9 Mr. Chamberlain presented a Bill "to give the force of law to certain Articles of Agreement for a Treaty between Great Britain and Ireland and to enable effect to be given thereto." Moving the second reading on *Feb.* 16 Mr. Churchill explained that the Bill enabled the Provisional Government to hold an election under favourable conditions at the earliest moment. He emphasized that the Government did not recognise, and never would recognise an Irish Republic. The Bill would secure an adequate constituent assembly. For generations, he said, they had been floundering in the Irish bog, but at last they thought they had set their feet upon a pathway. If Britain continued to march forward along that path, the day might come when Britain would find at her side Ireland united, a nation and a friend. An amendment moved by Captain Craig on behalf of Ulster was defeated by 302 to 60 on *Feb.* 17, when the Bill was read a second time. The Committee stage was opened on *March* 2 and completed on *March* 6, a Government amendment providing that the Parliament of South Ireland should be dissolved and steps taken for a general election not less than four months from the passing of the Bill being carried. The rejection was moved by Mr. Ronald McNeill on the third reading on *March* 8, but by 295 to 52 the Bill was sent to the Upper Chamber. The debates in that House were characterised by considerable bitterness but only slight amendments were made, and a compromise being reached regarding these, the Royal Assent was accorded on *March* 31. During a subsequent discussion on Ireland, Mr. Churchill on *June* 26 declared that if the anarchy were not put down the Imperial Government would regard the Treaty as having been violated and they would take no steps to carry out or legalise its further stages.

THE BUDGET.—In introducing his Budget on *May* 1 (*see p.* 496) and announcing a reduction in the income tax rate and a new duty on tea, coffee and cocoa, Sir Robert Horne claimed that his proposals provided, within the limits of legitimate and prudent finance, as much relief from the burden of taxation as was possible and in a form in which it was thought that the relief would be most efficacious. It was his belief that they would create new hopes and fresh enterprise in the vast organisations by which the nation's business was done and upon which the prosperity of our finance depended. Mr. Asquith said he gravely doubted whether the Chancellor had a surplus, even on paper, and declared that Sir Robert had made up his surplus by borrowing. The Finance Bill was brought in and read a first time on *May* 8. The second reading was secured on *May* 29 after the defeat by 163 to 21 of a motion for its rejection. On *June* 28 the Committee stage was completed, and when the third reading took place, Sir Robert said that so far his estimates had been entirely justified, and in some instances had been rather exceeded by the revenue.

THE GEDDES COMMITTEE.—The Chancellor of

the Exchequer on *March* 1 outlined the Government's intentions regarding the recommendations of the Geddes Committee on national expenditure. He said he asked the Committee to suggest reductions in public expenditure to the amount of £100,000,000, and they had recommended reductions of £86,000,000, some £66,000,000 of which was concerned with the three fighting services and education. The Government had come to the conclusion that they could not put into operation the proposals of the Committee for the reduction of teachers' salaries and the exclusion from schools of children below the age of six years, and the reductions adopted therefore amounted to £6,500,000 out of £18,000,000 recommended. As to the Navy the reduction proposed was £21,000,000 in addition to any savings resulting from the Washington Conference. The Admiralty had offered a saving of £21,000,000, including savings from the Washington Conference. The reductions recommended in the Army Estimates totalled £22,500,000 and the War Office had suggested a reduction of £17,000,000. The Air Ministry proposed a reduction of £3,000,000 against a recommended reduction of £5,500,000. The Ministry of Labour was reducing its expenditure by £8,000,000; the Ministry of Health by £2,100,000; and the War Pensions Administration by £6,000,000. Summing up, Sir Robert Horne said that the Government accepted reductions of £64,000,000, which included £11,000,000 attributable to the possible savings as a result of the Washington Conference, compared with the Geddes Committee's recommendation of £86,000,000, exclusive of what might follow the conversations at Washington but including savings of £15,000,000, which were unspecified, a total of £71,000,000. Later the Government experienced an unimportant defeat on a Bill arising out of the recommendations of the Geddes Committee, a motion for the adjournment of the debate on the second reading of a measure proposing that teachers should contribute towards their pensions pending the result of an enquiry being carried by 151 to 148 on *May* 16. A select committee found that the Government had made no undertaking that the existing Superannuation Act should not be modified while the Burnham scale of salaries remained in force, and on Mr. Fisher agreeing to accept an amendment limiting to two years the period for which the Bill would run, the second reading was secured and the measure was subsequently placed on the Statute Book.

Second Chamber Reform.—The Government's scheme for the reform of the House of Lords was outlined in a series of resolutions moved by Viscount Peel on *July* 18 with a view to ascertaining the opinions of the Peers in order that a bill might be drafted. The resolutions provided that the House should be composed of approximately 350 members, consisting of Peers of the Blood-Royal, Lords Spiritual and Law Lords, members elected, either directly or indirectly, from the outside, hereditary peers elected by their order, and members nominated by the Crown, in each case for a term of years. While the House would not have power to amend or reject money Bills, the resolutions laid down that the decision as to whether a Bill was or was not a money Bill should be decided by a joint standing committee of the two Houses presided over by the Speaker. The proposals were discussed at some length and further progress was postponed.

The Cattle Embargo.—By a free vote the House of Commons decided on *July* 24 for the removal of the embargo on the importation of Canadian cattle, the Administration being as divided in opinion as the private members. Sir Arthur Griffith-Boscawen urged the retention of the embargo, declaring that this was the view not only of the Ministry of Agriculture but of the great bulk of the agriculturists of England and Wales. Mr. Churchill spoke in favour of the removal and the Prime Minister voted with the majority. Mr. Lloyd George subsequently announced that the Government accepted the decision of the House as a mandate to deal at the earliest possible convenience with the problem, and added that legislation would be required to give effect to the change of policy.

National Insurance Changes.—Further legislation was necessary to meet the new situation with regard to health and unemployment insurance, three Bills on the subject being passed. The first, dealt with early in the Session, provided for an increase in the rates of contributions for health insurance. The second was concerned with unemployment insurance, maintaining the former level of benefits and continuing the provision of the Temporary Dependents' Act. The last modified the second measure as a result of urgent representations made by Boards of Guardians in areas in which there was much unemployment by reducing the "gap" between benefits.

The Bestowal of Honours.—As a sequel to a series of protests against certain of the Birthday Honours the Marquis of Salisbury and Mr. Godfrey Locker-Lampson on *July* 17 moved the appointment of a Select Committee of both Houses to consider the methods of submitting names of persons for dignities and honours for the consideration of the King and to report what changes, if any, were desirable in order to secure that they should only be given as rewards for public services. The Lord Chancellor and the Prime Minister proposed as an alternative the appointment of a Royal Commission to consider and advise on the procedure to be adopted to assist the Prime Minister in making recommendations to the Sovereign, and in each House this amendment was agreed to after lively debates, during which charges were made against two of the new peers, subsequently withdrawn in the case of one of the recipients.

The New Summer Time.—Owing to the cessation of the power to decree Summer Time by Order in Council a Bill dealing with the matter was passed. Explaining the situation in moving the second reading in the Commons on *June* 14, Mr. Shortt said he thought that the large majority of people in this country were in favour of Summer Time, but opinion differed as to the period. He had been much impressed by the points made by those who represented agriculture, and he was prepared to agree that in future there should be some curtailment of the period previously fixed. A motion for the rejection of the Bill was defeated by 207 to 26 and the second reading was agreed to. After being considered by a Standing Committee, the measure received the Royal Assent on *July* 20, the period for Summer Time being fixed to extend from the third Sunday in April to the day after the third Saturday in September.

THE WAR BONUS.

In order to counteract the increase in the *Cost of Living* the Government introduced a *Bonus Scheme*, under which salaried Civil Servants and wage-earning Government employees receive temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920, the limit of the addition in any case being £750 per annum. The Government Bonus Scheme has been adopted generally by Public Authorities, certain modifications being made in particular instances. The scheme formulated a basic rate of increase, producing a basic addition to salaries or wages, and this basic rate rises or falls 1 *twenty-sixth* in response to every *five points* rise or fall in the Index figure average of prices over a six months' period. The standard cost of living in March, 1920, was 130 per cent. in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* is as follows :—

Where the ordinary rate of remuneration does not exceed 30s. per week—130 per cent. increase.

Where the ordinary rate of remuneration exceeds 35s. a week, but does not exceed £200 per annum—130 per cent. on the first 35s. a week (£91 5s. per annum) and 60 per cent. on the excess over £91 5s.

Where the ordinary rate of remuneration exceeds £200 per annum—130 per cent. on the first £91 5s., 60 per cent. on the next £108 15s., and 45 per cent. on the amount in excess of £200 up to £500.

The bonus additions were at their height in March, 1921, when they followed the Index figure average of 165, and the annual cost of the scheme in the Civil Service was £45,000,000. From Sept. 1, 1921, there was a reduction of 7 twenty-sixths ; from March 1, 1922, a further reduction of 5 twenty-sixths ; and from Sept. 1, 1922, a further reduction of 4 twenty-sixths. Each twenty-sixth reduction in the Civil Service salaries and wages represents about £1,250,000 annually. In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases have been introduced :—

10 per cent. on salaries from £500 to £700 ; 15 per cent. on salaries from £700 to £800 ; 20 per cent. on salaries from £800 to £900 ; and so on until 60 per cent. is reached in the case of salaries of £1,600 a year.

Details of the Bonus addition to Salaries and Wages, under the scale in force at various dates, are shown below :—

COST OF SOCIAL SERVICES.

£300,611,595 was expended in Great Britain in 1921 on the various social services, mainly under the heads of Pensions, Education, Poor Relief, and Insurance. A great expansion has taken place in these services in the last ten years, while certain services have been added during the period. In 1901 the aggregate expenditure in England and Wales was £31,692,259, and in 1891 it was £20,111,331. In 1921 the receipts from which the expenditure was met amounted in England and Wales to £276,273 681, towards which rates contributed £64,440,950 and Parliamentary votes and grants £169,525,905, while other income comprising contributions, fees, interest, rents, &c., produced £42,306,826. Details for England and Wales, and a summary for Scotland, are shown in the opposite column :—

Government and Public Offices.

ADMIRALTY. (*See* pp. 257–8.)

MINISTRY OF AGRICULTURE AND FISHERIES.

Whitehall Place, S.W. 1; 43 Parliament Street, S.W. 1; Gwydyr House, Whitehall, S.W 1.

THE MINISTRY OF AGRICULTURE AND FISHERIES was constituted pursuant to the Ministry of Agriculture and Fisheries Act, 1919 (9 and 10 Geo. V. Ch. 91) which amended the Board of Agriculture and Fisheries Acts, 1889 to 1909. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture."

The administration of the *Ordnance Survey* and of *Kew Gardens* is under the control of the Ministry.

Estimates, 1922–3, £1,847,736.

Minister of Agriculture and Fisheries,° Lt.-Col. Rt. Hon. Sir Robert Arthur Sanders, Bart., M.P. £2,000

Private Sec., C. T. Houghton.

Parliamentary do., *unp.*

Parliamentary Secretary and Deputy Minister of Fisheries, The Earl of Ancaster, O.B.E. £1,200

Private Sec., D. B. Toye O.B.E.

Permanent Secretary, °Sir F. L. C. Floud, K.C.B. £3,000

Private Sec., R. H. Franklin.

Chief Scientific Adviser, °Sir A. Daniel Hall, K.C.B., F.R.S. £2,200

Private Sec., H. H. Parker.

Fisheries Secretary, H. G. Maurice, C.B. £1,200 to £1,500

Welch Secretary, Bryner Jones, C.B.E. £1 000 to £1,200

Assistant Secretaries, H. G. Maurice, C.B. (*Principal Assistant Secretary*, £1,200 to £1,500), H. E. Dale, C.B.; A. T. A. Dobson; H. L. French, C.B., O.B.E.; Bryner Jones, C.B.E.; E. B. Shine; R. J. Thompson, O.B.E. ..... £1,000 to £1,200

Legal Adviser and Solicitor, F. A. Jones, C.B. £1,200 to £1,500

Assistant Legal Adviser and Solicitor, A. D. Stocks, O.B.E. ..... £800 to £1,000

Principals, A. Dunbar; R. R. Enfield; Maj. E. Garnsey; Major A. S. Gaye; H. H. Judson; G. F. Middleton M.B.E.; P. W. Millard; E. L. Mitchell; A. W. Monro, C.B.; C. Nathan; H. G. Richardson; C.W. Sabin; Maj. Wynn Thomas; H. D. Vigor, M.B.E.; H. R. Ward; and C. R. T. Williams, O.B.E. (*also Deputy Establishment Officer*)..... £700 to £900

First Class Clerks, R. H Hooker; A. G. L. Rogers; G. W. Sneyd-Lloyd, I.S.O., O.B.E. ..... £600 to £800

Assistant Principals, J. B. Baber; W. R. Black; R. H. Franklin; A. M. Lowe; H. Meadows; F. K. Milsom; B. W. Phillips; A. W. Street, M.C.; D. B. Toye, O.B.E.; D. E. Vandepeer; V. E. Wilkins..... £200 to £500

Principal Finance Officer, G. Macey ... £850 to £1,000

Deputy Finance Officer, P. J. Langley, M.B.E. £550 to £700

Chief Veterinary Inspector, J. R. Jackson M.R.C.V.S. £700 to £900

Assistant Veterinary Officer, J. McI. McCall, M.B., C.M. M.R.C.V.S. ..... £500 to £700

Chief Veterinary Officer and Director of Veterinary Research, Sir S. Stockman, M.R.C.V.S. £1,000 to £1,200

Controller of Horticulture, W. G. Lobjoit, O.B.E.... *unp.*

Deputy Controller of Horticulture, H. V. Taylor, M.B.E. £500 to £700

Director of Plant Diseases, J. C. F. Fryer, M.A. £700 to £900

Chief Education Inspector, P. G. Dallinger, O.B.E. £800 to £1,000

Deputy Chief Education Inspector, J. G. Stewart £600 to £800

Dairy Commissioner, J. F. Blackshaw, O.B.E. £700 to £900

Senior or Superintending Inspectors, A. H. Berry; G. P. Berry; °E. G. Haygarth Brown; A. B. Bruce; A. V. Campbell; P. A. Francis, M.B.E.; *Small Live Stock Officer*, G. C. Gough; E. T. Halnan; W. H. Hogg; P. J. L. Kelland; P. S. Lawrie; W. G. Wragg ..... £500 to £700

Live Stock Commissioner, F. N. Webb £850

Superintending Live Stock Officers, G. T. Dixon; R. N. Jones; P. A. Mytton..... £500 to £700

Director of Land Acquisition S. Mager, C.B.E. £1,100

Chief Land Commissioner, H. V. Raffety £800

District Land Commissioners, D. G. Barnard; J. H. Diggle; E. O. Fordham; F. Horne, O.B.E.; W. T. Howes, M.B.E.; F. E. N. Rogers; T. H. Sutton £800 to £800

Deputy Commissioners, A. Allsebrook (£600); S. Fitch ..... £500 to £600

Chief Drainage Engineer, C. H. J. Clayton, M.B.E. £600 to £800

Director of Scientific Fishery Investigations, E. S. Russell, D.SC. £1,200

Chief Inspector of Fisheries, H. S. Moss-Blundell, C.B.E. (*temp.*) ..... (*inclusive*) £1,000

Principal Naturalists, J. O. Borley, O.B.E., M.A.; R. W. Dodgson, M.D. ..... £650 to £750

Royal Botanic Gardens, Kew.

Director of Royal Botanic Gardens and Technical Adviser in Botany, A. W. Hill, SC.D., F.R.S. £1,000 to £1,200

Assistant Director, Major T.F. Chipp, M.C. £600 to £800

Keeper, Herbarium & Library, A. D. Cotton £500 to £700

Curator of Gardens, W. J. Bean ..... £250 to £600

Keeper of Museums, J. M. Hillier ..... £250 to £600

Assistant Keeper, Jodrell Laboratory, L. A. Boodle, F.L.S. ..... £250 to £600

Assistants, J. Aikman K. W. Braid, W. Dallimore J. H. Holland, F.L.S. J. Hutchinson S. A. Skan, T. A. Sprague, W. B. Turrill, W. N. Winn, C. H. Wright, A.L.S. ..... £250 to £600

Lady Assistant, Miss E. M. Wakefield..... £250 to £600

Ordnance Survey Department, Southampton.

Director-General, Col. E. M. Jack, C.B., C.M.G., D.S.O

Executive Officer Lt.-Col. A. J. Wolff, D.S.O., R.E.

Officers in Charge of Headquarters Divisions:—
Publications, (vacant).
Control Lt.-Col. J. E. E. Craster, O.B.E., R.E.
Small Scale, Trigonometrical, &c., (vacant).
Levelling, (vacant).
Stores Capt. E. H. M. Clifford, M.C., R.E.
Map Branch, Capt. J. G. Withycombe.

Norwich Lieut. J. R. T. Aldous, M.C., R.E.

AIR MINISTRY (*see* pp. 269–270).

COLLEGE OF ARMS or HERALDS' COLLEGE,
Queen Victoria Street, E.C. 4.

(*See also* Scottish Section.)

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

* Status of this office is under consideration by the Cabinet.

° At Custom House Branch.

COLONIAL OFFICE. Downing Street, S.W. 1.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Dominions, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £146,993 for 1922-23.

Principal Secretary of State for the Colonies, His Grace the Duke of Devonshire K.G., P.C., G.C.M.G., G.C.V.O. £5,000
Private Secs., E. H. Marsh, C.B., C.M.G., C.V.O. ; J. E. Stephenson.
Assist. Priv. Secs. (*Appointments*), Maj. R. D. Furse, D.S.O. ; A. F. Newbolt ; G. N. Irby.

Oversea Settlement Committee

(late Government Emigration Committee),

3 and 4, Clements' Inn, W.C.2.—(10 to 5. Sat. 10 to 1.30.)

H.M. Government have found it necessary to undertake closer responsibility in connexion with the movements of British subjects wishing to settle overseas within the Empire, or to emigrate to foreign countries, than they have exercised in the past. In order to assist them in carrying out their policy they appointed a Committee at first known as "The Government Emigration Committee," now renamed "The Oversea Settlement Committee."

President, Committee of Management, The Secretary of State for the Colonies.
Chairman, The Parliamentary Under-Secretary of State for the Colonies.
Vice-Chairman, do., T. C. Macnaghten, C.B.E.
Secretary, G. F. Plant.

Imperial Institute.

South Kensington, S.W. 7.

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (*see* page 584), and by the Imperial Institute (Management) Act of 1916 is under the management of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members. The principal work of the Imperial Institute is the promotion of inter-imperial trade in raw materials, by investigations with a view to utilisation, by supplying information as to sources, quality and uses, and by exhibitions illustrative of the resources of the Empire.

Executive Council, Hon. E. F. L Wood, M.P. (*Chairman*) ; P. W. L. Ashley, C.B. ; Sir Arthur Shirley Benn, K.B.E., M.P. ; Sir Edward Brockman, K.C.M.G. ; Sir Robert Carlyle, K.C.S.I., C.I.E. ; Sir Edward Davson ; Prof. Wyndham R. Dunstan, C.M.G., F.R.S. ; A. Fiddian ; Sir A. D. Hall, K.C.B., F.R.S. ; Sir Gilbert Grindle, K.C.M.G., C.B. ; M. F. Headlam ; D. O. Malcolm ; R. W. Matthew, C.M.G. ; Sir Owen Philipps, G.C.M.G., M.P. ; Sir James Stevenson, Bart., G.C.M.G. ; Sir Richard Threlfall, K.B.E., F.R.S. ; The High Commissioner for Australia ; The High Commissioner for Canada ; the High Commissioner for New Zealand ; the High Commissioner for Newfoundland ; the High Commissioner for the Union of South Africa.

The following are the principal Committees of the Institute :—

Committee for Canada.

The Hon. P. C. Larkin (*Chairman*) ; J. G. Colmer, C.M.G. ; Sir Robert Kindersley, G.B.E. ; J. H. Plummer ; Sir Keith Price.

Committee for Australia.

The Rt. Hon. Sir Joseph Cook, G.C.M.G. (*Chairman*) ; Sir Gordon Campbell, K.B.E. ; Capt. Sir R. Muirhead Collins, R.N., C.M.G. ; E. V Reid.

Committee for New Zealand.

Col. the Hon. Sir James Allen, K.C.B. (*Chairman*) ; W. Acton Adams, J.P. ; Sir J. Coates ; G. F. Gee ; R. D. D. McLean ; Alexander Michie ; Sir James Mills, K.C.M.G. ; W. H. Montgomery, C.B.E. ; R. H. Nolan, C.B.E.

Committee for South Africa (including Rhodesia).

Hon. Sir Edgar Walton, K.C.M.G. (*Chairman*) ; A. Canham ; D. O. Malcolm ; C. W. S. Maude ; W. Mosenthal ; W. Soper, M.A.

Committee for India.

Sir Harvey Adamson, K.C.S.I. (*Chairman*) ; Sir Charles Armstrong ; Sir Thomas Bennett, M.P. ; Sir Manchérjee Bhownaggree K.C.I.E. ; Rt. Hon. Lord Cable ; Sir Robert Carlyle, K.C.S.I., C.I.E. ; Rt. Hon. Lord Carmichael, G.C.S.I., G.C.I.E., K.C.M.G. ; Sir John G. Cumming, K.C.I.E. ; Sir Cecil Graham ; H. H. The Maharaj-Rana of Jhalawar, K.C.S.I. ; J. Wardlaw Milne ; Sir Charles Stewart-Wilson, K.C.I.E. ; Sir George Sutherland.

In addition there are numerous Advisory Technical Committees, including Mineral Resources, Timbers, Silk, Rubber, &c., and a Committee on Raw Materials, with representatives of the Chambers of Commerce.

Director, Wyndham R. Dunstan, C.M.G., LL.D., F.R.S.
Secretary, H. M. Lidderdale, B.A.

THE DUCHY OF CORNWALL,

Buckingham Gate, S.W. 1.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1921, was £194,020, and was derived principally from Rents and Profits of Courts, £154,229; Annuity in lieu of Tin Coinage Duties, £16,217; and Dividends on Stock, £6,824. The Payments include £39,045 Outlay for the benefit of the Estate: £47,306. Deductions under various Acts; £45 898, Allowances, Donations, and Charities; and £19,126, Expenses of Management. The sum of £33,736 was paid on account of His Royal Highness the Prince of Wales.

Prince of Wales's Council.

The Lord Clinton (*Lord Warden of the Stannaries and Keeper of Privy Seal*); The Lord Revelstoke, G.C.V.O. (*Receiver-General*); Earl Fortescue; Vice-Adm. Sir Lionel Halsey, G.C.V.O., K.C.M.G., C.B.; Douglas McGarel Hogg, K.C. (*Attorney General*); Sir Godfrey Thomas, Bt., C.V.O.; Walter Peacock, C.V.O. (*Sec. and Keeper of Records*).

Officers of the Duchy of Cornwall.

Auditor, Sir Laurence E. Halsey, K.B.E.
Solicitor, R. E. Tucker.
Assistant Secretary, C. Liddell.
Clerk Surveyor, H. Kirk.
Deputy Receiver, A. E. Gillett.
Sheriff, Sir Hugh Molesworth St. Aubyn, Bart.

THE DUCHY OF LANCASTER.

Office, Lancaster Place, Strand, W.C. 2.

Lancaster was elected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £29,000 in 1847, and amounted to £112,584 in the year ended December 31, 1920. The contributory items are Rents and Profits of Courts, £61,694; Royalties and Dues, £31,980. Expenditure: £9,464, Outlay for the benefit of the Estate; £32,089, deducted under various Acts of Parliament; £7,613, Allowances, Donations, and Charities; £2,000, Salary of the Chancellor of the Duchy; and £12,372, Expenses of Management. The sum of £45,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

Chancellor (ad interim), The Lord President of the Council.
Private Sec., Norman R. C. Warwick.
Vice-Chancellor, R. B. Lawrence, K.C.
Attorney-Gen., Joseph Herbert Cunliffe, K.C.
Receiver-Gen., Lt.-Col. Rt. Hon. Sir F. Ponsonby, G.C.V.O., K.C.B.
Auditor, F. W. Pixley.
Clerk of Council & Registrar, Herbert E. Mitchell.
Solicitor, Douglas Houstoun.
Assistant Solicitor, Eliot A. C. Druce.
Surveyor-Gen. and Deputy Receiver-Gen., T. Vaughan Prickard.
Coroner, A. M. M. Forbes.
Chief Clerk, Louis F. Fergusson.
Registrar, Preston and Manchester Dists., J. B. Blackburne and A. E. Stainthal, Joint Registrars.
Do. Liverpool Dist., Roger W. Lowden.
Constable of Lancaster Castle, Lord Ashton.

THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welch and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Chancellor, Edward Tindal Atkinson, K.C.
Attorney-General, Herbert F. Manisty, K.C.
Solicitor-General, Sir Henry Arthur Colefax, K.B.E., K.C.
Registrar of Chancery Court, A. O. Smith.
Steward & Clerk of Halmotes, Stanford E. Downing
Deputy do., G. Aynsley Smith.
Mining Surveyor, Sir A. N. Lindsay Wood, Bart.
Receivers, Smiths, Gore & Co.

ECCLESIASTICAL AND CHURCH ESTATES COMMISSIONERS,

1, Millbank, Westminster, S.W. 1.

(Hours 10 to 5.)

The Ecclesiastical Commission for the Management of Church Property, as now existing, was incorporated in 1836, its constitution being amended in 1840-1 and 1868. BOARD OF EDUCATION,
Whitehall, London, S.W. 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £461,285 in 1922-23, with £381,817 for Inspection and Examination.

EXCHEQUER AND AUDIT DEPARTMENT,
Victoria Embankment, E.C. 4.

The Comptroller and Auditor General was appointed by Letters Patent under 29 & 30 Vict. c. 39 § 1866, in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (1) Exchequer:—To authorise Issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proper evidence of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £159,000 in 1922–23.

FOREIGN OFFICE, Downing Street, S.W. 1.

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Officer had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), three Assistant Under-Secretaries, Legal Advisers, a Finance Officer, seven Counsellors, a Librarian, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £244,679 in 1922–23

Principal Secretary of State for Foreign Affairs, Most Hon. the Marquess Curzon of Kedleston, K.G., G.C.S.I., G.C.I.E.....£5,000
Private Secs., R. G. Vansittart, C.M.G., M.V.O.; A. W. Keith-Falconer (*Parliamentary*).

2nd Divn. Clerk, H. Jones.
Passport Officer, Liverpool, J. S. Grant...£400 to £500

FORESTRY COMMISSION.

22 Grosvenor Gardens, S.W. 1.

The Forestry Commissioners were appointed under the Forestry Act (1919), and were created a Body Corporate in April 1920. The Commissioners are charged with the general duty of promoting the interests of forestry, the development of afforestation and the production and supply of timber in the United Kingdom. The act transferred to the Commissioners the powers and duties of the Board of Agriculture and Fisheries, and the Board of Agriculture for Scotland, in relation to forestry, and also the powers of those Departments under the Destructive Insects and Pests Acts, 1877 and 1907, so far as those powers relate to insects or pests destructive only to forest trees and timber.

The net estimated expenditure on forestry operations, &c., for the year 1921-22 was £400,000.

Chairman, Maj.-Gen. Lord Lovat, K.T., K.C.M.G., K.C.V.O., C.B., D.S.O.
Commissioners, Right Hon. F. Dyke Acland, M.P. ; Rt. Hon. Lord Clinton ; L. Forestier-Walker, M.P. ; T. B. Ponsonby, D.L. ; R. L. Robinson, O.B.E. ; Col. W. Steuart-Fothringham ; Sir J. Stirling-Maxwell, Bt.
Assistant Commissioners, Hugh Murray, C.I.E., C.B.E. (*England and Wales*, 1, Whitehall, S.W. 2) ; John Sutherland, C.B.E. (*Scotland*, 25, Drumsheugh Gardens, Edinburgh).
Secretary, A. G. Herbert.

FRIENDLY SOCIETIES REGISTRY.

17, North Audley Street, W. 1.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, and a great number of local and personal Acts. Net expenses, 1922-23, £37,246.

Chief Registrar, G. Stuart Robertson, K.C. £1,200 to £1,500
Private Sec., G. H. Cooper.

Principal Legal Assistant, H. P. Harker £550 to £700
Heads of Branches.
Legal, M. A. Mackinnon, M.C. .....£550 to £700
Returns and Reports, H. C. Souter £700
Establishment and Account, G. T. Knecht, I.S.O. £500 to £600
Registers & Records, T. F. Dunning .....£500 to £600

GOVERNMENT HOSPITALITY FUND.

King Charles Street, Whitehall, S.W. 1.

The Government Hospitality Fund was instituted in 1908 for the purpose of organizing official hospitality on a regular basis, with a view to the promotion of international goodwill.

Minister, The Earl of Crawford and Balcarres, K.T.
Secretary, E. E. Beare.

MINISTRY OF HEALTH,
Whitehall, S.W. 1.

This Department was established by the Ministry of Health Act, 1919, to exercise in England and Wales powers with respect to Health and Local Government, and to it were transferred by the Act, subject to certain provisos (a) all the powers and duties of the *Local Government Board*, the *Insurance Commission* and the *Welsh Insurance Commission*; (b) the powers of the *Board of Education* relating to the health of expectant and nursing mothers and children under five, and to the medical inspection and treatment of children and young persons; (c) all the powers of the *Privy Council* and of the Lord President of the Council under the Midwives Acts, 1902 and 1918, and the powers hitherto exercised by the Secretary of State under Part I of the Children Act, 1908. There may also be transferred to the Minister certain specified powers and any other powers and duties in England and Wales of any Government Department which appear to relate to matters affecting or incidental to the health of the people.

Joint Financial Advisers, Sir A. W. Watson, K.C.B., and E. J. Strohmenger, C.B.

Medical Adviser, J. Smith-Whitaker, M.R.C.S.

Secretary, W. F. Wackrill, O.B.E.

REGISTRAR-GENERAL'S OFFICE
(ENGLAND AND WALES),
Somerset House, W.C. 2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1542, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the Act of 1874, which made registration compulsory in England and Wales. The Registrar-General is responsible for the taking of the Census and the preparation of the Census Returns. The expenses of the Office, including the Census Office, for 1922–23 were estimated at £239,252. The estimate of receipts from fees for the same period is £22,100.

Registrar-General, S. P. Vivian (*See* Ministry of Health)

Private Sec., H. G. Dowden.

Assistant Registrars-General, T. T. S. de Jastrzebski; W. L. Rind ..... £850 to £1,000

Clerks, P. Kirk; A. J. Pearce ..... £150 to £500

Statistical Officer, G. F. Williams ..... £300 to £400

Staff Clerk, F. J. Caswell ..... £300 to £400

HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

Principal Secretary of State for Home Affairs, Rt. Hon. William Clive Bridgeman, M.P. £5,000

Private Sec., A. Maxwell.

BOARD OF INLAND REVENUE,
Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1694 and of Commissioners of Taxes from 1719. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 12 and 13 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII., c. 16 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps and Taxes. Salaries and Expenses of the Board for 1922–23 are estimated at £7,154,781.

Chairman, Sir Richard V. N. Hopkins, K.C.B.....£3,000

Chief Medical Officers, F. Foord Caiger, M.D., D.P.H.; W. T. Gordon Pugh, M.D.; James Watt, M.D., D.P.H.; E. B. Sherlock, M.D., D.P.H.

METROPOLITAN WATER BOARD.

173 Rosebery Avenue, E.C. 1.

The Board serves an area of 558 sq. miles. The charges are levied on rateable value at such rate, not exceeding 8½ per cent., as the Board may fix. The approximate net water rental is £4,797,000. The Capital Debt on April 1, 1922, amounted to £52,746,746, the interest paid being £1,704,625. The estimated population supplied was 6,861,449, the number of services being 1,142,969. The annual supply was 91,119,900,000 gallons, a daily average of 249·66 million gallons. One of the sources of supply is the *New River Company's* undertaking, inaugurated in the reign of James I. (1609) by Sir Hugh Myddelton, to bring water from Amwell and Chadwell, Herts, to London.

Chairman of the Board (1922-5), Charles G. Musgrave, J.P.....(*unp.*)
Vice-Chairman, Frederick L. Dove, D.L.....(*unp.*)
Clerk and Solicitor, (vacant).....£2,000
Chief Engineer, Henry E. Stilgoe, M.Inst.C.E. ...£2,500
Accountant & Registrar of Debentures, G. M. Jennings £1,250
Director of Water Examination, Sir Alexander Houston, K.B.E., C.V.O., M.B., D.Sc. £1,350
Supervisor, F. W. Drake.
Surveyor, Harold Oxley, F.S.I.

IMPERIAL MINERAL RESOURCES BUREAU.

2 Queen Anne's Gate Buildings, Westminster, S.W. 1.

The Bureau was incorporated by Royal Charter on the 12th June, 1919, and its purposes are: (i) To collect, coordinate, and disseminate information as to the resources, production, treatment, consumption and requirements of every mineral and metal. (ii) To ascertain

the scope of existing agencies, with a view ultimately to avoid any unnecessary overlapping that may prevail. (iii) To devise means whereby existing agencies can, if necessary, be assisted and improved in the accomplishment of their respective tasks. (iv) To supplement these agencies, if necessary, in order to obtain any information not now collected which may be required for the purposes of the Bureau. (v) To advise on the development of the mineral resources of the Empire or of particular parts thereof, in order that such resources may be available for the purposes of Imperial Defence or Industry or Commerce.

Board of Governors.

The Board of Governors consists of representatives appointed by the Home and Overseas Governments, the President of the Board being the Earl of Balfour, K.G., O.M., F.R.S.

Chairman of the Bureau (and Representative of the United Kingdom), Sir Richard Redmayne, K.C.B., M.SC., M.I.C.E., M.I.M.E., M.I.M.M., F.G.S. (*Dominion of Canada*), Willet G. Miller, LL.D., F.R.S.C. (*Commonwealth of Australia*) William Stanley Robinson. (*Dominion of New Zealand*), (vacant). (*Union of South Africa*), (vacant). (*Dominion of Newfoundland*), Rt. Hon. Lord Morris, K.C.M.G., K.C. (*Vice-Chairman*). (*Government of India*), Richard Dixon Oldham, F.R.S., F.G.S. (Nominated by the *Secretary of State for the Colonies*), John William Evans, D.SC., F.R.S. (Appointed by the *Lord President of the Council*), Westgarth Forster Brown M.I.C.E., M.I.M.E.; Frederick H. Hatch, M.I.C.E., M.I.M.M.; Wallace Thorncycroft, F.R.S.E., M.I.M.E.; Professor Thomas Turner, M.SC., F.I.C., A.R.S.M.; Hugh F. Marriott, A.R.S.M., M.I.M.M.; Sir Herbert Jackson, K.B.E., F.I.C., F.R.S.

Secretary to the Bureau, Maj. W. M. Henderson-Scott, A.R.S.M., F.G.S.

The Bureau is advised by fifteen Technical Committees.

THE ROYAL MINT, Tower Hill, E. 1.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I. and the last Warden was Lord Maryborough (1814–23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £6,019,201 for 1922–1923. Appropriations in aid, £6,019,200, leaving a net cost of £10.

Master and Worker, The Chancellor of the Exchequer.

Deputy Master and Comptroller, and Engraver of H.M. Seals, Col. Robt. Arthur Johnson, C.B.E.

Chief Clerk, D. J. Scourfield .....£500 to £700

Staff Officer, W. Perry, M.B.E. .....£400 to £500

Superintendent, Operative Department, W. J. Hocking, C.B.E. .....£800 to £1,000

Assistant do., W. J. Drown; D. G. Spittle; H. W. L. Evans, O.B.E. .....£360 to £500

Chemist and Assayer, Sir T. K. Rose, D.SC. £800 to £1,000

Assistant Assayers, S. W. Smith, D.SC., £350 to £500; J. Phelps, M.A., £350 to £550; W. A. C. Newman, B.SC. .....£300 to £550

Curator and Librarian, W. J. Hocking, C.B.E. (*addl.*) £50

Branches of the Royal Mint.

Sydney, New South Wales.

Deputy Master, J. H. Campbell £1,100

Superintendent, A. J. C. Christie .....£700 to £900

Melbourne, Victoria.

Deputy Master, A. M. Le Souëf £1,100

Superintendent, W. M. Robins, B.A. .....£800 to £900

Perth, Western Australia.

Deputy Master, J. F. Campbell £1,100

Superintendent, F. E. Allum .....£700 to £800

Ottawa, Canada.

Deputy Master, A. H. W. Cleave .....£1,000 to £1,200

Superintendent, J. Roe .....£750 to £1,000

THE BRITISH MUSEUM, Bloomsbury, W.C. 1.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1914, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £301,505 (including Natural History Museum) in 1922–23, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Service Estimates.

Director and Principal Librarian, Sir Frederic George Kenyon, K.C.B., T.D., F.B.A., Litt.D. £1,500

Assistant Secretary, A. R. Dryhurst, I.S.O. £900

Accountant, C. P. Cooke .....£550 to £700

Staff Officers, J. Knowles; J. F. Isaac.....£400 to £500

Keeper of Printed Books, Alfred William Pollard, C.B., D.Litt., F.B.A. £1,000

Deputy Keepers, Robert F. Sharp, B.A.; F. D. Sladen, B.A., J. A. J. de Villiers £900

Superintendent of Reading Room, F. D. Sladen, B.A.

Assistant Keepers, L. H. E. Taylor; P. Wilson, M.A.; W. A. Marsden, M.A.; L. C. Wharton, B.A.; G. D. R. Tucker, M.A.; H. Thomas, Litt.D.; A. J. K. Esdaile, B.A.; J. V. Scholderer, M.A.; F. C. W. Hiley, M.A. £475 to £800

Assistants, A. F. Johnson, M.C., B.A.; A. I. Ellis, M.A.; F. P. Sprent, M.A.; E. W. O. Lynam, B.A.; A. G. Macfarlane, B.A.; F. G. Rendall, B.A.; W. A. Smith, M.A.; H. Sellers, M.A.; L. A. Sheppard, B.A.; C. B. Oldman, B.A.; N. O. M. Cameron, B.A.; H. A. S. Kelham; Wm. C. Smith; A. G. Crawley £250 to £440

Keeper of Manuscripts and Egerton Librarian, J. P. Gilson, M.A. £1,000

Deputy Keeper of MSS., J. A. Herbert, B.A. £900

Assistant Keepers, D. T. Baird Wood, M.A.; H. Idris Bell, O.B.E., M.A.; R. E. W. Flower, B.A. £475 to £800

Assistants, G. T. Hales, M.A.; H. J. M. Milne, B.A.; E. G. Millar, B.A.; A. J. Collins, B.A.; R. A. Coates; B. Schofield, M.A. .....£250 to £440

Keeper of Oriental Printed Books and MSS., Lionel D. Barnett, Litt.D. £1,000

Assistant Keepers, Lionel Giles, M.A.; Edward Edwards, M.A. .....£475 to £800

Assistants, A. S. Fulton, M.A.; J. Leveen £250 to £440

Keeper of Prints and Drawings, Campbell Dodgson, M.A., C.B.E. £1,000

Deputy do. (in charge of the Sub-Dept. of Oriental Prints, &c.), R. Laurence Binyon, B.A. £950

Assistant Keeper, A. M. Hind, M.A., O.B.E. £300 to £800

Assistants, A. E. Popham, B.A.; A. D. Waley, B.A.; H. M. Hake, B.A. .....£250 to £440

Keeper of Egyptian and Assyrian Antiquities, Sir Ernest A. Wallis Budge, Litt.D., F.S.A. £1,000

Deputy Keeper, H. R. H. Hall, D.Litt., M.B.E., F.S.A. £900

Assistants, Sidney Smith, B.A.; C. J. Gadd, B.A. £250 to £440

Keeper of Greek and Roman Antiquities, Arthur H. Smith, M.A., F.S.A. £1,000

Deputy Keeper, H. B. Walters, O.B.E., M.A., F.S.A. £900

Assistants, E. J. Forsdyke, M.A., F.S.A.; F. N. Pryce, M.A. .....£250 to £440

Keeper of British and Mediæval Antiquities, O. M. Dalton, M.A., F.B.A., F.S.A. £1,000

Deputy do., Reginald A. Smith, B.A., F.S.A.....£900

Assistants, A. B. Tonnochy, M.A.; T. O. Kendrick, M.A. £250 to £440

Keeper of Ceramics and Ethnography, Robert L. Hobson, B.A. £1,000

Deputy do., T. A. Joyce, M.A., O.B.E. £900

Assistants, H. J. Braunholtz, M.A.; W. W. Winkworth £250 to £440

Keeper of Coins & Medals, G. F. Hill, F.B.A. £1,000

Assistant Keeper, John Allan, M.A. .....£475 to £800

Assistants, G. C. Brooke, B.A.; Harold Mattingly, M.A.; E. S. G. Robinson, B.A. .....£250 to £440

Solicitors, Messrs. Warrens, 5 Bedford Square.

THE LONDON MUSEUM, Lancaster House, St. James's, S.W. 1.

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of the antiquities, &c., of London. The Collection was originally housed in Kensington Palace, and was reopened in 1914 at Lancaster House. The cost of administration in 1919–20 was estimated at £4,400.

Keeper, Secretary and Accounting Officer, F. A. Harman Oates, M.V.O., F.S.A.
Asst. Keeper and Librarian, Lt.-Col. Hon. Maurice Brett, M.V.O.
Inspector of Excavations, G. F. Lawrence.

THE NATURAL HISTORY MUSEUM,
Cromwell Road, S.W. 7.

The Natural History Collections in the British Museum were removed to South Kensington and rearranged there in 1881–85, the new museum being opened to the public in 1881. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £97,181 in 1922-23.

Director, Sir Sidney F. Harmer, K.B.E., SC.D., F.R.S. £1,200
Assistant Secretary, G. F. Herbert Smith, D.SC. £650 to £800
Staff Officer, W. J. Anderson ..... £400 to £500
Clerks, Higher Grade, T. Wooddisse; A. C. Wray £300 to £400
Assistant Keeper (Library), B. H. Soulsby, M.A. £475 to £800
Keeper of Zoology, C. T. Regan, M.A., F.R.S. £1,000
Deputy do., W. T. Calman, D.SC., F.R.S. £900
Assistant Keepers, M. R. Oldfield Thomas, F.R.S.; R. Kirkpatrick; W. P. Pycraft; A. S. Hirst; J. G. Dollman, B.A.; P. R. Lowe, O.B.E. ..... £475 to £800
Assistants, N. B. Kinnear; G. C. Robson, B.A.; H. A. Baylis, D.SC.; A. K. Totton, M.C.; M. A. C. Hinton; J. R. Norman ..... £250 to £440
Clerks, Higher Grade, T. Wells; A. Marshall £300 to £400
Keeper of Entomology, C. J. Gahan, D.SC. £1,000
Assistant Keepers, Maj. E. E. Austen, D.S.O.; J. H. Durrant; G. J. Arrow; J. Waterston, D.SC. £475 to £800
Assistants, F. W. Edwards, B.A.; K. G. Blair, B.SC.; N. D. Riley; F. Laing, B.SC.; W. H. T. Tams; W. E. China, B.A. ..... £250 to £440
Keeper of Geology, A. S. Woodward, LL.D., F.R.S. £1,000
Deputy do., F. A. Bather, D.SC., F.R.S. £900
Assistant Keepers, C. W. Andrews, D.SC., F.R.S.; W. D. Lang, SC.D. ..... £475 to £800
Assistants, W. N. Edwards, B.A.; L. R. Cox, B.A. £250 to £440
Clerk, Higher Grade, T. H. Withers ..... £300 to £400
Keeper of Mineralogy, Dr. G. T. Prior, D.SC., F.R.S. £1,000
Assistant Keeper, L. J. Spencer, D.SC. ... £475 to £800
Assistants, W. Campbell Smith, M.C., M.A.; E. D. Mountain, B.A. ..... £250 to £440
Keeper of Botany, A. B. Rendle, D.SC., F.R.S. £1,000
Assistant Keepers, A. Gepp, M.A.; E. G. Baker £475 to £800
Assistants, J. Ramsbottom, O.B.E., M.A.; A. J. Wilmott, B.A. ..... £250 to £440
Clerk, Higher Grade, J. Ladbrook ..... £300 to £400

THE SCIENCE MUSEUM,
South Kensington, S.W. 7.

Director and Secretary, Col. H. G. Lyons, D.SC., F.R.S. £1,200
Secretary to the Advisory Council, H. W. Dickinson (*Deputy Keeper*).
Keepers, L. W. Fulcher, B.SC.; Lt.-Col. T. F. Parkinson, A.R.C.S. ..... £700 to £900
Deputy Keepers, D. Baxandall, A.R.C.S.; H. W. Dickinson, M.I.MECH.E.; G. L. Overton, A.R.C.S. £600 to £700
Assistant Keepers, S. C. Bradford, B.SC.; E. A. Forward, A.R.C.S., M.I.MECH.E.; A. J. Spencer, M.I.MECH.E. £400 to £600

THE VICTORIA AND ALBERT MUSEUM,
South Kensington, S.W. 7.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1837, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The older parts of the building were erected between 1860 and 1884; the new buildings were completed in 1909. The administrative expenses were estimated at £129,429 in 1922-23, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1922 23, £7 331) was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

Director and Secretary, Sir Cecil H. Smith, C.V.O., LL.D. £1,200 to £1,500

SECRETARIAT.
Museum Superintendent, E. Hart (with allowance £100) ..... £400 to £500
Staff Clerk, A. V. Fullerton ..... £400 to £500

DEPARTMENT OF ARCHITECTURE AND SCULPTURE.
Deputy Keeper, E. R. D. Maclagan, C.B.E., B.A. ... £900
Assistants, R. P. Bedford; A. L. B. Ashton, B.A. £200 to £440

DEPARTMENT OF CERAMICS.
Deputy Keeper, B. Rackham, M.A. £900
Assistants, W. A. H. King, M.A.; H. E. Read, D.S.O., M.C. £200 to £440

DEPARTMENT OF ENGRAVING, ILLUSTRATION, AND DESIGN, AND OF PAINTINGS.
Keeper, M. Hardie, B.A. £1,000
Assistants, B. S. Long, M.A.; F. W. Stokes, B.A.; J. Laver, B.A. ..... £200 to £440

LIBRARY.
Keeper, G. H. Palmer, B.A. £1,000
Assistant Keepers, A. Van de Put; H. C. Andrews, M.A. ..... £475 to £800

DEPARTMENT OF METALWORK.
Keeper, W. W. Watts, F.S.A. £1,000
Deputy Keeper, H. P. Mitchell £900
Assistant Keepers, A. J. Koop, B.A.; Maj. C. T. P. Bailey ..... £475 to £800

DEPARTMENT OF TEXTILES.
Keeper, A. F. Kendrick, B.A. £1000
Assistant Keeper, P. G. Trendell ..... £475 to £800
Technical Assistant, A. D. H. Smith, B.A. £120 to £300

DEPARTMENT OF WOODWORK.
Keeper, Lt.-Col. E. F. Strange, C.B.E. £1,000
Assistant Keepers, O. Brackett; H. Clifford-Smith, M.A., F.S.A. ..... £475 to £800

INDIAN SECTION.
Deputy Keeper, C. S. Clarke £900
Assistant Keeper, A. J. D.Campbell ..... £475 to £800
Assistant, K. de B. Codrington, B.A. ..... £200 to £440

DEPARTMENT OF CIRCULATION.
Deputy Keeper, *H. A. Kennedy £900
Assistant Keeper, Maj. E. W. Denniss ... £475 to £800
Assistant, A. E. J. Torrens ..... £200 to £440

BETHNAL GREEN MUSEUM.
Assistant, A. K. Sabin ..... £200 to £440

NATIONAL LIBRARY OF WALES,
Aberystwyth.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. Contains over 400,000 printed books, and valuable MSS. and rare printed books in Welch and other Celtic languages. One of the six libraries entitled to certain privileges under Copyright Act. Open daily 10 to 5, Sat. 10 to 1.

Librarian, John Ballinger, C.B.E., M.A.

NATIONAL MUSEUM OF WALES, Cardiff.
Amgueddfa Genedlaethol Cymru.

Founded by Royal Charter, 1907, and maintained by Annual Grant from the Government and Museum rate from the Cardiff City Council. The collections consist of Welch porcelain, English pottery, De Winton Collection of Continental porcelain, Pyke-Thompson collection of water-colour drawings and important collections of paintings in oil and engravings. Casts of pre-Norman Monuments of Wales, and Natural History collections.

The Museum is open free daily and on Sunday afternoons.

* Also Secretary to the Advisory Council.

President, (vacant).
Vice-President, the Rt. Hon. Lord Aberdare.
Treasurer, Illtyd Thomas, J.P.
Director, Dr. Wm. Evans Hoyle, M.A.
Keepers (*Archaeology*) Dr. R. E. Mortimer Wheeler, M.C., M.A.; (*Art*) Isaac J. Williams; (*Botany*) H. A. Hyde, B.A., F.L.S.; (*Geology*) Dr. F. J. North, F.G.S.; (*Zoology*) Dr. J. J. Simpson, M.A.
Secretary, A. H. Lee, M.C.

NATIONAL DEBT OFFICE,
19 Old Jewry, E.C. 2.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38–39 Vic., c. 45), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £19,273 in 1922–23.

Comptroller-General, Sir Thomas L. Heath, K.C.B., K.C.V.O., F.R.S. £2,500
Private Secretary, A. Mackenzie £100
Assist. Comptroller, G. F. Ansell, C.B.E. £800 to £1,000
Actuary, H. Weatherill, O.B.E., F.I.A. £250
Chief Clerk W. F. Doust ..... £550 to £800
Principal Clerks, H. Weatherill, O.B.E., F.I.A.; E. S. Jones, O.B.E., F.I.A. ..... £550 to £700
Assistant do., J. Bree; C. B. Hobbins; G. Rackham; H. R. Powell; H. R. Say (*actg.*)..... £400 to £500
Brokers, Messrs. Mullens, Marshall, Steer, Lawford & Co. £1,500

NATIONAL GALLERY,
Trafalgar Square, W.C. 2.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876, 1887 and 1911. The cost of administration in 1922–23 was estimated at £33,002.

Director, Sir Charles John Holmes ...£1,200 to £1,500
Assistant to Director, R. M. Gleadowe £250 to £600
Keeper and Secretary, C. H. Collins Baker £900
Assistant to Keeper, H. I. Kay ..... £250 to £600

NATIONAL GALLERY OF BRITISH ART
(The Tate Gallery), Millbank, S.W. 1.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, Senr., was opened to the public in 1910.

Director, Charles Aitken £1,000
Asst. Keeper, James B. Manson ..... £250 to £600

NATIONAL INSURANCE AUDIT DEPT.

Head Office, 2 Cambridge Gate, Regent's Park, N.W. 1.

By the National Insurance Act, 1911, it is provided that the accounts of Approved Societies, Branches, and Insurance Committees shall be submitted to audit by auditors appointed by the Treasury. This Department was created by the Treasury Minute of August 6, 1912.

Chief Auditor, D. H. Boggis-Rolfe.
Deputy do. & Secretary, W. A. Middleton, O.B.E.
Chief Inspector of Audit, M. W. Dixon.
Clerk in Charge of Accounts, R. McCormack.
Registrar, C. H. W. O'Brien, M.B.E.
Inspectors of Audit, (5); *Auditors, Cl. I.* (13), *Cl. II.* (23); *Assistant Auditors*, (27).

NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cross, W.C. 2.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander. The amount for salaries and expenses, including a grant of £1,063 for purchase of portraits, was estimated at £8,509 in 1922–23.

Director, Keeper, and Secretary, James D. Milner, F.S.A. £900

H.M. NAUTICAL ALMANAC OFFICE,
Royal Naval College, Greenwich, S.E. 10.

The "Nautical Almanac" was first published for 1767, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £4,916 in 1922–23.

Superintendent, P. H. Cowell, D.SC., F.R.S. £650
Chief Assistant, B. F. Bawtree ..... £400 to £500
Assistants, J. A. Sprigge; W. F. Doak, M.A., F.R.A.S.; T. C. Hudson, B.A., F.R.A.S. ..... £300 to £400

OBSERVATORIES.
Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory are estimated at about £1,600 annually.

Astronomer Royal, Sir F. W. Dyson, LL.D., F.R.S. £1,000 to £1,200
Chief Assistants, J. Jackson, M.A., B.SC., F.R.A.S.; H. S. Jones, M.A., B.SC., F.R.A.S. ..... £500 to £700
Assistants, Andrew C. D. Crommelin, D.SC., F.R.A.S.; C. Davidson, F.R.A.S.; W. Bowyer, F.R.A.S.; W. W. Bryant, B.A., F.R.A.S. (*Magnetic and Meteorological*) £200 to £600
Junior do. (*Higher Grade*), H. Furner, F.R.A.S.; P. J. Melotte, F.R.A.S.; W. M. Witchell, B.SC., F.R.A.S. (*acting Assist.*)..... £300 to £400
Clerical Assistant, D. J. R. Edney, F.R.A.S. £300 to £400

Royal Observatory, Cape of Good Hope.

Astronomer, S. S. Hough, M.A., F.R.S. ..... £867 to £967
Chief Assist., J. K. E. Halm, PH.D., F.R.A.S. £667 to £767
Assistants, W. H. Cox; J. Lunt, D.SC.; R. Woodgate £325 to £575

Other Astronomical Observatories.

Armagh, Rev. W. F. A. Ellison, M.A.

DEPARTMENT OF OVERSEAS TRADE
(DEVELOPMENT AND INTELLIGENCE),
(Joint Department of the Foreign Office and the Board of Trade).
35 Old Queen Street, S.W. 1.
City Branch Office, 73 Basinghall Street, E.C. 2.

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and

Board of Trade, and is represented in Parliament by a Parliamentary Secretary, who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary for the Board of Trade. The Department is concerned mainly with the promotion and development of overseas trade, and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has, in addition, taken over certain functions formerly performed by the Foreign Office in connexion with commercial intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £342,523 in 1922–23.

Parliamentary Secretary, Sir W. Joynson-Hicks, Bart., M.P. £2,000

Private Secretaries,

Comptroller-General, Sir William H. Clark, K.C.S.I., C.M.G. £1,500

PORT OF LONDON AUTHORITY.

Head Office, Tower Hill, E.C. 3.

The Port of London Authority, established under the Port of London Act, 1908 (8 Edw. VII., ch. 68), on the 31st March, 1909, for the purpose of administering, preserving, and improving the Port of London, consists of 29 members—20 appointed and 18 elected, with a Chairman elected by the Authority.

The following undertakings were transferred to the Port Authority as from the 31st March, 1909:—Thames Conservancy (all rights, powers, and duties of the Conservators of the Thames in respect of the river below Teddington); London and India Docks Company; Surrey Commercial Dock Company; Millwall Dock Company; and Watermen's Company, except certain property and funds. The working of the Port for the year ended March 31, 1922, showed a net surplus of £1,548,772, from which £100,000 special allocations were made and £1,448,772 carried forward.

Chairman, Rt. Hon. Viscount Devonport.
Vice-Chairman, Rt. Hon. Lord Ritchie of Dundee.

Appointed Members.

By the Admiralty, Adm. Sir A. M. Field, K.C.B., F.R.S.; (*Ministry of Transport*) J. D. Gilbert, M.P., H. Gosling, C.H.; (*Corporation of London*) Lord Ritchie of Dundee, J. M. R. Francis; (*L.C.C.*) J. P. Blake; Sir Cyril Jackson, K.B.E.; W. Devenay; Sir John Miller, K.C.S.I.; (*Trinity House*) Captain Sir Arthur W. Clarke, K.B.E.

Elected Members.

Seventeen members are elected by payers of dues, wharfingers and owners of river craft, and one by wharfingers.

F. C. Allen; Capt. Sir I. H. Benn, Bart., C.B., D.S.O., M.P.; Sir A. C. Cory-Wright, Bart.; J. H. Glover; C. S. S. Guthrie; C. F. Leach; Sir C. C. McLeod; L. A. Martin; H. T. Moore; Sir George Saltmarsh; O. H. Smith; C. F. Torrey; Sir M. C. Turner; W. Walker; W. Weddel; R. White; W. Varco Williams; Sir John Wimble, K.B.E.

Officers.

General Manager, David J. Owen.

Harbour Masters, (*Upper District*) Capt. D. R. Buchan, Old Swan Pier, E.C. 4; (*Lower District*) Capt. F. W. Kershaw, O.B.E., Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 1.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The administrative expenses of the Post Office (Salaries, Wages, etc., only) were estimated at £35,348,399 in 1922-23.

Postmaster-General, Rt. Hon. Neville Chamberlain, M.P. £2,500
Private Secs.,

Parliamentary Private Secretary, (*unp.*)
Secretary to the Post Office, Sir G. Evelyn P. Murray, K.C.B. £3,000
Private Secretary, Capt. D. O. Lumley. O.B.E.
Second Secretary, E. Raven, C.B. £2,200
Director of Postal Services, Br.-Gen. F. H. Williamson, C.B., C.B.E. ..... £1,200 to £1,500
Director of Telegraphs and Telephones, R. A. Dalzell, C.B.E. ..... £1,200 to £1,500
Assistant Secretaries, F. J. Brown, C.B., C.B.E.; J. Y. Bell; A. R. Kidner; W. T. Leech; W. E. Parsons; E. A. Francis ..... £1,000 to £1,200

PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on p. 153. Members of the Cabinet must be Privy Counsellors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, *q.v.* The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Most Hon. Marquess of Salisbury, K.G., G.C.V.O., C.B. £2,000

Private Sec. (vacant).

Clerk of the Council, Sir Almeric W. FitzRoy, K.C.B., K.C.V.O. £1,500

Deputy do. & Chief Clerk, Colin Smith ..... £700 to £900

Senior Clerk, Chas. J. Dalrymple Hay..... £600 to £800

Staff Clerk, C. W. Lumley ..... £400 to £500

THE PUBLIC RECORD OFFICE,

Chancery Lane, W.C. 2.

The Public Record Office as it now stands was completed in 1900 for the safe custody of the Public Records, which were first ordered to be kept by Henry I. at the beginning of the twelfth century. The administrative expenses were estimated at £39,473 in 1922-23. (For hours *see* p. 577.)

Keeper of the Records, The Master of the Rolls.

Deputy, Sir H. C. Maxwell-Lyte, K.C.B. £1,400

Secretary, A. E. Stamp..... £600 to £900

Assistant Keepers (1st Class), R. H. Brodie, I.S.O.; C. G. Crump; A. St. J. Story-Maskelyne; R. C. Fowler, O.B.E.; J. V. Lyle; M. S. Giuseppi; C. Johnson; H. E. Headlam; J. B. W. Chapman; C. T. Flower £600 to £900

Assistant Keepers (2nd Class), S. C. Ratcliff; M. C. B. Dawes; C. H. Jenkinson; J. J. O'Reilly; O. C. Chapman, O.B.E.; W. R. Cunningham; R. L. Atkinson, M.C.; C. S. B. Buckland; V. H. Galbraith; A. C. Wood, M.C.; D. L. Evans; K. H. Ledward £200 to £500

Land Revenue Records and Enrolments.

Keeper of the Records, Sir H. C. Maxwell-Lyte, K.C.B.

PUBLIC TRUSTEE OFFICE,

Kingsway, W.C. 2.

Public Trustee, Oswald R. A. Simpkin, C.B., C.B.E. £2,500

Assistant Public Trustee, Ernest King Allen, C.B.E. £1,200 to £1,500

Principal Clerks, J. H. Jacob, O.B.E.; R. S. Shuckburgh; P. F. Swain, C.B.E. ..... £700 to £900

Assistant Principal Clerk, J. S. Wilkes £550 to £650

Investment Managers, A. E. H. Conolly; W. Fuller-Smith; E. W. H. Theobald ..... £700 to £900

Officer in Charge of Legality of Investments, R. R. Whitty..... £500 to £700

Chief Property Adviser, H. Hadden ..... £700 to £900

Acceptance Officer, E. A. Lowndes..... £500 to £700

Assistant Acceptance Officer F. A. Coc... £350 to £500

Trust Officers, T. F. Bowman; G. Cooper-Willis; C. J. S. Cooke; A. S. Ellison; A. E. Glover; R. Higson; F. W. Hirst; R. T. Hughes; W. M. Limb; A. G. Mears; A. G. Norris; S. A. Poynder; G. M. Rowland; C. J. Stenning; R. M. Thrupp; H. M. Wallace..... £500 to £700

Chief Accountant, A. F. Day ..... £700 to £900

Assistant do., W. M. Ponking £700

Accountants, A. H. Craig; A. G. Feak; K. Hadfield; T. B. Henry ..... £450 to £650

Income Tax Department, F. W. Norledge £600

Cashier's Office, A. H. Cobbett, £450 to £650; G. E. Shelton (*Assistant*)..... £250 to £450

Securities Officer, A. J. H. Hughes, £400 to £600; H. Chown (*Deputy*) ..... £300 to £600

Signing Officer, J. H. E. Higgins ..... £500 to £700

Statistical Officer, H. A. Barnett ..... £350 to £550

Officer in charge of Depa. tmental Accounts and Staff Records, C. L. Thompso n..... £350 to £550

Registrar, F. W. Campion ..... £350 to £500

Superintendent of Women Staff, Miss F. D. Garner £280 to £400

Lady Visitor, Miss S. G. Clark ..... £250 to £350

MANCHESTER OFFICE, Albert Square, Manchester.

Deputy Public Trustee, T. M. Young £1,200 to £1500

Principal Clerk, P. Archer ..... £600 to £800

Trust Officers, G. P. Seed; A. A. Webster £400 to £600

Chief Accountant, F. E. Chapman ..... £450 to £650

Accountant, W. R. Howrie..... £350 to £550

Chief Clerk of Property Department, E. A. Ashby £400 to £600

Chief Clerk, Securities Section, H. Gregson £400 to £600

Staff Officer and Cashier, R. Watson ..... £350 to £550

PUBLIC WORKS LOAN BOARD,

Old Jewry, E.C. 2.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1922-23 the Commissioners approved loans amounting to £37,451,723, viz., £24,787,038 out of the Local Loans Fund and £2,664,685 out of the Land Settlement (Public Works Loan) Account. Of the total granted out of the Local Loans Fund the sum of £32,822,787 was for purposes of the Housing Acts.

The average annual amount of loans granted by the board during the period from 1875 6 (when the Commission was constituted in its present form) to 1919-20 was £2,906,846 per annum (the lowest amount previously granted being £49,591 in the financial year 1917-18, and the highest £10,955,8 4 in 1899-1900). The comparison with the total amount advanced by the board during the 103 years from its origin (in 1817) to 1919-20 is striking, for the total amount advanced during this period was, only £149,436,402, as compared with £61,643,748 granted during the single financial year 1920-21; and when it is remembered that the 103 years referred to witnessed almost the entire development of local government in England, the comparison appears even more remarkable.

The advances made out of the Local Loans Fund totalled £50,506,038, compared with £31,187,770 in 1920-21 The average rate of interest was:—

£	s.	d.			
6	3	10	per cent. in		1921-22
6	6	9	,,	,,	1920 21
5	15	7	,,	,,	1919-20
4	9	7	,,	,,	1918-19
4	11	11	,,	,,	1917-18
4	9	6	,,	,,	1916-17
3	19	10	,,	,,	1915-16

Loans granted during 1919-20 to Local Authorities for the purposes of State-as-isted Housing Schemes amounted to £51,041,211. The sum of £20,906,054, advanced by the Commissioners under the Housing Acts,

for providing Dwellings for the Working Classes during the year, is made up as follows:—

(A) Loans Secured on Local Rates.

	England.	Scotland
	£	£
(a) For State-aided schemes.....	28,124,739	875,281
(b) For non-State-aided schemes.	4,000	..
	28,128,739	875,281

(B) Loans Secured on Property.

	£	£
(a) For State-aided schemes :		
Public utility societies	964,632	19,612
(b) For non-State-aided schemes :		
Public utility societies	4,600	..
Individuals and Companies ..	3,190	..
	972,422	19,612

Grand Total.....£29,996,054

No applications for loans for land settlement purposes were refused; the advances made out of the Land Settlement Account during the year totalled £6,929,793.

Chairman, Hon. Herbert C. Gibbs .....*unp.*
Deputy-Chairman, Laurence Currie .....*unp.*
Secretary, H. G. H. Barnes £1,500
Assist. Secretary (Legal), D. F. Buckley £600 to £800
Assist. do. and Chief Clerk, H. A. Clark ...£600 to £800

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £200 in net annual value; the total amount so available for the year ending Dec. 31, 1922, was £31,111. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.
Chief Clerk, F. G. Hughes.
1st Class Clerks (Senior Division), John F. Sapsford; R. G. Rowland; E. Jump; D. Smeaton; W. Russell; W. J. P. Smith.
Do. (Junior Division), W. Holford; A. G. Spencer; S. D. Knight; J. H. Hurdman; W. J. Gimson; G. C. Baird.
Solicitor, W. G. Hannah.
Asst. Solicitors, E. J. Hare; N. H. Oldham.
Architect, Martin Skinner.
Accountant, M. S. Rogers.
Auditor, H. C. Garlant, 41 Finsbury Pavement, E.C. 4.

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH,

16 & 18 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1915, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organisation and development of Scientific and Industrial Research. The Committee of the Privy Council is now constituted as follows:—The Lord President, The Secretary of State for the Colonies, The Chancellor of the Exchequer, the Secretary for Scotland, the Chief Secretary for Ireland, The President of the Board of Trade, The President of the Board of Education, The Most Hon. The Marquess of Crewe, K.G., LL.D., The Rt. Hon. Viscount Haldane of Cloan, K.T., O.M., The Rt. Hon. Lord Gainford of Headlam, The Rt. Hon. Sir Arthur H. D. Acland, Bart., LL.D., The Rt. Hon. Arthur Henderson, M.P. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred. By Charter dated November 23, 1916, the official members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1916, a separate Department having its own Parliamentary Vote was created for the service of the Committee.

President of the Committee of the Privy Council, The Lord President of the Council.
Vice-Chairman of the Committee of Council, The President of the Board of Education.
Advisory Council, Sir William S. M'Cormick, LL.D. (*Chairman*); Sir George T. Beilby, LL.D., F.R.S.; Sir John Cadman, K.C.M.G., D.SC.; Prof. J. B. Farmer, F.R.S.; Sir Maurice Fitzmaurice, C.M.G., F.R.S.; Engr.-Vice-Adm. Sir G. Goodwin, K.C.B.; W. B. Hardy, SEC.R.S.; Principal J. C. Irvine, C.B.E., F.R.S.; Sir Henry A. Miers, D.SC., F.R.S.; Sir John F. C. Snell, M.INST.C.E.; Sir J. J. Thomson, O.M., F.R.S.; Sir Richard Threlfall, K.B.E., F.R.S.; Professor S. Young, F.R.S.

Staff of the Department.

Secretary, Sir H. Frank Heath, K.C.B. £2,200
Private Secretary, A. F. Barnes.
Principal Assistant Secretary H. T. Tizard £1,200 to £1,500
Assistant Secs., Ll. S. Lloyd, C.B.; A. L. Hetherington £1,000 to £1,200
Controller of Records, C. R. Young, O.B.E., D.SC.
Principals, L. C. Bromley; Maj. E. O. Henrici; W. A. M. Murray; P. J. Wheeldon (*Establishment Officer*), and E. Barnard, D.S.O. (*acting*).
Assistant Principals, A. F. Barnes; O. F. Brown; J. G. Evans; J. W. Gentleman; G. R. D. Hogg; R. O'F. Oakley; A. Zaiman.
Technical Officers, R. F. McKay; J. G. Mitchell, PH.D.; C. A. Spencer.
Assistant Accountant, A. R. H. Cox.
Staff Officer, C. D. James (*acting*).
Accounts Clerk, Miss E. A. Leighton.
Higher Grade Clerks, W. F. Law; W. V. Lodge.

Co-Ordinating Research Boards.

These Boards were established in 1920 (*a*) to provide for interchange of information between the various Government technical establishments concerning the special work which they undertake and the results achieved, so as to prevent duplication of work; though the Board should have no executive function as regards the work of these establishments; (*b*) to arrange for the communication of such information to interested persons outside the Government service when this can be done without detriment to the public interest; and (*c*) in the case of researches not otherwise adequately provided for to make the necessary arrangements to meet the requirements of Government Departments and others.

Chemistry Research Board.
Chairman, Sir Richard Threlfall, K.B.E., F.R.S.

Engineering Research Board.
Chairman, Sir Joseph E. Petavel, K.B.E., D.SC., F.R.S.

Physics Research Board.
Chairman, Sir J. J. Thomson, O.M., F.R.S.

Radio Research Board.
Chairman, Admiral of the Fleet Sir Henry B. Jackson, G.C.B., K.C.V.O., F.R.S.

Building (Materials and Construction) Research Board.

This Board was established in 1920 to consider and direct the conduct of Research on Building Materials and methods of construction.

Chairman, The Marquess of Salisbury, K.G., G.C.V.O.
Director of Research, H. O. Weller, M.INST.C.E.

Food Investigation Board.

Chairman and Director, W. B. Hardy, SEC.R.S.

Forest Products Research Board.

Chairman, Prof. J. B. Farmer D.SC., F.R.S.
Director of Research, Sir David Prain, C.M.G., F.R.S.

Fuel Research Board.

The Fuel Research Board was appointed by the Committee of the Privy Council in February, 1917, and is entrusted with the investigation of the nature, preparation, and utilisation of fuel of all kinds, both in the laboratory and, where necessary, on an industrial scale.
Chairman and Director, Sir G. Beilby, LL.D., F.R.S.
Assistant to the Director, C. H. Lander, D.SC.

Fuel Research Station.
East Greenwich, S.E. 10.

The Research Station, erected in 1918-19 by H.M. Office of Works, is designed and equipped to give effect to the Board's scheme of research which was described in their Report published by the Stationery Office in September, 1917.
Chief Engineer, Eng.-Comm. J. Fraser Shaw R.N.
Chief Chemist, J. G. King.
Senior Assistant, A. Blackie.
Assistants, D. McDougall; W. J. Skilling.
Staff Officer, C. B. Fitzgerald.

Geological Survey Board.

Chairman, Sir Francis G. Ogilvie, C.B., LL.D.

Geological Survey of Great Britain and Museum of Practical Survey.
Jermyn Street S.W. 1.

The Geological Survey and Museum was commenced in 1832; it was under the Science and Art Department from 1853 till 1900, when that Department became merged in the Board of Education. On Nov. 1, 1920, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country, and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world.

Director of Survey and Museum, J. S. Flett, O.B.E., D.SC., LL.D., F.R.S. £1,200
Assistants to Director, J. A. Howe, O.B.E.; W. Gibson, D.SC.
District Geologists, E. B. Bailey, M.C.; C. E. N. Bromhead; T. C. Cantrill; R. G. Carruthers; H. Dewey; C. H. Dinham; F. L. Kitchin, Ph.D. (*Palæontologist*); M. Macgregor; B. Smith; H. H. Thomas, SC.D. (*Petrographer*); W. B. Wright.
Senior Geologists, E. M. Anderson; E. L. Dixon; T. Eastwood; G. W. Lee, D.SC.; R. W. Pocock; J. Pringle; J. E. Richey, M.C.; R. L. Sherlock, D.SC.; C. B. Wedd; G. V. Wilson.
Geologists, J. K. Allan; W. Anderson; G. A. Burnett; C. P. Chatwin; H. G. Dines; F. H. Edmunds; V. A. Eyles; A. Fowler; D. Haldane; S. E. Hollingworth; W. Lloyd; A. G. MacGregor, M.C.; J. Maden; F. Marsden; J. Phemister; H. H. Read; T. Robertson; G. Ross; J. B. Simpson; J. V. Stephens; H. Tonks; F. M. Trotter; T. H. Whitehead; D. A. Wray..
Higher Grade Clerk, E. G. W. Elliott.

Museum.

Curator and Librarian, W. F. P. McLintock, D.SC.
Asst. Curator, A. F. Hallimond.
Assist. Librarian, C. V. Crook.

The National Physical Laboratory,
Teddington, Middlesex.

The National Physical Laboratory was founded in the year 1901 as a public Institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. Prior to the year 1918, the property of the Laboratory was vested in the President and the Council of the Royal Society, and the Laboratory was controlled by a General Board and an Executive Committee, appointed by the President and Council of the Royal Society, and comprising representatives of the Society and of the great Technical Institutions. As from April 1, 1918, the responsibility for the maintenance of the National Physical Laboratory was undertaken by the Department of Scientific and Industrial Research.

The Laboratory comprises eight main sections:—(1) The *Physics Department* includes divisions for Heat and Thermometry, Optics, Sound, and Radiology. (2) The main divisions of the *Electricity Department* deal respectively with Electrical Standards, General Electrical and Magnetic Measurements, Alternating Current Tests and Research, Direct Current Measurements and Photometry. (3) The *Metrology Department* is responsible for the Laboratory Standards of length, area, volume, and mass, and among the various branches of work dealt with are the verification of standards of length, standard bars, surveying tapes, &c., the testing of engineers' gauges, including screw gauges, measurements of area, volume, and mass, the testing of barometers, hydrometers, taximeters, watches and chronometers, and the highest class of scientific glassware for volumetric measurements. The glassware testing has recently been reorganised on an increased scale owing to the growth in the manufacture of such ware in this country during the war. When the Ministry of Munitions was formed, the Laboratory was called upon to undertake the testing of the gauges for the Ministry; the work assumed very large dimensions, and a special building for its accommodation was provided. (4) The *Engineering Department* carries out research on general engineering problems, especially in relation to the strength and properties of materials under stress; it comprises a laboratory and experimental track for tests of road materials. (5) The *Aerodynamics Department* conducts researches on aircraft models and parts as required by the Aeronautical Research Committee of the Air Ministry; investigations on light alloys and other materials, engines and accessories, seaplane floats, fabrics, &c., are carried out in other departments, especially the Engineering, Metallurgy, and Electrotechnics Departments, and the William Froude National Tank. (6) The *Department of Metallurgy and Metallurgical Chemistry*, in addition to researches on steels, and on aluminium and other alloys, is engaged on researches relating to Optical Glass. The equipment includes a rolling mill for the experimental working of alloys. The Metallurgical building was provided by Sir Julius Wernher in 1910. (7) The *William Froude National Tank*, the gift of Sir A. F. Yarrow for the service of the nation, carries out tests and researches on ship and propeller models for the information of designers and naval architects. (8) *Secretarial.*

Chairman of the General Board and Executive Committee, The President of the Royal Society.
Vice-Chairman, Sir Arthur Schuster, F.R.S.
Director, Professor Sir Joseph Petavel, K.B.E., D.SC., F.R.S.
Secretary, F. J. Selby, C.B.E.
Finance and Establishment Officer, A. Lumley.
Accountant, G. E. Bailey.
Assistant to the Secretary, G. R. Edwards.
Higher Grade Clerks, E. C. Cook; P. H. Durham; W. J. Gower; A. May; G. P. Score; H. Shepherd.

Physics Department.

Principal Assistants, T. Smith; G. W. C. Kaye, O.B.E., D.SC.
Senior Assistants, W. F. Higgins; E. Griffiths, D.SC.; E. A. Owen, D.SC.; J. Guild.
Assistants, J. S. Anderson; F. H. Schofield; A. H. Davis; Miss A. Everett.
Principal Observers, W. J. Boxall; G. Badderly; A. C. Cooper; A. G. Williams.

Electricity Department.

Principal Assistant, E. H. Rayner, SC.D.
Senior Assistants, S. W. Melsom; D. W. Dye; J. W. T. Walsh.
Assistants, H. C. Booth; R. L. Smith-Rose; H. Buckley; L. Hartshorn; R. S. J. Spilsbury; J. Hollingworth.
Principal Observer, W. H. H. Brookes.

Metrology Department.

Superintendent, J. E. Sears, C.B.E.
Principal Assistant, S. W. Attwell.
Senior Assistant, F. H. Rolt, O.B.E.
Assistants, E. G. Constable; F. A. Gould; V. Stott; G. A. Tomlinson; A. J. C. Brookes; W. H. Johnson; W. G. Ridge; J. S. Clark; H. P. Bloxam.
Principal Observer, H. A. Dear.

Engineering Department.

Superintendent, T. E. Stanton, C.B.E., D.SC., F.R.S.
Principal Assistant, C. Jakeman.
Senior Assistants, R. G. C. Batson; A. Bailey; J. H. Hyde.
Assistants, Miss D. Marshall; H. Gough; R. W. Fenning; H. J. Tapsell; G. A. Hankins.

Aerodynamics Department.

Superintendent, R. V. Southwell.
Principal Assistant, E. F. Relf.
Senior Assistants, A. Fage; J. L. Nayler.
Assistants, L. W. Bryant; T. Lavender; H. B. Irving; W. L. Cowley; L. F. G. Simmons; R. Jones; R. A. Frazer; A. S. Batson; E. Ower; C. N. H. Lock.

Department of Metallurgy and Metallurgical Chemistry.

Superintendent, W. Rosenhain, D.SC., F.R.S.
Principal Assistant, S. L. Archbutt.
Senior Assistants, J. Murdock; G. Barr, D.SC.; D. Hanson.
Assistants, W. H. Withey; J. L. Haughton, D.SC.; T. E. Rooney; V. H. Stott; P. G. Ward; Miss K. Bingham; Miss M. L. V. Gayler; J. D. Grogan; N. P. Tucker; C. B. Marryat; F. S. Tritton; F. Adcock.

The William Froude National Tank.

Superintendent, G. S. Baker, O.B.E., M.INST.N.A.
Senior Assistant, J. L. Kent.
Assistants, Miss E. M. Keary; G. H. Bottomley; W. C. S. Wigley.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851.

Offices, 1 Lowther Gardens, Exhibition Rd., S.W.7.

[Incorporated by Supplemental Charter as a permanent Commission after winding-up the affairs of the Great Exhibition, in 1851. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.]

President of the Royal Commission, H.R.H. the Prince of Wales, K.G.
Chairman, Board of Management, Viscount Esher, G.C.B., G.C.V.O.
Chairman, Science Scholarships Committee, Sir Richard Glazebrook, K.C.B., F.R.S.
Secretary to Commissioners, Evelyn Shaw, M.V.O.

THE NATIONAL SAVINGS COMMITTEE,

Princes House, Kingsway, W.C. 2.

SAVINGS CERTIFICATES.—The total number of Savings Certificates sold from their first issue in Feb. 1916 to March 21, 1922, was 575,436,093, their cash value being £445,962,972. Of this total the amount of £342,005,797 remained invested on March 31, 1922. On March 21, 1922, the price was advanced from 15s. 6d. to 16s. In 1921 the number sold was 54,385,739 (£42,148,948), and in the first three months of 1922 the number was 80,608,964 (£62,471,947). There are about 20,000 Savings Associations in co-operation with the movement.

President, Sir Robert M. Kindersley, C.B.E.
Chairman, Rt. Hon. Lord Islington, G.C.M.G., D.S.O.
Vice-Chairman, Sir T. G. Chambers, K.B.E.; Sir W. Schooling, K.B.E.
Members of Committee, Rt. Hon. G. N. Barnes, M.P.; Sir A. C. T. Beck, M.P.; Sir Joseph Burn, K.B.E.; T. Sir L. Gilmour; G. Ismay; Sir Hedley F. le Bas; Sir H. J. Mackinder, M.P.; Sir Arthur H. Marshall, K.B.E.; James Parker, M.P.; G. Stuart Robertson, K.C.; Stephen Walsh, M.P.; Hartley Withers; G. Arthur Anderson, M.B.E. (*Trustee Savings Banks*); Arthur Collins (*Municipal Treasurers and Accountants*); C. W. Crook (*National Union of Teachers*); R. M. Holland Martin, C.B. (*Joint Stock Banks*); Sir G. E. P. Murray, K.C.B. (*Post Office*); H. M. Richards, C.B. (*Board of Education*); Sir Aubrey Symonds, K.C.B. (*Ministry of Health*); Sir F. Shadforth Watts (*Chairman, Mercantile Marine Advisory Committee on Savings*).
Elected (October 1921). E. A. Cross, M.B.E.; F. R. Hughes, M.B.E.; Mrs. Muirhead, M.B.E.; E. Potts; W. Reep O.B.E.; J. Scott, M.B.E. *Re-elected*, Sir George Royle, O.B.E.; W. A. Platt, M.B.E.; W. H. Ashmole, M.B.E.; J. Mallaband; H. B. Morris; J. Voce.
Secretary, L. Margerison, C.B.E.
Accounting Officer, J. R. Phillips, O.B.E.
Director of External Organisation, Evan Hughes, C.B.E.
Commissioners, J. E. Holden, O.B.E.; Lt.-Col. P. F. Hone, D.S.O.; Maj. H. S. Johnson, C.B.E.; S. G. Jones, O.B.E.; J. A. Munday, O.B.E.; E. W. Stanger, O.B.E.; Miss E. N. Macrae, M.B.E.; Miss D. Deane; L. H. Beesley; H. J. Clare; G. G. L. Cruickshank; E. G. H. Jones; W. F. Macdonald.
Senior Clerks, T. Jordan; J. McMillan; R. D. Kingham, O.B.E.
Establishment Officer, W. H. Hare, M.B.E.

SCOTTISH OFFICE.

(*See* SCOTTISH SECTION, p. 544.)

STATIONERY OFFICE,

Prince's Street, Storey's Gate, S.W. 1; Gorse Street, Hollinwood, Lancs.; 25 Forth Street, Edinburgh; 1 St. Andrew's Crescent, Cardiff; 15 Donegall Square West, Belfast.

H.M. Stationery Office was established in 1782, and among its duties are the supply of books and stationery to Government Departments, and the superintendence and control of Government printing, &c., contracts. The Controller, under Letters Patent, is the King's Printer of Acts of Parliament, and in him is vested the Copyright in all Government publications. The amount estimated to pay the salaries, wages, &c., in 1922–3 was £418,287.

Joint Secretaries, H. Parker, M.C.; A. Wilson.

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 12 Conservators in 1857, the powers being reconstituted in 1894. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.

Chairman, Rt. Hon. Lord Desborough, K.C.V.O.
Vice-Chairman, Sir Robert Buckell.
Secretary, F. W. Geary.

BOARD OF TRADE.

Great George Street, S.W. 1.

(See also *Dept. of Overseas Trade*, (pp. 232-3), and *Patent Office* (p. 233))

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1786. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Gas Companies, Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In 1921 the powers and duties of the Ministries of Food and of Shipping were transferred to the Board of Trade.

President, Rt. Hon. Sir Philip Lloyd-Greame, K.B.E., M.C., M.P. £5,000
Private Secs., C. Patrick Duff; E. W. Reardon.
Chief Economic Adviser to H.M. Govt., Sir H. Llewellyn Smith, G.C.B.
Private Secs. H. F. Hill; W. G. Fergusson.
Permanent Secretary, Sir Sydney Chapman, K.C.B., C.B.E. £3,000
Private Secs., W. B. Brown; W. J. Galley.
Second Secretary, H. A. Payne, C.B. £2,200
Private Secs., H. J. Hutchinson; T. G. Jenkins, M.C.
Parliamentary Sec., Capt. Viscount Wolmer, M.P. £1,500
Private Sec., A. E. Overton, M.C.

Additional Parliamentary Secretaries.

(1) Sir William Joynson-Hicks, Bart., M.P. £2,000
Private Secs., C. J. Pyke (*Board of Trade*); A. Mullins, C.B.E. (*Dept. of Overseas Trade*)

Assist. Secretary, Kenneth J. M. Teesdale, M.B.E. £350

TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1612. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is usually Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for

the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House, these plans being accepted, modified, or rejected by the House. The amount estimated to pay the salaries and other expenses was £229,133 in 1922-23.

FIRST LORD OF THE TREASURY—

The Rt. Hon. Andrew Bonar Law, M.P. (*Prime Minister*) £5,000
Private Sec. to Prime Minister, Lt.-Col. Ronald Waterhouse, C.B., C.M.G.

Staff Clerk, W. Johnson ..... £400 to £500

TRINITY HOUSE, Tower Hill, E.C. 3

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland, and the Channel Islands, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice, to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues, levied on shipping using the ports of the United Kingdom. The accounts in connection with the Lighthouse Service are rendered to the Board of Trade, who have statutory control over the expenditure, and are submitted annually to Parliament. The accounts in connection with the Charitable Trusts are rendered to the Charity Commissioners. In addition to the public and trust funds which they administer, the Corporation have at their disposal certain private funds which are applied to the maintenance of their house on Tower Hill and to other corporate purposes. The Master of the Corporation at the present time is His Royal Highness the Duke of Connaught and Strathearn, K.G. There are ten Acting Elder Brethren, one of whom is a retired officer of the Royal Navy and the other nine are retired Commanders of the Mercantile Marine, and besides thre e Elder Brethren who have retired from the Active List there are a number of Honorary Elder Brethren, including His Majesty The King and other members of the Royal Family. The ten Acting Elder Brethren, one of whom always is Deputy Master, form the Board which carries out the public and corporate duties of the Trinity House.

ELDER BRETHREN.

H.M. The King; *Master*, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.; *Deputy Master*, Capt. Sir H. Acton Blake, K.C.M.G., K.C.V.O.; *Elder Brethren*, H.M. The King; Rt. Hon. WOODS, FORESTS, AND LAND REVENUES,

1 Whitehall, S.W. 1.

Administrative expenses, 1922–23, £39,593.

The Crown Lands.—The land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or *Civil List*. At the time of the surrender the gross revenues amounted to about £89,000, and the net return to about £11,000.

In the year ended March 31, 1922, the total Receipts by the Commissioners were £1,348,263, of which amount £1,052,550 was derived from Crown Rents, £15,183 from Windsor Parks and Woods, £59,018 from Royal Forests and Woodlands, and £105,299 from the Mines. The Expenditure was £543,243. The sum of £820,000 was paid to the Exchequer in 1922–23 as *Surplus Revenue*, being a net sum from which no deductions have to be made for administration.

Commissioners, The Minister of Agriculture and Fisheries, *ex-officio, unp.*; Sir Geo. Granville Leveson Gower, K.B.E. £1,500

Trustees, The First Commissioner of Works and the Rev. A. Buxton (Rector of All Souls).
Treasurer, W. J. Downer, C.B., C.M.G., I.S.O.

JUDICIAL STATISTICS.

Appellate proceedings fell from 1,508 in 1913 to 1,005 in 1918, and 1,126 in 1919. In the High Court of Justice the proceedings begun numbered in 1918 42,392, and in 1919 60,139, the figures for 1919 being 80 per cent. more than in 1913. The greater part of the increase occurred in the King's Bench Division, in which proceedings begun increased from 33,781 in 1918 to 47,590 in 1919. In the Chancery Division the figures increased from 4,771 to 5,636.

A large proportion of the actions and suits instituted are terminated without trial. In the King's Bench Division out of about 40,000 actions commenced in 1919 judgment was signed in 10,429 cases in default of appearance or other default by the defendant, and in 2,684 cases there were summary judgments for plaintiff without trial. About 25,000 cases were settled out of court, and in only 2,182 cases were actions set down for trial. The distribution between the different Assize Towns of the actions for trial on Circuit is very unequal. Out of the 851 actions no less than 576, or 68 per cent., were set down for trial at only five of the Assize Towns, namely, Manchester (225), Birmingham (128), Leeds (100), Liverpool (82), and Cardiff (41). The only other Assize Town with twenty or more actions for trial was Lewes (22). At thirty-three Assize Towns there were not more than five actions for trial, including seven towns at which there was none.

BANKRUPTCY STATISTICS.

England and Wales.

The total proceedings begun in all courts during 1918 was 488,958, as compared with 666,715 in the preceding year, a decrease of 177,757, or 27 per cent. As in previous years, the falling-off is almost wholly in proceedings commenced in county courts, these declining from 609,526 to 438,182, a decrease of 171,344, or 28 per cent. If the county court figures are excluded from the total of proceedings commenced, the decrease in the other courts was only 6,413, or 11 per cent.

Both bankruptcy petitions and companies winding-up proceedings have steadily diminished, the former since 1908 and the latter since 1912. Bankruptcy petitions fell from 3,933 to 1,276 during the war, a decrease of 68 per cent. Actions in county courts decreased from over 1,000,000 in 1914 to under 500,000 in 1918. On the other hand, the average amount claimed per plaint rose from £3 in 1913 to £4 7s. 6d. in 1918.

United Kingdom.

Total number of failures and liquidations in the United Kingdom from 1913–1920 :—

	Failures.	Liquidtns.		Failures.	Liquidtns.
1913 ...	6,757	2,042	1917 ...	2,113	1,386
1914 ...	5,412	2,093	1918 ...	988	1,230
1915 ...	4,742	1,745	1919 ...	1,006	1,428
1916 ...	3,112	1,658	1920 ...	2,264	2,859

CIVIL EXPENDITURE, 1922–23.

The Estimates for the Civil Services and Revenue Departments for the year ending March 31, 1923, show a reduction of £207,066,465 on those of the previous year, the respective totals being

Totals	£66,096,781	£82,015,937

CRIMINAL STATISTICS.

A further increase in crime is recorded in the year 1920–21, although the figures still bear no relation to the conditions of pre-war years. Following a steady decline during the continuance of hostilities, the number of persons imprisoned rose by 11,034 to a total of 39,787 in 1919–20, and in 1920–21 there was a further increase of 9,925 to an aggregate of 49,712.

Average for five years ended—	On indictment.	Convicted summarily.	Total convictions.
1903–4	7,792	159,308	167,100
1908–9	9,081	177,488	186,569

Director of Naval Service, Capt. W. Hose, C.B.E., R.C.N. (*Guelph*) ..... July 1, 1920

THE NAVY ESTIMATES, 1922–23.

£64,883,000 *net*; Decrease on 1921–22, £17,695,300.

The Navy Estimates for the financial year 1922–23 provide for a net expenditure of £64,883,700 as compared with £82,479,000 *net* in the year 1921–22. Provision is made for 98,500 officers and men instead of 118,500 in 1921–22.

Under the *Washington Naval Agreement* only two capital ships are to be laid down in 1922 (for completion in 1925) and no new building is contemplated until 1931. The capital ships retained under the Agreement are 22 (21 Pre-Jutland and one Post-Jutland) Battleships, until 1925, when the number will be reduced to 20 (17 Pre-Jutland and three Post-Jutland Battleships. By 1936 the strength will be reduced to 15 (seven Pre-Jutland and eight Post-Jutland) Battleships.

RELATIVE RANK IN THE ROYAL NAVY, ARMY, AND ROYAL AIR FORCE.

Royal Navy.	Army.	Royal Air Force.
1. Admiral of the Fleet.	1. Field-Marshal.	1. Marshal of the Air.
2. Admiral.	2. General.	2. Air Chief Marshal.
3. Vice-Admiral.	3. Lieutenant-General.	3. Air-Marshal.
4. Rear-Admiral.	4. Major-General.	4. Air Vice-Marshal.
5. Commodore.	5. Brigadier-General & Col. Comdt.	5. Air-Commodore.
6. Captain.	6. Colonel.	6. Group Captain.
7 Commander.	7. Lieut.-Colonel.	7. Wing-Commander.
8. Lieutenant-Commander.	8. Major.	8. Squadron Leader.
9. Lieutenant.	9. Captain.	9. Flight-Lieutenant.
10. Sub-Lieutenant and Mate.	10. Lieutenant.	10. Flying Officer (or Observer).
11. Commissioned Officer from Warrant Rank.	11. Second Lieutenant.	11. Pilot Officer.

SHIPS OF THE ROYAL NAVY (Oct. 31, 1922).

(Including the Royal Australian, New Zealand, and Canadian Navies.)

Arranged in their various classes.

§ To be scrapped under the Washington Treaty.

Battleships.

Type. Ships of Type.

Queen Elizabeth.—Malaya, Barham, Valiant, Warspite, Queen Elizabeth.
Turkish.—§Erin.
Royal Sovereign.—Royal Sovereign, Royal Oak, Revenge, Resolution, Ramillies.
King George V.—Ajax, Centurion, King George V.
Orion.—§Conqueror, Thunderer, §Monarch, §Orion.
Iron Duke.—Emperor of India, Benbow, Marlborough, Iron Duke.

Battle Cruisers.

Hood.—Hood.
Queen Mary.—Tiger.
Lion.—§Princess Royal, §Lion.
Indefatigable.—§Australia, §New Zealand.
Renown.—Repulse, Renown.

Cruisers.

Courageous.—Courageous, Glorious.
Devonshire.—Antrim.
Adelaide.—Adelaide.
"*E*"—Emerald, Enterprise.
"*D*"—Delhi, Dunedin, Danaë, Dauntless, Dragon, Durban, Despatch, Diomede.
Birmingham.—Hawkins, Vindictive, Effingham, Frobisher, Raleigh.
Carlisle.—Cairo, Calcutta, Carlisle, Colombo, Capetown.
Ceres.—Cardiff, Coventry, Curlew, Ceres, Curaçoa.
Caledon.—Caledon, Calypso Caradoc.
Centaur.—Concord, Centaur.
Cambrian.—Cambrian, Canterbury, Constance, Castor, Champion, Calliope.
Caroline.—Comus, Conquest, Carysfort, Cordelia, Caroline, Cleopatra.
Arethusa.—Royalist, Inconstant, Phaëton, Undaunted, Aurora.
Chatham.—Birmingham, Lowestoft, Southampton, Dublin, Brisbane, Sydney, Melbourne, Chatham.
Weymouth, Yarmouth, Dartmouth, Weymouth.

Coast Defence and Monitors.

Erebus, Terror (8,000 tons); Marshal Soult (6,670 tons), 2 15-inch guns; Monitors M 29 and M 33 (355 tons).

Torpedo-Boat Destroyers.

Built 184.
Building 6.

Aircraft Carriers.

Furious, Argus, Pegasus, Ark Royal, Hermes, Eagle.

Typical Ships.

Type.	Tons.	Main Armament.
Queen Elizabeth (1914)	27,500	8 15-inch
Turkish (1914)	27,500	8 15-inch

Chatham (1913)	5,400	8 6-inch
Weymouth (1911)	5,250	8 6-inch

Flotilla Leaders.

Admiralty type, 7; Thornycroft type, 5; *Marksman* type, 6; total, 18.

Submarines.

"*R*," 10; "*M*," 3; "*L*," 32; "*K*," 7; "*H*," 23; "*G*" 3 "*E*," 14; "*J*," 6; "*CH*," 2; "*X*," 1; total, 101.

Sloops, various "*A*" type, 30.

Coastal Motor Boats, 33.

Gunboats, *Nil.* **River Gunboats,** 17.

THE AIR PROGRAMME, 1922-23.

GREAT BRITAIN	12	squadrons.
OVERSEAS:		
India	6	squadrons.
Iraq	8	squadrons.
Egypt	3	squadrons.
Palestine and Trans-Jordania	1⅓	squadron.
Aden	⅓	squadron.
Malta	1	squadron.
	1	flight (for Aircraft Carrier).

ORDER OF WAR MEDALS.

THE Army Council has given instructions that stars and medals approved for service during the Great War will be worn in the following order:—1914 Star or 1914–15 Star; British War Medal; Mercantile Marine War Medal; Victory Medal: Territorial Force War Medal; India General Service Medal (for operations against Afghanistan, 1919).

THE KING'S PRIZE.

THE King's Prize at Bisley, 1922, was won by Lt.-Col. A. F. Marchment, D.S.O., M.C., 1st London Regt., with a score of 230. In 1921 the winner was Armourer-Sergt. J. Cunningham, late R.A.O.C.

NAVIES OF THE POWERS.

On July 1, 1921, there were sixteen capital ships in full commission in the United States Navy. The United States Fleet was then being redistributed, but as far as can be judged, the number for the fiscal year to July 1, 1922, will average approximately the same. Japan had eighteen capital ships in full commission. This figure did not include one battleship attached to gunnery school, nor one battle cruiser attached to torpedo school.

The figures of capital ships in commission for the British Empire were: Battleships 13, battle cruisers 3.

The number of capital ships laid down since the battle of Jutland was:—

	Built.	Building.
United States	1	16
Japan	1	5
British Empire	0	0

The United States battle cruiser *Ranger* is not counted as building, as she had not actually been laid down at the time.

The number of capital ships projected but not laid down, so far as was known, was: United States 1, Japan 10, British Empire 4.

BALANCE OF NAVAL POWER.

Position of the three leading Powers in capital ships in 1921 and as it will exist in 1924:—

	1921.		1924.
Great Britain	32 ships	...	32 ships
Displacement	808,200 tons	...	808,200 tons
Battle guns	284	...	284
Foot-tons energy	19,080,000	...	19,080,000
United States	17 ships	...	33 ships
Displacement	467,250 tons	...	1,117,850 tons
Battle guns	188	...	340
Foot-tons energy	11,989,176	...	28,597,176
Japan	11 ships	...	17 ships
Displacement	319,140 tons	...	543,140 tons
Battle guns	108	...	164
Foot-tons energy	7,480,000	...	13,415,400

THE WORLD'S SUBMARINES.

(May, 1921)

	Built.	Building.
Great Britain	92	8
U.S.A.	107	41
Brazil	3	nil
Chile	6	nil
Denmark	12	2
France	49	5
Germany	nil	nil
Italy	51	nil
Japan	24	15
Netherlands	13	2
Norway	4	2
Peru	2	2
Portugal	4	nil
Spain	4	6
Sweden	10	8
Russia	36	23

The British vessels exclude those earmarked for disposal, and include six Commonwealth vessels and two Dominion of Canada vessels. Four of the forty-nine French submarines have been condemned. Italy, the return for which excludes vessels earmarked for disposal, projects building four, and in the case of Russia the twenty-three in the course of construction include "one assembling, two in cases at Nikolaeff, twenty Petrograd—uncertain."

WARSHIP LOSSES IN THE WAR.

The total Allied losses to the date of the Armistice (Nov. 11, 1918) are stated at 803,000 displacement tons; those of the enemy at 415,000 displacement tons. The Scapa Flow "losses" are not included in the enemy total.

Class.	U.K.	U.S.A.	France.	Italy.	Japan.	Germany.	Austria-H.
Battleships	13	—	4	3	1	1	3
Battle Cruisers	3	—	—	—	—	1	—
Cruisers	25	1	5	2	4	24	2
Monitors	6	—	—	1	—	—	3
Destroyers	64	2	14	10	3	72	5

Canada	—	1,872,000	5 2
Japan	4,224,000	7,815,000	3 6

THE WAR OFFICE,
Whitehall, S.W. 1.

The business of the War Office proper appears to have been originally entrusted, about 1620, to a Committee of the Privy Council; the Clerk in attendance on that Committee being the Secretary at War. The Secretary at War had immense power in military matters, as holding the purse; but neither the Commander-in-Chief nor the Board of Ordnance was subject to him. In 1794, a Secretary of State was first appointed. The Office of Secretary at War was not terminated at this date, but, from 1855, it was amalgamated with that of Secretary of State for War until, in 1863, it was formally abolished by Act of Parliament.

In 1801, the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for the Colonies.

In 1855, the Commissariat Office, which was only a semi-military branch of the Army with headquarters at the Treasury, was transferred to the War Department: the Board of Ordnance was abolished, after an existence of more than three centuries; and the Board of General Officers and the Army Medical Department were also successively absorbed into the War Department. The year 1870 witnessed the final welding into one War Office of the civil administrative functions of the Secretary of State and the military administrative functions hitherto exercised at the Horse Guards. In that year, the War Office Act vested the direct and immediate control of every branch of Army administration in the Secretary of State. Before the appointment of a Secretary of State, the military control of the Army was, to a very great extent, in the hands of the Commander-in-Chief, who was subordinated to the Secretary of State from 1895 until the abolition of the Office in 1904. In 1904, an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army (Annual) Act of 1909 (9 Edw. VII. C. 3).

The Army Council, War Office, Whitehall, S.W. 1.

Secretary of State for War (President of the Army Council), The Right Hon. the Earl of Derby, K.G., G.C.B., G.C.V.O.
Principal Private Secretary, Kenneth Lyon, O.B.E.
Assistant do., E. B. B. Speed, M.C.
Military Secretary, Lt.-Gen. Sir W. E. Peyton K.C.B., K.C.V.O., D.S.O.
Under-Secretary of State (Vice-President), Lt.-Col. Hon. Walter Guinness, D.S.O., M.P.
Chief of the Imperial General Staff, General the Earl of Cavan, K.P., G.C.M.G., G.C.V.O., K.C.B.

THE REGULAR ARMY.

The Regular Army consists of the following units:—

Cavalry.

Household Cavalry.—The Life Guards and the Royal Horse Guards ("The Blues").
Cavalry of the Line—1st, 2nd, 3rd, 4th, 5th, 6th and 7th Dragoon Guards; 1st and 2nd Dragoons; 3rd, 4th, 7th, 8th, 10th, 11th, 13th, 14th, 15th and 18th Hussars; 9th, 12th, 16th and 17th Lancers; and 6th Dragoons.

Royal Regiment of Artillery.

Royal Horse Artillery.—Batteries, distinguished by letters.
Royal Field Artillery.—Batteries, distinguished by numbers.
Royal Garrison Artillery.—Companies, distinguished by numbers.

Corps of Royal Engineers.

The Corps consists of Electric, Field, Fortress, Postal, Printing, Railway, and Survey Companies, Bridging Train, etc.

Infantry Regiments.

The Foot Guards.—The Grenadier Guards (3 Battalions); the Coldstream Guards (3 Battalions); the Scots Guards (2 Battalions); the Irish Guards (2 Battalions); the Welch Guards (1 Battalion).
Line Regiments.—49 English Regiments (2 Battalions each); 3 Welch Regiments (2 Battalions each); 10 Scottish (5 Highland and 5 Lowland) Regiments (2 Battalions each); and

2 Irish Regiments (2 Battalions each); with the West India Regiment (2 Battalions) and the West Africa Regiment (1 Battalion).

The Machine Gun Corps.
Alexandra Palace, Wood Green, N. 22.
Consisting of Infantry, Cavalry, and Motor Units.

The Tank Corps.
Alexandra Palace, Wood Green, N. 22.

The Labour Corps.
Wheeler Gate, Nottingham.

The Royal Army Service Corps.
Woolwich Dockyard.

The Royal Army Medical Corps.
Crookham Camp, Aldershot.

The Army Dental Corps.
Woking.

The Royal Army Ordnance Corps.
Red Barracks, Woolwich.

The Royal Army Veterinary Corps.
Imperial House, Tothill Street, Westminster, S.W. 1.

The Royal Army Chaplains' Department.
War Office, S.W. 1.

Queen Alexandra's Imperial Military Nursing Service.
Under the Presidency of Queen Alexandra.

The Royal Army Pay Corps.
War Office, S.W. 1.

The Army Educational Corps.
War Office, S.W. 1.

Corps of Military Accountants.
War Office, S.W. 1.

THE ROYAL MARINES.

The Royal Marines (raised in 1664) consist of the Royal Marine Artillery and the Royal Marine Light Infantry. The force appears in the official Navy List as well as in the official Army List, but it is administered solely by the Admiralty. In the table of precedence in the Army the Royal Marine Light Infantry ranks between the Royal Berkshire Regt. (the 49th Foot) and the Royal West Kent Regt. (the 50th Foot).

THE AUXILIARY FORCES.

THE MILITIA.

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained:—The Royal Malta Artillery, the Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 the terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored. The force now comprises the following units:—

Cavalry.—1 Regiment (King Edward's Horse).
Artillery.—R.F.A. and R.G.A.
Royal Engineers.—All branches.
Infantry.—The 3rd Battalion of Infantry Regiments of the Line (and in some cases the battalion next in numerical order) is specially retained as Militia.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welch, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

Territorials in the War.—The strength of the Territorial Force in July, 1914, was about 265,000. During the Great War 310 new units were formed, and there passed through the ranks of the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers, and nearly 600,000 other ranks, of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

STRENGTH OF THE ARMY.

Army Estimates of the effective and non-effective services for 1922–23 show the number of men on the Establishment of the Army, exclusive of India, at 152,836, this figure including 20 Cavalry Regiments, 162 Batteries of Artillery, 10 Guards Infantry Battalions, 162 Infantry Battalions, and ancillary and auxiliary services, the distribution being as under:—

Service.	Home.	Abroad.
Cavalry	9 Regiments	11 Regiments
Artillery	80 Batteries	82 Batteries
Guards	9 Battalions	1 Battalion
Line	62 Battalions	62 Battalions

This figure compares with 201,127 in 1921–22.

Including permanent staff, the *Territorial Army* consists of 14 Divisions, the Artillery comprising batteries of 4 guns, and the Infantry Battalions having an establishment of 21 Officers and 637 other ranks. Included with this force is an *Air Defence Force* of 220 Officers and 2,708 other ranks. On Feb. 1, 1922, the total strength of the Territorial Army was 132,912.

ARMY ESTABLISHMENT.
Exclusive of India
(April 1, 1922).

	Officers	O.R.	Total.
British Troops:—			
Home	7,848	103,572	111,420
Colonies	575	8,130	8,705

THE FORCES IN INDIA.
(April 1, 1922).

	1914	1922
British	77,672	70,340
Indian	155,395	147,463
Total	233,067	217,803

RESERVES, MILITIA, AND TERRITORIALS.

For the *Army Reserve* £1,288,000 is provided, the maximum number of reservists drawing pay during the current financial year being estimated at 73,000. The formation of the *Militia* was not proceeded with in 1921-22, but in the present estimates £1,000,000 is taken to enable recruiting to be opened in the course of 1922-23.

A total of £5,653,500 is provided for the *Territorial Army*, against £7,573,300 in 1921-22. The establishment which as contemplated in 1921-22 was 216,000 all ranks, exclusive of permanent staff, has been reduced to about 180,000. The maximum strength provided for is 170,000 officers and men, exclusive of permanent staff, as compared with 210,000 in 1921-22. The Territorial Army comprises the following Units, etc. :—

—	Off'rs.	O.R.	Total.
Calvary	380	5,146	5,526
Artillery	1,787	32,697	34,484
Engineers	412	11,118	11,530
Air Defence Troops	216	2,708	2,924
Signals	331	6,071	6,402
Infantry	3,528	107,058	110,586
Tank Corps	112	1,424	1,536
R.A.S.C.	164	1,352	1,516
R.A.M.C.	776	2,604	3,380
R.A.O.C.	43	427	470
R.A.V.C.	139	324	463
Totals	7,888	170,929	178,817

The Permanent Staff comprises 346 Adjutants and 1,548 Instructors.

COST OF THE ARMY.

The Army Estimates for 1922-23 provide for an expenditure of £62,300,000, a reduction of £31,414,000 compared with the year 1921-22. The establishment provided consists of 152,836 all ranks, as compared with 201,127 all ranks in 1921-22; or, adding Colonial and Indian troops, a total of 215,000 all ranks, against 341,000 in 1921-22.

THE ARMY AND THE WAR

The total number of men recruited in the three kingdoms from Aug. 4, 1914, to Nov. 11, 1918, was 4,970,902. The contributions of the various countries, and the percentage of enlistments to population, were as under :—

	Numbers Recruited.	Percentage of Total Popul'n.	Male Popul'n.
England	4,006,158	11·57	24·02
Wales	272,924	10·96	21·52
Scotland	557,618	11·50	23·71
Ireland	134,202	3·07	6·14

The number of men granted exemption was 2,741,988, of whom 2,169,707 were classed as in reserved occupations.

At Oct. 1, 1918, the aggregate strength of the Army, including the Territorial Force, but exclusive of Dominion and Indian troops, was 3,838,265, of whom 147,738 were officers. The *maximum* strength was attained at the beginning of 1918, when the total stood at 3,887,649—154,777 officers and 3,732,872 other ranks.

The distribution of the Army on Oct. 1, 1918, was as follows :—

	All ranks.		All ranks.
Home	1,427,069	Egypt	199,842
Colonies	16,995	Mesopotamia	111,283
India	83,878	Russia	3,547
France	1,763,980	East Africa	8,737
Italy	73,735		
Salonica	149,189	Total strength	3,838,265

Casualties in all theatres of operations from Aug. 14, 1914, to Sept. 30, 1919, totalled 2,471,152.

	Officers.	Other ranks.
Killed	33,337	540,170
Wounded	74,082	1,569,387
Missing	9,362	244,814
Totals	116,781	2,354,371

Of the last category, 5,215 officers and 149,093 men, reported as prisoners of war, were released.

The *Official Termination of the War*, when all Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921.

WAR CASUALTIES, 1914-1919.

British Empire.

	Deaths.	Wounded.

POST WAR EXPENDITURE.

The *Navy and Army Estimates* for Great Britain, the United States, France and Japan for 1913–14 and for 1920–21 (before the *Washington Conference* met) are shown below :—

NAVY ESTIMATES.

	1913–14.	1920–21.
United Kingdom	£48,809,300	£90,872,300
United States	29,180,000	134,468,717
France	21,292,000	16,619,909
Japan	10,700,000	48,820,520

ARMY ESTIMATES.

	1913–14.	1920–21.
United Kingdom	£28,416,000	£164,750,000
United States	$316,000,000	$911,000,000
France	Fr. 913,750,000	Fr. 6,546,000,000
Japan	Yen 97,545,515	Yen 230,000,000

The French figures are for 1921 ; those for the U.S. include Air Force and Pensions ; those for France and Japan include Air Force.

The Royal Air Force.

THE KING,

Chief of the Royal Air Force.

The Air Ministry, Adastral House, Kingsway, W.C. 2.

The Air Ministry was established in 1918 to take over the control of the Royal Air Force, which was formed by the amalgamation of the Royal Naval Air Service and the Royal Flying Corps. The Air Force (Constitution) Act, 1917, provides for the administration of matters relating to the Air Force and to the defence of the Realm by air, to be vested in the Air Council.

In addition, the Air Navigation Act enacts that the purposes of the Air Council shall include all matters connected with air navigation.

The Air Council.

Secretary of State and President of the Air Council, Sir Samuel John Gurney Hoare, Bart., C.M.G., M.P.
Under-Secretary of State for Air and Vice-President of Air Council, The Duke of Sutherland.
Chief of the Air Staff and Senior Air Member of Council, Air-Chief-Marshal Sir H. M. Trenchard, Bart., K.C.B., D.S.O., A.D.C.
Air Member for Personnel, Air Vice-Marshal O. Swann, C.B., C.B.E.
Air Member for Supply and Research, Air Vice-Marshal Sir W. G. H. Salmond, K.C.M.G., C.B., D.S.O., *p.s.c.*
Secretary, Sir Walter Frederick Nicholson, K.C.B.

Secretary of State.

Sir Samuel John Gurney Hoare, Bart., C.M.G., M.P.
Parliamentary Private Sec.,
Air Secretary and Private Sec., Group Capt. E. R. Ludlow-Hewitt, C.M.G., D.S.O., M.C., A.D.C.
Assist. Private Sec., Ft.-Lt. G. W. Dobson, O.B.E.

Department of the Under Secretary of State.

*Under Secretary of State for Air**, The Duke of Sutherland.
Private Secretary,

C. R. Samson, C.M.G., D.S.O., A.F.C. ..... Jan. 1, 1922
R. H. Clark Hall, C.M.G., D.S.O. ..... Jan. 1, 1922
T. C. R. Higgins, C.M.G. ..... June 30, 1922
A. E. Borton, C.B., C.M.G., D.S.O., A.F.C. ..... Oct. 1, 1922

THE METEOROLOGICAL OFFICE.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and in 1919 the Office was attached to the Air Ministry. The control is vested in a Director and Committee appointed by the Air Council. The Gassiot Committee of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the British Rainfall Organisation was transferred to the Meteorological Office in July, 1919.

President of Committee, Rt. Hon. Lord Gorell, C.B.E., M.C. (*Under Secretary of State for Air*).
Director of Meteorological Office, G. C. Simpson, C.B.E., D.SC., F.R.S.
Assistant Directors, C. Chree, D.SC. F.R.S. (*Observatories*), R. G. K. Lempfert, C.B.E., M.A. (*Contributive Stations*), Lt.-Col. E. Gold, D.S.O., F.R.S. (*Forecast*).
Superintendents, Commr. L. A. Brooke Smith, R.D., R.N.R. (*Marine*); J. S. Dines, M.A. (*Forecast*); Maj. A. H. R. Goldie, M.A. (*Local Centres*); Capt. D. Brunt, M.A. (*Army*); F. J. W. Whipple, M.A. (*Climatology*); R. Corless, O.B.E., M.A. (*Instruments*); M. de C. S. Salter (*British Rainfall Organisation*); Commr. L. G. Carbett, R.N. (*Navy*); A. Crichton Mitchell, D.SC., F.R.S.E. (*Scotland*).
Secretary of Advisory Committee on Atmospheric Pollution, J. S. Owens, M.D., A.M.I.C.E.

Superintendents of Observatories.

Central (Kew), C. Chree, D.SC., F.R.S.
Magnetic (Eskdalemuir), A. Crichton Mitchell, D.SC., F.R.S.E.
Western (Valencia, co. Kerry), L. H. G. Dines, M.A., A.M.I.C.E.
Aerological (Benson, Oxon), W. H. Dines, F.R.S.

CIVIL AVIATION.

RETURNS supplied voluntarily by civil aerial transport firms in the United Kingdom for the year 1921 show that for Great Britain and on the Continental route 23,152 flights were made, and 5,850 machine hours were flown, the mileage totalling approximately 452,000. The number of passengers carried was 42,680, and the weight of goods carried amounted to 19 tons. During this period 73 pilots were licensed for the first time and 215 licences were renewed, the number of licences current at the end of the year being 150; 158 aircraft were licensed for the first time and 133 licences were renewed, the number of licences for aircraft in force at the end of the year being 239.

The following figures show the proportion of accidents over the whole period:

Total accidents reported	14
Approximate number of machine miles flown per accident	32,300
Approximate number of machine flights per accident	1,654
Approximate number of machine hours flown per accident	418

During the period under review two pilots (including one unlicensed) were killed and four injured, and one passenger was killed and two injured. There were no injuries to third parties.

THE NATIONAL ASSEMBLY.

UNDER the *Church of England Assembly (Powers) Act*, 1919, there is a National Assembly to deliberate on all matters concerning the Church of England—not to deal with spiritual doctrines or the duties of the Ministry, but with the framework and rules within which the Church works. The Act gave power to set up an Assembly consisting of three Houses, composed of the Bishops, the Clergy and the Laity respectively. The first two Houses consist of the Convocations of Canterbury and York, of which the respective Upper Houses form the *House of Bishops*, and the respective Lower Houses the *House of Clergy*; the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conference, which consists of representatives elected by members of the Church of England on a roll prepared in each parish.

The *Church Assembly* is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters, but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the statutory manner. It is specially provided that any innovation touching doctrinal formulæ, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rights thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed under the Act by Parochial Church Meetings of parishioners who are full members of the Church of England and by Church Councils elected by such meetings.

Statistics.—The Easter communicants in the various English Dioceses in 1920 numbered 2,171,619; the number of children attending Sunday Schools was 2,233,111. In the year ended Dec 31, 1920, the sum of £10,493,716 was contributed for Church work, the sum of £4,760,799 being for General Purposes and £5,732,917 for Parochial Purposes.

New Sees.—At the Summer group of Sessions of the Assembly of 1922 it was proposed to create new Sees, as follows:—

Winchester.—The diocese to be divided into three—*Winchester*, *Guildford*, and *Portsmouth and the Wight*. *Peterborough.*—A See of *Leicester* to be created, the diocese to consist of the county of Leicestershire. *Lichfield.*—The diocese to be relieved by the creation of a See of *Shrewsbury*, the diocese to consist of the county of Shropshire, including that part of it which is now in the diocese of Hereford. *Southwell.*—The diocese to be relieved by the creation of a See of *Derby*, the diocese to consist of the county of Derbyshire (except Glossop, see under Manchester). *Manchester.*—The diocese to be divided by the creation of a See of *Lancaster*, to consist of the part of the diocese which lies north of the river Wyre and those parts of the county of Lancashire which are now in the diocese of Carlisle. A *mid-Lancashire* diocese to be created, to consist of the present Archdeaconry of Blackburn, except the rural deanery of Rawtenstall. The deaneries of Stockport and Mottram to be transferred from Chester to Manchester, and that of Glossop from Southwell to Manchester.

The Revised Lectionary.—The *Revised Table of Lessons measure* was moved by the Archbishop of Canterbury and was carried, the voting being 25 Bishops, 119 Clergy and 127 Laity *for*, and 4 Clergy and 51 Laity *against*, majority *for*, 216.

Meetings in 1923.—The Assembly will meet in 1923 as follows:—Jan. 29 to Feb. 2; July 2 to 6; Nov. 12 to 16.

The Clergy and the Cost of Living.—Owing to the increase in the cost of living (*see* p. 511), the Ecclesiastical Commissioners for England continued (in 1921) the special grants made in 1920. The maximum grant to an incumbent with a benefice of net income not exceeding £300 per annum is £30; the addition made to the curate grants is at the rate of 15 per cent.

MEMBERS OF CONVOCATION.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.

The Right Rev. the Lords Bishops of Bath and Wells; Birmingham; Bristol; Chelmsford; Chichester; Coventry; Ely; Exeter; Gloucester; Hereford; Lichfield; Lincoln; London; Norwich; Oxford; Peterborough; Rochester; St. Albans; St. Edmundsbury and Ipswich; Salisbury; Southwark; Southwell; Truro; Winchester; Worcester.

Registrar, F. H. Lee.

Apparitor-General, H. T. A. Dashwood.

Lower House.

Prolocutor, Rt. Rev. Bishop Ryle, D.D., Dean of Westminster.

The Very Rev. the Deans; the Venerable the Archdeacons; and the Elected Proctors.

Actuary, Guy Bowman.

PROVINCE OF YORK.

Upper House.

President.—The Most Rev. the Lord Archbishop.

The Right Rev. the Lords Bishops of Bradford; Carlisle; Chester; Durham; Liverpool; Manchester; Newcastle; Ripon; Sheffield; Sodor and Man; Wakefield.

Lower House.

Prolocutor, Rt. Rev. the Bishop of Beverley, D.D.

The Very Reverend the Deans of the Province; two Archdeacons from each Diocese, and the Elected Proctors.

Registrar, A. V. Hudson, Minster Yard, York.

DIOCESES OF THE CHURCH OF ENGLAND.

*The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income.*

Province of Canterbury.

*CANTERBURY. £15,000.

94th Archbishop and Primate of All England, Rt. Hon. and Most Rev. Randall Thomas Davidson, G.C.V.O., D.D. (*consecrated* 1891). (Lambeth Palace, S.E. 1.) [Signs Randall Cantuar:] 1903

St. Patrick's National Cathedral, Dublin.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

General Synod,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. L. A. Pooler, D.D. : J. A. Maconchy ; Major E. H. C. Wellesley and Rev. C. K. Irwin, B.D.

Secretary to the Representative Church Body (incorporated 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin ; *Asst. Sec.* Canon R. A. Kernan B.D.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the General Synod, which meets annually.

Subject to the General Synod are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz. :—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on Dec. 31, 1921, was only £89,498, charged with annuities to 28 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,887,276, made up of *Commutation* £89,498, *Private Endowments* £342,470, *Parochial Sustentation* £6,662,973, *Episcopal Sustentation* £561,681, *General Synod Funds* £597,119, and *Miscellaneous purposes* £1,633,535.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £9,006,539. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £334,229. The total amount of *assessment* for stipend paid by parishes, 1921, was £123,456, and the total amount paid for *stipends* under Diocesan Schemes was £337,468.

The number of members of the Church of Ireland, by the Census of 1911, was 524,375, or 12·0 per cent. of the entire population.

Registrar of the Episcopal Synod, George J. Wood, W.S., 14 Young Street, Edinburgh

Churches, Mission Stations, &c., 418. Parsonages, 195. Clergy, 329. Communicants, 55,206.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and lay representatives from the Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,825 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1921 was 745,783. The sum of £790,269 was raised in 1921 for church and missionary purposes. Within the last 50 years 500 chapels, at a cost of over £1,830,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,457. There are in addition 247 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. The *First Book of Discipline*, published in 1560, abolished the imposition of hands in the ordination of the clergy, but superintendents were appointed to appoint ministers and to plant and erect kirks. The Church, so reformed, was governed by a General Assembly composed of the Superintendents, ministers, and lay commissioners. A *Second Book of Discipline* was sanctioned by the Scots Parliament in 1581. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1610, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form, and the very first official act of a sovereign of the British Empire on his *accession* is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act*, 1921, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland, is enquiring into the question of endowments, with a view to legislation in regard thereto.

LORD HIGH COMMISSIONER, The Duke of Sutherland.

MODERATOR (1923),

Principal Clerk, Rev. David Paul, D.D., Edinburgh.
Depute Clerk, Rev. J. A. McClymont, C.B.E., D.D.
Procurator, Hon. Wm. Watson, K.C.
Agent, A.L. Menzies, W.S., 54 Castle St., Edinburgh.
Parliamentary Solicitor, A. H. Spens, London.

OTHER PRESBYTERIAN CHURCHES.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries, and 2 Continental Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1921, there were 1,482 congregations and 42 preaching stations. The total membership was 531,849, and there were 2,038 Sunday Schools, with 197,817 scholars and 22,935 teachers. In 17 Foreign Mission Fields there are 399 European Mission Agents and 5,152 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,455,655 at home, and £201,602 abroad.—*Moderator* (1922-3), Rev. Dr. Donald Fraser.—*Offices*, 121 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland.*—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 35 presbyteries, 611 ministers, 562 congregations, with 106,483 communicants, 91,659 families, 7,224 Sabbath-school teachers, and 100,071 scholars. During the year 1921-22 this branch contributed by congregational effort £381,027 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £483,511. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 12 professors and 2 lecturers, and has 31 ministerial with 3 medical and industrial missionaries in foreign parts.—*Moderator*, Rt. Rev. W. G. Strahan, D.D., Newry. *General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 14 presbyteries, 351 congregations, 9 preaching stations, and 84,375 members. It has a Theological College (Westminster College, Cambridge), and supports 89 missionaries abroad, including 41 women. In 1921 the amount raised for all purposes was £388,479.—*Church Offices:* 15 Russell Square, W.C. 1. *Gen. Sec.*, Rev. W. Lewis Robertson, M.A. *Fin. Sec.*, Percy Graham. *Pubs. Office*, 21 Warwick Lane, Paternoster Row, E.C. 4.

(4) The less numerous divisions are: The *Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics are: Ministers, 56,494; local preachers, 97,531; members and probationers, 10,386,972; Sunday schools, 94,857; officers and teachers, 922,361; scholars, 9,182,637; churches and other preaching places, 100,130. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. The Wesleyan Conference will be held at Sheffield in 1922.—*Pres.*, Rev. John R. Wakerley; *Sec.*, Rev. Thomas Kirkup.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. H. J. Taylor.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. E. F. H. Capey; *Secretary*, J. P. Bridgwater.

INDEPENDENT METHODISTS.

4. *Independent Methodists.*—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President*, T. Lomax.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*President*, J. Abbott.

FINANCES.

Finances.—The *Wesleyans* raised in 1920–21 £301,381 to sustain their very extensive missionary operations. At the same time their Home missionary income was £53,447. The *Primitive Methodists* raised £11,731 for new chapels, and the *United Methodist Church* £37,525 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.	Ministers.	Lay Preachrs.	Members	On Probation.	Chapels.	Sunday Scholars.

The Calvinistic Methodist (Presbyterian) Church of Wales.

The CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welch origin, and embraces a very large section of the Welch-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany.

In 1922 the body numbered—churches, 1,486; chapels and other buildings for Sunday-school branches, 1,779; ministers and preachers, 1,161; elders, 7,101; communicants, 187,260; on probation, 1,802; Sunday-school teachers and officers, 24,290; teachers and scholars, 189,202; adherents (including communicants), 319,484.

Contributions in aid of the Ministry in 1922, £206,487. For various religious purposes (including the ministry), £495,240.

One of the features of the Welch churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language used generally in these schools.

The English branch of the Church has 382 chapels and preaching stations, with 33,232 communicants and 85,131 adherents (including communicants). All the rest are Welch.

The churches in Assam number 1,026; communicants, ; 60,088 adherents (including communicants), 67,117. The adherents in Brittany are few.

Moderator (*South Wales*) *Synod*, Rev. R. R. Roberts, B.A., Cardiff; (*North Wales*), Rev. E. O. Davies, B.Sc., Llandudno.

Moderator of General Assembly, Rev. W. Jones, Aberdulais.

Statistical Secretaries, Rev. D. E. Thomas, Llanstephan, and Rev. Richard Thomas, B.A., Bontnewydd.

The Independents and the Baptists.

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churchas were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine districts were formed, each under a Moderator. There are 51 county and other Associations in England and Wales, with 4,702 churches and preaching stations containing 1,727,442 sittings; the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales*, 1922–23, Rev. Thomas Yates; 1923–24, Rev. Dr. A. R. Henderson. *Secretary*, Rev. Richard J. Wells. *Chief Clerk*, C. Stancliff. *Office and Publication Department*, 22, Memorial Hall, Farringdon Street, E.C. 4.

The *Countess of Huntingdon's Connexion*, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, W.C. 1.

The BAPTISTS are, in all respects but one, similar to the Congregationalist; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1921, 4,180 chapels and 2,078 pastors. The members numbered 402,688, Sunday-school teachers 56,543, and Sunday scholars 517,969. In the United States the "members" alone number 7,804,449 *President of the Baptist Union*, 1922–23, (to be elected Nov. 21, 1922). *Secretary*, Rev. J. H. Shakespeare, D.D. *Office*, Baptist Church House, Southampton Row, London, W.C. 1.

Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the **Unitarians**, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. S. H. Mellone, D.Sc., Essex Hall, Essex Street, W.C.2. The **Brethren** (divided into two bodies, "Open" and "Exclusive") number about 80,000, of whom five-eighths belong to the "Open" body. The **Society of Friends (Quakers)**, consists of 19,049 members and has 390 places of worship in Great Britain, with 29 places of worship in Ireland and 2,281 members. *Central Offices* (*Great Britain*), 136 Bishopsgate, E.C. 2, (*Ireland*), 6 Eustace Street, Dublin. The **Churches of Christ** have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,729 teachers, and 16,811 scholars. The **Moravian Church** (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 43 congregations and preaching stations, with 3,680 communicants. The **Catholic Apostolic Church** has above 80 churches, including a fine Gothic building in Gordon Square, W.C.; the New Church (**Swedenborgian**), 75 societies, with about 6,700 registered members; the Latter-Day Saints (**Mormons**) have 82 churches. The **Reformed Episcopal Church** originated in the U.S.A. (1873) and is now working on Evangelical lines in U.S.A., Canada, Great Britain and India. *Presiding Bishop*, Rt. Rev. F. Vaughan, D.D.; *Bishop of Southern Diocese*, Rt. Rev. J. Louis Fenn, LL.D.; *Gen. Sec.*, Rev. W. Welby Prior, B.D., Trinity Rectory, South-end-on-Sea; *Southern Diocesan Sec.*, Rev. P. T. Norris, B.A., Harlesden. The **Old Roman Catholic Church**: *Archbishop in Great Britain*, Most Rev. Bernard Mary Williams, The Edge, Stroud, Glos. The **Greeks** (*Bishop of Central and Western Europe and the United Kingdom*, Archbishop Germanos; *Great Archimandrite*, Very Rev. C. Pagonis, St. Sophia's Vicarage, Moscow Road, W. 2) have churches in London, Manchester, Liverpool, and Cardiff. The **Armenians** have churches in London and Manchester; the **French, Dutch, Swedes**, and **Swiss** in London, Norwich, and Canterbury; and there is a mosque for **Moslems** in London.

The Jews.—Among the inhabitants of the United Kingdom are about 300,000 **Jews**, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. Chief Rabbi's Office, 4, St. James's Place, Aldgate, E.C. 3. The Jews support their own poor. Their number throughout the world is computed at 14,000,000.

In *England* and *Wales* there are 4 Archiepiscopal and 13 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 114 Episcopal Sees, with 54 Vicariates and 10 Prefectures.

The *Catholic Directory* of 1922 estimates the Catholic population of England and Wales (1921) at 1,931,991, Scotland 603,094, Ireland (Census figures 1911) 3,242,670. The figures for India (1921) are 2,144,610, Ceylon (1921) 367,350, Canada (1920) 3,268,837, Australian Commonwealth (1911) 996,804, New Zealand (1916) 151,605, and Union of South Africa (1911) 91,035, the total for the British Empire being 14,186,610; and the Catholic population of the world is estimated at 316,888,975.

THE SALVATION ARMY was founded by General William Booth (*b.* 1829, *d.* 1912). In Dec., 1921, the number of *Officers*, *Cadets* and *Employés* was 27,398, of *Corps* and *Outposts*, 12,982, *Local Officers*, 80,281. The number of countries occupied was 76, and of languages used 48. Connected with the Salvation Army are numerous philanthropic institutions, including 214 Industrial Homes for Fallen Women, 46 Maternity Homes and 93 Children's Homes, 177 Slum Posts, 15 Prison-Gate Homes, 272 Shelters and Cheap Food Depôts for the Homeless, 181 Workshops and Factories, 97 Labour Bureaux, 12 Farms, &c. More than 40,000 open-air meetings are held weekly, and a still larger number in the various halls of the organisation. At a large number of police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. The total raised during "Self-Denial Week" in 1922 amounted to £158,221. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C. 4.—GENERAL, Bramwell Booth (1912), Queen Victoria Street, London, E.C. 4.

THE UNIVERSITY OF OXFORD.

OXFORD UNIVERSITY TERMS 1923.

Hilary, or Lent, Jan. 15 to March 24.
Trinity, April 4 to July 7.
Michaelmas, Oct. 10 to Dec. 17.

UNIVERSITY OFFICERS, &c.

	Elect.
Chancellor, The Marquess Curzon of Kedleston, K.G., D.C.L., *All Souls*	1907
High Steward, The Viscount Birkenhead, Hon., D.C.L., *Merton*	1922
Vice-Chancellor, L. R. Farnell, D.Litt., Rector of *Exeter*	1920

HOSTELS.

Selwyn College (1882), J. O. F. Murray, D.D., *Mast.*
Non-Collegiate Students (1869), W. F. Reddaway, M.A., *Censor.*

Colleges for Women.

GIRTON COLLEGE.

Mistress, Miss Bertha S. Phillpots, O.B.E., Litt.D.
Vice-Mistress and Bursar, Miss E. M. Allen.
Junior Bursar, Miss P. K. Leveson.
Librarian, Miss E. S. Fegan.
Secretary, Miss M. Clover, Coleby, Grange Road, Cambridge.

NEWNHAM COLLEGE.

Principal, Miss B. A. Clough.
Tutors, Miss A. B. Collier; Miss J. P. Strachey; Miss Steele Smith; Miss E. M. Chrystal.
Bursar, Mrs. Lacy.

THE UNIVERSITY OF LONDON,

South Kensington, S.W. 7. 1836 and 1900.

During the Session 1921–22 the total admissions amounted to 7,092; the number of internal students in May, 1922 was 8,758.

Visitor, H.M. the King in Council.
Chancellor, Rt. Hon. Earl of Rosebery, K.G., K.T., D.C.L., LL.D., F.B.A., F.R.S.
Vice-Chancellor, H. J. Waring, M.S., B.Sc., F.R.C.S.
Chairman of Convocation, Robert Mullineux Walmsley, D.Sc.
Principal Officer, Sir Cooper Perry, M.A., M.D., F.R.C.P.
Registrars: (*Academic Council*) Edwin Deller, LL.D.; (*External Council*) G. F. Goodchild, M.A.; (*University Extension Board*) J. Lea, M.A.
Secretary to the Senate, Percy M. Wallace, M.A.
Sec. to Finance Committee,
Supt. of Examinations, Robin Roscoe, B.A.
Goldsmiths' Librarian, Reginald Arthur Rye.
Accountant, Oliver Greenwood, A.S.A.A.

Representative in Parliament,
Public Orator, Prof. E. A. Gardner, Litt.D.

THE SENATE.

The Chancellor, The Vice-Chancellor, The Chairman of Convocation. *By the Crown*, Sir William H. Beveridge, Hon. W. N. Bruce, Prof. Sir Arthur Schuster, Dr. W. C. Unwin. *By Convocation*—(*Divinity*), Rev. J. A. Douglas; (*Arts*), Miss E. C. Higgins, Rev. J. Scott Lidgett, S. L. Loney, Miss E. Strudwick, Rev. H. B. Workman; (*Laws*), His Honour T. B. Napier; (*Music*), C. B. Edgar; (*Medicine*), Dr. T. D. Lister, Dr. E. G. G. Little; (*Science*), C.W. Crook, G. D. Dunkerley, Dr. C. W. Kimmins, Sir Philip Magnus, Sir Sydney Russell-Wells, G. J. Senter. *By Royal College of Physicians*, Dr. J. Fawcett, Sir Wilmot P. Herringham. *By Royal College of Surgeons*, F. F. Burghard, R. Johnson. *Co-opted to represent University College*, Sir Gregory Foster, A. T. Taylor. *Co-opted to represent King's College*, Dr. E. Barker, *By King's College (Theological Department)*, Rev. W. R. Matthews. *By Lincoln's Inn*, N. Micklem. *By Inner Temple*, W. R. Bousfield. *By Middle Temple*, Sir Robert A. McCall. *By Gray's Inn*, Lord Justice Atkin. *By Law Society*, J. W. Budd, Sir R. Gregory. *By Corporation of London*, J. R. Pakeman. *By London County Council*, Sir Wm. J. Collins, Sir J. Gilbert. *By City and Guilds of London Institute*, Dr. G. N. Pitt. *By the Faculties*—(*Theology*), Rev. Prof. S. W. Green; (*Arts*), Prof. H. G. Atkins, Prof. E. A. Gardner, Prof. M. J. M. Hill, Miss M. J. Tuke; (*Laws*), Prof. A. F. Murison; (*Music*), Prof. Sir Frederick Bridge; (*Medicine*), Lord Dawson of Penn, H. L. Eason, H. J. Waring; (*Science*), Prof. A. Dendy, Prof. L. N. G. Filon, J. L. S. Hatton, Dr. A. N. Whitehead; (*Engineering*), Dr. H. C. H. Carpenter; (*Economics*), Prof. Graham Wallas.

Organisation of Teaching.

On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, the Francis Galton Laboratory for National Eugenics at University College, the Ratan Tata Department of Social Science and Administration at the London School of Economics and Political Science, and the Institute of Historical Research in Malet Street.

TEACHING STAFF.

The numbers of the "Appointed" and "Recognised" Teachers in the several Faculties are as follows:—

Theology, 0 and 21; *Arts*, 74 and 130; *Laws*, 5 and 9; *Music*, 1 and 20; *Medicine*, 300 and 354; *Science*, 74 and 209; *Engineering*, 9 and 77; *Economics*, 21 and 19.

UNIVERSITY PROFESSORS.

Accounting and Business Methods (*Cassel*) L. R. Dicksee, M.Com., F.C.A.
Anatomy, E. Barclay-Smith, M.D.; J. E. S. Frazer, F.R.C.S.; T. B. Johnston, M.B.; F. G. Parsons, F.R.C.S.; G. Elliot Smith, M.D.; W. Wright, D.Sc.; T. Yeates, M.B.
Applied Mathematics and Mechanics (*Goldsmid*), L. N. G. Filon, D.Sc., F.R.S.
Arabic, Sir T. W. Arnold, C.I.E., Litt. D.
Archæology (*Yates*), E. A. Gardner, Litt.D.
Architecture, A. E. Richardson, F.R.I.B.A.
Aviation (*Zaharoff*), Sir R. T. Glazebrook, F.R.S.
Bacteriology, J. W. H. Eyre, M.D.; R. T. Hewlett, M.D.; J. C. G. Ledingham, C.M.G., D.Sc.
Bacteriology (*Goldsmiths'*), W. Bullock, M.D., F.R.S.
Banking and Currency (*Cassel*), (vacant).
Biochemistry, J. C. Drummond, D.Sc.; A. Harden, D.Sc., F.R.S.
Botany, R. R. Gates, Ph.D.; Dame Helen C. I. Gwynne-Vaughan, D.B.E., D.Sc.; W. Neilson-Jones, M.A.
Botany (*Quain*), F. W. Oliver, D.Sc., F.R.S.
Central European History, R. W. Seton-Watson, D.Litt.
Chemistry, A. J. Allmand, D.Sc.; C. S. Gibson, O.B.E., M.Sc.; T. S. Moore, M.A.; J. R. Partington, M.B.E., D.Sc.; R. H. Aders Plimmer, D.Sc.; C. K. Tinkler, D.Sc.; W. B. Tuck, D.Sc.
Chemistry (*Daniell*), S. Smiles, O.B.E., D.Sc., F.R.S.
Chemistry (*General*), F. G. Donnan, C.B.E., Ph.D., F.R.S.
Chemistry (*Organic*), J. Norman Collie, LL.D., F.R.S.
Civil Engineering, A. H. Jameson, M.Sc., M.I.C.E.
Civil and Mechanical Engineering, E. G. Coker, D.Sc., F.R.S.; E. H. Lamb, D.Sc.
Classical Literature, W. C. Flamstead Walters, M.A.
Classics, J. H. Sleeman, M.A.
Commerce, A. J. Sargent, M.A.
Commercial and Industrial Law (*Cassel*), H. C. Gutteridge, M.A.
Comparative Law (*Quain*), J. E. G. de Montmorency, LL.B.
Constitutional Law, J. H. Morgan, M.A.
Dutch Studies, Pieter Geyl, Litt.D.
Economic History, Mrs. L. C. A. Knowles, Litt.D.
Education, J. W. Adamson, B.A.; T. P. Nunn, D.Sc.
Egyptology (*Edwards*), W. M. Flinders Petrie, D.C.L., F.R.S., F.B.A.
Electrical Engineering, J. A. Fleming, D.Sc., F.R.S.
Do. (*Siemens*), Ernest Wilson, M.I.E.E.
Embryology, J. P. Hill, D.Sc., F.R.S.
Engineering, W. E. Dalby, B.Sc., F.R.S.
English Bibliography, A. W. Pollard, C.B., D.Litt.
English History, A. F. Pollard, Litt.D., F.B.A.
English Lang. and Literature, Sir I. Gollancz, Litt.D., F.B.A.; Sir Sidney Lee, Litt.D., F.B.A.
Do. (*Quain*) R. W. Chambers, D.Lit.
English Literature, Miss C.F.E. Spurgeon, Litt.D.
Ethnology, C. G. Seligman, M.D., F.R.S.
Eugenics (*Galton*), Karl Pearson, LL.D., F.R.S.
Experimental Pathology, W. S. Lazarus-Barlow, M.D.; C. J. Martin, C.M.G., D.Sc., F.R.S.; Sir Almroth E. Wright, K.B.E., C.B., M.D., F.R.S.
Fine Art (*Slade*), Henry Tonks, F.R.C.S.
French and Romance Philology (*Fielden*), L. M. Brandin, Ph.D.
French Literature, F. Y. Eccles, M.A.
Geography, L.W. Lyde, M.A.; J. T. Unstead, D.Sc.
Geology, W. T. Gordon, D.Sc.
Geology (*Yates-Goldsmid*), E. J. Garwood, Sc.D., F.R.S.
German, R. C. Priebsch, Ph.D.; J. G. Robertson, Ph.D.
Greek, J. A. Platt, M.A.
Helminthology, R. T. Leiper, D.Sc.
History, Miss Hilda Johnstone, M.A.
History & Culture of British Dominions in Asia, &c., H. H. Dodwell, M.A.
History of Art, C. T. Borenius, Ph.D.
Hygiene (*Chadwick*), H. R. Kenwood, C.M.G., M.B.
Hygiene and Public Health, W. J. R. Simpson, C.M.G., M.D.
Imperial History (*Rhodes*), A. P. Newton, D.Lit.
International Law, A. P. Higgins, C.B.E., LL.D.
Italian, Antonio Cippico; Dr. Jur.
Latin, H. E. Butler, M.A.; D. H. Slater, M.A.; H. Williamson, M.A.
Logic & Scientific Method, A. Wolf, D.Lit.
Mathematics (*Astor*), M. J. M. Hill, Sc.D., F.R.S.
Mathematics, H. Hilton, D.Sc.; G. B. Jeffery, D.Sc.; A. E. Jolliffe, M.A.; S. A. F. White, M.A.
Mechanical Engineering, G. Cook, D.Sc.
Mediæval History, F. J. C. Hearnshaw, LL.D.
Medical Zoology, A. W. Alcock, C.I.E., LL.D., F.R.S.
Medicine, T. R. Elliott, C.B.E., D.S.O., M.D., F.R.S.; F. R. Fraser, M.B.; F. S. Langmead, M.D.; H. MacLean, M.D.
Modern French History and Institutions, Paul Vaucher, L-ès-L.
Modern Greek & Byzantine History, &c. (*Korais*), A. J. Toynbee, B.A.
Morbid Anatomy, S. G. Shattock, F.R.C.S., F.R.S.; H. M. Turnbull, D.M.
Municipal Engineering (*Chadwick*), M. T. M. Ormsby, A.R.C.S.
Music (*King Edward*), Sir Frederick Bridge, C.V.O., Mus.Doc.
Obstetrics and Gynæcology, Miss A. L. McIlroy, O.B.E., M.D.
Pathology, Sir F. W. Andrewes, O.B.E., M.D.; L. S. Dudgeon, C.M.G., C.B.E., F.R.C.P.; J. McIntosh, M.D.
Pathology (*Graham*), A. E. Boycott, D.M., F.R.S.
Pathology (*Dunn*), Adrian Stokes, D.S.O., O.B.E., M.D.
Persian, Sir Denison Ross, C.I.E., Ph.D.
Pharmaceutics, H. G. Greenish, F.I.C.
Pharmacology, A. J. Clark, M.D.; F. Ransom, M.D.
Philosophy, H. Wildon Carr, D.Litt.
Philosophy of Mind and Logic (*Grote*), C. E. Spearman, Ph.D.
Phonetics, Daniel Jones, M.A.
Physics, F. Horton, D.Sc.; C. H. Lees, D.Sc., F.R.S.; W. Wilson, D.Sc.
Physics (*Joel*), S. Russ, D.Sc.
Physics (*Quain*), Sir W. H. Bragg, K.B.E., D.Sc., F.R.S.
Do. (*Wheatstone*), O. W. Richardson, D.Sc., F.R.S.
Physiology, B. J. Collingwood, O.B.E., M.D.; Miss W. C. Cullis, O.B.E., D.Sc.; C. A. Lovett-Evans, D.Sc.; W. D. Halliburton, M.D., F.R.S.; J. Mellanby, M.D.; V. H. Mottram, M.A.; M.S. Pembrey, M.D.; H. E. Roaf, M.D.; S. Vincent, M.D.

Physiology, (Jodrell), E. H. Starling, C.M.G., M.D., F.R.S.
Physiology, General, Sir W. M. Bayliss, D.Sc., F.R.S.
Political Economy, E. Cannan, LL.D.; H. S. Foxwell, M.A., F.B.A.
Political Science, Graham Wallace, M.A.
Portuguese (Camoens), (vacant).
Public Administration, S. J. Webb, LL.B.
Radiology, (vacant).
Russian, Sir Bernard Pares, K.B.E., M.A.
Sculpture, (vacant).
Social Philosophy, E. J. Urwick, M.A.
Sociology (Martin White), L. T. Hobhouse, D.Litt.; E. A. Westermarck, Ph.D.
Statistics, A. L. Bowley, Sc.D.
Surgery, G. E. Gask, C.M.G., D.S.O., F.R.C.S.; C. A. Pannett, M.D.
Swahili and Bantu, Miss Alice Werner, L.L.A.
Town Planning, S. D. Adshead, M.A., F.R.I.B.A.
Veterinary Pathology and Bacteriology, Sir John McFadyean, LL.D.
Zoology, Arthur Dendy, D.Sc., F.R.S.
Zoology and Comparative Anatomy (Jodrell), D. M. S. Watson, M.Sc.

UNIVERSITY COLLEGE, Gower Street, W.C. 1.
Chairman of Committee, Viscount Chelmsford.
Provost, Sir Gregory Foster.

KING'S COLLEGE, Strand, W.C. 2.
Chairman of Delegacy, Viscount Hambleden.
Principal, Ernest Barker, LL.D.

KING'S COLLEGE FOR WOMEN.
Household and Social Department, Campden Hill Road, W. 8.
Dean, Miss Lane-Claypon, M.D., D.Sc.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.
Warden, T. Raymont, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.

Hackney College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.

Regent's Park College, N.W. (Baptist).
Principal, Rev. H. Wheeler Robinson, M.A.

King's College (Theological Department), Strand, W.C. (Church of England).
Dean, Rev. W. R. Matthews, D.D.

Wesleyan College, Richmond (Wesl. Methodist).
Principal, Rev. A. Barber, D.D.

St. John's Hall, Highbury (Church of England).
Principal, Rev. A. W. Greenup, D.D.

Arts, Science, and Engineering:—

East London College, Mile End Road, E.
Principal, John L. S. Hatton, M.A.

Arts and Science:—

Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.

Bedford College for Women, Regent's Park, N.W. 1.
Principal, Miss M. J. Tuke, M.A.

Birkbeck College, Bream's Buildings, E.C. 4.
Principal, George Senter, D.Sc.

Arts:—

Westfield College, Hampstead, N.W. 3.
Principal, Miss Eleanor C. Lodge, M.A.

Arts—in Pedagogy only:—

London Day Training College, Southampton Row, W.C. 1.
Principal, Prof. T. P. Nunn, D.Sc.

— Arts—in Oriental Research only:—

School of Oriental Studies, Finsbury Circus, E.C. 2.
Director, Prof. Sir Denison Ross, C.I.E., Ph.D.

Medicine:—

The Medical Schools of certain Hospitals, &c. (*see* pp. 296-7).

Science and Engineering:—

Imperial College of Science and Technology:—
Royal College of Science and Royal School of Mines.
Rector, Sir Alfred Keogh, G.C.B., G.C.V.O., C.H., LL.D.
City and Guilds (Engineering) College.
Dean, Prof. W. E. Dalby, M.A., F.R.S., M.Inst.C.E.

Science—in Agriculture only:—

South-Eastern Agricultural College, Wye, Kent.
Principal, Robert H. Wilson, B.Sc.

Laws and Economics and Political Science:—

London School of Economics and Political Science, Houghton Street, Aldwych, W.C. 2.
Director, Sir William H. Beveridge, K.C.B., M.A., B.C.L.

THE UNIVERSITY OF DURHAM. 1832.

Chancellor, The Earl of Durham, K.G.
Vice-Chancellor, Prof. A. Robinson, D.C.L.
Proctors, P. J. Heawood, M.A.; W. N. Haworth, D.Sc.
Registrar, H. G. Theodosius, M.A.
Librarian, E. V. Stocks, M.A.
Hon. Director of Observatory, Col. E. H. Grove-Hills, C.M.G., D.Sc., F.R.S.
Observer, Frank Sargent, F.R.A.S.

UNIVERSITY COLLEGE, Durham.
Master, Rev. Henry Ellershaw, M.A.

HATFIELD COLLEGE, Durham.
Master, F. B. Jevons, D.Litt.

ST. CHAD'S COLLEGE, Durham.
Principal, Rev. S. R. P. Moulsdale, B.D.

ST. JOHN'S COLLEGE, Durham.
Principal, Rev. C. S. Wallis, M.A.

BEDE COLLEGE, Durham.
Principal, Rev. Donald Jones, B.D.

ST. MARY'S COLLEGE, Durham.
Principal, Miss R. E. D. Donaldson, M.A.

NON-COLLEGIATE STUDENTS.
Censor, Rev. J. H. How.

HOME STUDENTS (Women).
Censor, Kathleen Lambley, M.A.

COLLEGE OF MEDICINE, Newcastle.
President, David Drummond, C.B.E., M.D.

ARMSTRONG COLLEGE, Newcastle.
Principal, Sir Theodore Morison, K.C.S.I., K.C.I.E., D.C.L.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£2,000.)

Founded 1850; re-organised 1880 and 1903.
Chancellor, Viscount Morley of Blackburn, O.M.
Vice-Chancellor, Sir Henry A. Miers, D.Sc., F.R.S.
Senior Pro Vice-Chancellor, Edward Fiddes, M.A.
Internal Registrar, Norman Smith, D.Sc.
External Registrar, H. P. Turner, M.A., LL.B.
Bursar, Sydney Chaffers, M.A.
Director for Women Students, Phoebe Sheavyn, D.Litt.
Chairman of Convocation, Mrs. Mary Tout, M.A.
Clerk of Convocation, A. E. G. Chorlton, LL.B.
Sec., Faculty of Arts, C. S. S. Higham, M.A.
Sec., Faculty of Science, J. E. Myers, C.B.E., D.Sc.

TRAINING DEPARTMENT (for Men and Women).
Professors, J. J. Findlay, PH.D.; H. Bompas Smith, M.A.

HALLS OF RESIDENCE.
Men—Dalton Hall, *Princ.*, J. W. Graham, M.A.
,, —Hulme Hall, *Warden*, Rev. T. Nicklin, M.A.
,, —St. Anselm's Hall, *Warden*, Rev. Lindsay Dewar, B.D.
Women—Ashburne Hall, *Warden*, Mrs. Hope-Hogg, M.A.
,, —Lees Hall, *Warden*, Miss Elsie A. Underwood, B.Sc.
,, —Ward Hall, *Warden*, Miss May.
,, Ellis Lloyd Jones Hall, *Warden*, Miss C. Spurling, M.A.
,, —Langdale Hall, *Warden*, Mrs. Guthkelch, B.A.
,, St. Gabriel's Hall, *Warden*, Miss F. Whatley

THE UNIVERSITY OF BIRMINGHAM.
Birmingham, 1900. (£2,000.)

Chancellor, Rt. Hon. Lord Robert Cecil, K.C., M.P.
Vice-Chancellor, Sir Gilbert Barling, Bart., C.B., C.B.E., F.R.C.S.
Principal, C. Grant Robertson, C.V.O., M.A.
Vice-Principal, Sir William Ashley, PH.D., M.Com.
Registrar, John H. Costain.
Secretary, George H. Morley, M.Com.

THE UNIVERSITY OF LIVERPOOL.
Liverpool, 1903. (£2,000.)

Chancellor, The Earl of Derby, K.G., G.C.V.O., C.B., LL.D.
Vice-Chancellor, J. George Adami, C.B.E., M.D., F.R.S.
Registrar, Edward Carey, LL.B.
Librarian, John Sampson, M.A., D.Litt.

HALLS OF RESIDENCE.
Men—Warden, G. Grant, B.A.
Women—Warden, Miss D. Chapman, M.A.

THE UNIVERSITY OF LEEDS.
Leeds, 1904. (£36,000.)

Chancellor, The Duke of Devonshire, K.G., G.C.M.G., G.C.V.O., LL.D.
Pro-Chancellor, E. G. Arnold.
Vice-Chancellor, Sir Michael E. Sadler, K.C.S.I., C.B., LL.D.
Accountant, G. R. Brench.
Clerk to the Senate, F. T. Baines, B.A.
Registrar, A. E. Wheeler, M.A.
Librarian, R. Offor, B.A.

UNIVERSITY OF SHEFFIELD. 1905. (£2,000.)

Chancellor, The Marquess of Crewe, K.G.
Pro-Chancellors, Lt.-Col. H. K. Stephenson, D.S.O., M.P., LL.D.; Sir A. J. Hobson, LL.D.
Vice-Chancellor, Sir W. Henry Hadow, C.B.E., M.A., D.Mus.
Treasurer, D. Vickers, M.P.
Registrar, W. M. Gibbons, O.B.E., M.A.
Librarian, A. P. Hunt, B.A.
Curator of the Observatory,
Tutor for Women Students, Mrs. Storr Best, M.A.
TRAINING DEPARTMENT (for Men and Women).
Professor, G. H. Turnbull, M.A.

UNIVERSITY OF BRISTOL. 1909.

Medical Officer,
Headmaster, Maj. J. W. West, A.E.C.

QUEEN VICTORIA SCHOOL,
Dunblane, Scotland.

Commandant, Maj. G. W. Smith, O.B.E.
Qr.-Mr. & Adjt., Maj. N. Macrae, D.S.O.,
Headmaster, Capt. A. F. Barnes, M.C., A.E.C.

MISCELLANEOUS.

COLLEGE OF PRECEPTORS, Bloomsbury Square, W.C. 1.

All persons engaged in education who have passed an examination satisfactory to the Council are admissible as members. Diplomas granted are F.C.P., L.C.P., and A.C.P.
President, Sir Philip Magnus, Bart., M.P., F.C.P.
Dean, W. G. Rushbrooke, LL.M., F.C.P.
Treasurer, G. Armitage Smith, D.Lit., F.C.P.
Secretary, G. Chalmers.

GILCHRIST EDUCATIONAL TRUST,
1 Plowden Buildings, Temple, E.C. 4.

Founded by the late Dr. Gilchrist (died 1841), for "the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the maintenance of Scholarships, to the carrying on of lectures on scientific and other subjects for artisans, and to the assistance of approved educational objects.
Trustees, Rt. Hon. Lord Shuttleworth, LL.D., *Chairman*; Walter Leaf, Litt.D.; Sir Michael E. Sadler, C.B., LL.D.; Rt. Hon. Lord Richard Cavendish, C.M.G.
Secretary, A. H. Fison, D.Sc.

LONDON PAROCHIAL CHARITIES
(Trustees of the), 3 Temple Gardens, E.C. 4.

[The income (£126,457) is applied mainly in support of Polytechnics, in furtherance of Technical Education, in grants of pensions, and for the maintenance of City Churches.]
Chairman of Governors, Sir Evan Spicer.
Vice-Chairman, L. B. Sebastian.
Clerk, Ernald R. Warre.

MUSIC.

ROYAL ACADEMY OF MUSIC (1822),
York Gate, Marylebone Road, N.W. 1.

[The R.A.M. was founded in 1822 by Lord Burghersh (afterwards Earl of Westmorland) for the cultivation of the science of music. The average number of students attending in 1922 was 730. There are 122 Fellows (F.R.A.M.), 594 Associates (A.R.A.M.), and 8,782 Licentiates (L.R.A.M.), of whom 413 Licentiates were elected in 1921.]
President, H.R.H. the Duke of Connaught, K.G.
Chairman of Committee, Philip L. Agnew, M.A.
Principal, Sir A. C. Mackenzie, K.C.V.O., Mus.D.
Lady Superintendent, Mrs. Russell, A.R.A.M.
Secretary, J. A. Creighton.

ROYAL COLLEGE OF MUSIC (1883),
Prince Consort Road, South Kensington, S.W. 7.

Patron, H.M. The King.
President H.R.H. The Prince of Wales, K.G.
Director, Sir Hugh Percy Allen, Mus.Doc.
Hon. Secretary, George A. Macmillan, D.Litt.
Registrar, Claude Aveling, M.A.

ROYAL IRISH ACADEMY OF MUSIC,
Westland Row, Dublin.

Secretary, C. E. Grahame-Harvey.

GUILDHALL SCHOOL OF MUSIC (1880).
John Carpenter Street, E.C. 4.

[The School grants a diploma of Licentiateship (L.G.S.M.) and of Associateship (A.G.S.M.), open to students of eight terms' standing and over.]
Principal, Sir Landon Ronald.
Secretary, H. Saxe-Wyndham.
Lady Superintendent, Mrs. Hemming.
Professors, 110 in number.

BLACKHEATH CONSERVATOIRE OF MUSIC, S.E. 3.

Principal, George Mackern, F.R.A.M.
Secretary & Supt., Edith S. Dealy.

INCORPORATED LONDON ACADEMY OF MUSIC, 22 Princes Street, Cavendish Sq., W. 1., Hampstead Conservatoire, and Finsbury Park.
Principal, T. H. Yorke Trotter, M.A., Mus.D.
Secretary, R. Beauchamp.
Business Manager, L. F. Wintle, LL.B.

LONDON COLLEGE OF MUSIC
Gt. Marlborough Street, W. 1.

Principal, Frederick J. Karn, Mus.B.
Director of Examns., G. Augustus Holmes.
Secretary, A. Gambier Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury Square, W.C. (1875).
President, Sir Walter Parratt, K.C.V.O., Mus.D.
Secretary, Walter Harrison, M.A., Mus.B.

TRINITY COLLEGE OF MUSIC (1872),
Mandeville Place, Manchester Square, W. 1.
Chairman of Board, Sir Fredk. Bridge, C.V.O., Mus.D.
Secretary, C. N. H. Rodwell.

ROYAL COLLEGE OF ORGANISTS,
Kensington Gore, S.W. 7.

President, Dr. Alan Gray, LL.M.
Hon. Sec., Dr. H. A. Harding.
Registrar, Thomas Shindler, M.A., LL.B.

ROYAL MANCHESTER COLLEGE OF MUSIC (1893). Ducie St., Oxford Rd., Manchester.
Patroness, H.M. Queen Alexandra.
Principal, Dr. Adolph Brodsky.
Registrar, Stanley Withers, M.A.

ROYAL MILITARY SCHOOL OF MUSIC,
Kneller Hall, Twickenham.

Commandant, Col. J. A. C. Somerville, C.M.G., C.B.E.
Adjutant & Qr.-Mr., Lt.-Col. G. Wilson, D.S.O.
Senior Director of Music, Lieut. H. E. Adkins, Mus. Bac.

ROYAL NAVAL SCHOOL OF MUSIC,
Eastney Barracks, Portsmouth.

Superintendent, Maj. J. G. Horne, R.M.L.I.
Musical Director, Lieut. J. G. Welsh, M.B.E., R.M.
Assist. do., Lieut. S. Fairfield, M.V.O., L.R.A.M.
Quarter-Master, Lieut. A. E. Whiting, R.M.
Company Officers, Lt. W. E. Faithfull, C. E. Maton.
Superintending Clerk, L. P. Donne, R.M.B.

VICTORIA COLLEGE OF MUSIC,
158 Holland Park Avenue, London, W. 11.

Principal, J. H. Lewis, Mus.D.
Chairman, J. M. Bentley, Mus.D.
Director of Music, Churchill Sibley, Mus.D.
Registrar, J. G. Cooper, Mus.D.
Secretary, H. Portman Lewis.

NAVAL.

ROYAL NAVAL COLLEGE, Greenwich.

President, Adm. Sir F. C. Tudor, K.C.B., K.C.M.G.
Captain, W. J. C. Lake, R.N.
Commander, K. M. Bruce, D.S.O., R.N.
Medical Officer, Surg.-Commr. Sidney Roach, R.N.
Store Officer, Cashier, &c., Pay-Commander W. D. T. Morrish, R.N.
Secretary, A. Backhouse.
Civil Engineer, T. C. Agutter, F.R.I.B.A.
Curator of Museum, Lieut. J. T. Berry, R.N. (ret.).

STAFF COLLEGE.

Director, Capt. E. Astley-Rushton. C.M.G., R.N.

ROYAL NAVAL COLLEGE, Dartmouth.

Captain, F. A. Marten, C.M.G., C.V.O.
Commander, H. Hext Rogers, M.V.O., O.B.E.
Headmaster, C. E. Ashford, C.B., M.V.O., LL.D.

ROYAL HOSPITAL SCHOOL, Greenwich.

Supt., Captain L. R. Oliphant, R.N.
Headmaster, S. R. Hewitson, B.Sc.

Royal Navy.

FOR MEN:—*H.M.S. Albemarle* (gunnery), *Duncan* (gunnery), *Argonaut*, *Vestal*, *Vindictive*, *Niger*, *Dryad* (Navigation School Ship), and *Harrier* (tender to *Dryad*).

FOR BOYS:—*H.M.S. Fisgard* (4 ships, for boy artificers, Portsmouth), *Ganges* (3 ships, and Shotley Training Establishment, Harwich), *Impregnable* (3 ships, Devonport), *Indus* (5 ships, for supernumerary artificers, Devonport), *Powerful* (3 ships, Devonport); and Marine Society's Ship *Hermione* and National Refuges Ship *Arethusa* (*see* Societies).

Exmouth (Metropolitan Asylums Board), moored off Grays, Essex (and sea-going tender *Exmouth II.*). Boys trained for Navy and Mercantile Marine, and for employment in naval and military bands. Only boys of good character are received.—*Capt. Supt.*, Capt. R. B. Colmore, O.B.E., R.N.

Mercantile Marine.

For Officers.

THAMES NAUTICAL TRAINING COLLEGE (INCORPORATED).—H.M.S. *Worcester*, off Greenhithe. *Capt. Supt.*, Capt. M. B. Sayer, C.B.E., R.D., R.N.R. *Sec.*, F. H. Stafford, 72, Mark Lane, E.C. 3.

CADET SCHOOL SHIP *Conway*, Rock Ferry, Birkenhead. *Capt.*, H. W. Broadbent, R.D., R.N.R.

OCEAN TRAINING SHIPS.—This scheme for training officers for the Merchant Service and R.N.R. is now carried on at the Nautical College, Pangbourne. Nominations to R.N. College, Dartmouth, and for R.N.R. training as Probationary Midshipmen, subject to Admiralty Regulations. Candidates are prepared for Special Entry to Royal Navy, Woolwich, Sandhurst, and R.A.F. Examinations.

For Seamen.

TRAINING SHIP *Cornwall*, off Purfleet (Reformatory Ship). *Supt.* Capt. Charles E. W. Pyddoke, R.N.; *Sec.*, Walter Millachip, 66 Coleman Street, E.C. 2.

TRAINING SHIP *Indefatigable*, New Ferry, Birkenhead. For boys between 13 and 14½ years of age at entry and of good character only. *Capt. Supt.*, Commander H. Butterworth, R.N.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants. For boys of good character only, intended for entry to Special Branches of the Military Branch R.N.; or for Cadet apprenticeship in the Mercantile Marine, or for entry to R.A.F. as Boy Mechanics.—*Hon. Director*, C. B. Fry, Commr. R.N.R.

SCHOOL OF ORIENTAL STUDIES

London Institution, Finsbury Circus, E.C. 2.
Chairman of Governing Body, Sir John P. Hewett, G.C.S.I., K.B.E., C.I.E.
Director, Prof. Sir E. Denison Ross, C.I.E., Ph.D.
Secretary, Miss C. L. Clegg.

TECHNICAL EDUCATION.

See also "**Commercial Education.**"

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of *Birmingham*, *Bristol*, *Cambridge*, *Durham*, *Leeds*, *Liverpool*, *London*, *Manchester*, and *Sheffield*; *Wales*; *St. Andrews*, *Glasgow*, and *Edinburgh*; *Dublin*, *National University of Ireland*, and the *Queen's University* of *Belfast*.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the L.C.C. are the following:—

Institutes entirely maintained by the L.C.C.

BEAUFOY INSTITUTE, Prince's Road, Vauxhall Street, S.E. 11.—*Principal*, Dr. A. Ritchie-Scott.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Rd., S.E. 5.—*Principal*, S. Thorogood.

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, Fred V. Burridge.

CLAPHAM SCHOOL OF ART, Edgely Road, High St., Clapham, S.W. 4.—*Principal*, G. R. Woolway, A.R.C.A.

HACKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A., A.M.I.C.E.
(a) *Hackney Institute*, Dalston Lane, E. 8.
(b) *Hackney Institute, Sir John Cass Branch*, Cassland Road, E. 9.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W. 12.—*Principal*, John Williams.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Huntington, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W. 4.—*Principal*, A. R. Sage, M.B.E.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, A.M.I.C.E. *Sec.*, A. E. G. Edmonds.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C. 4.—*Principal*, A. J. Bull, M.Sc.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS, Barrett Street, Oxford Street, W. 1.—*Headmistress*, Miss E. E. Cox, B.A.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C. 1.—*Headmistress*, Miss A. Crawley, B.Sc.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc.; Head (Sch. of Art), Walter Bayes.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, Robt. H. Pickard, D.Sc., F.R.S.

BOROUGH POLYTECHNIC, Borough Road, S.E. 1.—*Principal*, J. W. Bispham, O.B.E., B.Sc.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, 280 St. John Street, E.C. 1.—*Principal*, R. M. Walmsley, D.Sc.

NORTHERN POLYTECHNIC INSTITUTE, Holloway Road, N. 7.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W. 1.—*Director of Education*, T. Worswick, O.B.E., M.Sc.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, D.Sc.

SOUTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich, S.E. 18.—*Principal*, A. F. Hogg, M.A.

Technical Institutes, &c., aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Greek Road, Deptford, S.E. 8.—*Head Mistress*, Miss M. E. Stuart.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

COLLEGE FOR WORKING WOMEN, 7 Fitzroy Street, W. 1.—*Hon. Secretary*, Mrs. H. F. Plant.

CORDWAINERS' TECHNICAL COLLEGE, 42 Bethnal Green Road, E. 1.—*Principal*, F. Y. Golding.

FINSBURY TECHNICAL COLLEGE, Leonard Street, City Road, E.C.—*Dean*, Prof. Eccles, D.Sc., F.R.S., M.I.E.E.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14—*Warden*, T. Raymont, M.A.

HEROLD'S INSTITUTE, Drummond Road, Bermondsey (*Branch of the Borough Polytechnic*).—*Principal*, J. W. Bispham, O.B.E., M.A.

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker, F.I.C.

LONDON SCHOOL OF PRINTING AND KINDRED TRADES, 61 Stamford Street, S.E. 1.—*Principal*, J. R. Riddell.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss C. I. Brennand.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E. 1.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss E. Bradshaw.

SAILORS HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, Payr.-Comm. A. E. Loder, R.D., R.N.R.

SCHOOL OF WOOD-CARVING, 39 Thurloe Place, S.W. 7.—*Secretary*, J. Bailey.

TOYNBEE HALL, 28 Commercial Road, E. 1.—*Warden*, J. J. Mallon.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W. 18.—*Principal*, D. W. Griffiths, B.Sc., A.M.I.M.E.

WORKING MEN'S COLLEGE, Crowndale Road, N. W. 1.—*Principal*, Maj.-Gen. Sir F. B. Maurice, K.C.M.G., C.B. *Superintendent*, G. C. Lowry, B.A.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, *Tempy. premises*, Lee Terrace, Blackheath, S.E. 3.—*Principal*, J. Howard Hale.

ST. MARTIN'S, 107 Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic, and to Goldsmiths' College. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122–124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

Imperial College of Science and Technology,
South Kensington, S.W. 7.
Visitor: H.M. THE KING.

Chairman of Governing Body, The Marquess of Crewe, K.G.

Chairman of Executive Committee, Right Hon. Sir Arthur Acland, Bart.

Chairman of Delegacy, Walter T. Prideaux.

An Institution for the most advanced training and research in Science, especially in its application to industry. The Departments and Professors are:—

Royal College of Science.

Aeronautics: Sir Richard Glazebrook, K.C.B., F.R.S. (*Aviation*); Sir Napier Shaw, F.R.S. (*Meteorology*); L. Bairstow, C.B.E., F.R.S. (*Aerodynamics*).

Mathematics: A. R. Forsyth, F.R.S., A. N. Whitehead, F.R.S. (*Applied*); *Physics*: H. L. Callender, C.B.E., F.R.S., A. O. Rankine, F.R.S., A. Fowler, F.R.S. (*Astro-Physics*); *Technical Optics*, F. J. Cheshire, C.B.E.; A. E. Conrady, *Optical design*; A. F. C. Pollard, *Mechanical design*; *Chemistry*: H. B. Baker, C.B.E., F.R.S., J. F. Thorpe, C.B.E., F.R.S. (*Organic*), J. C. Philip, F.R.S. (*Physical*); *Chemical Technology—Fuel and Refractory Materials*: W. A. Bone, F.R.S.; *Biology*: J. B. Farmer, F.R.S. (*Botany*), E. W. McBride, F.R.S. (*Zoology*), V. H. Blackman, F.R.S. (*Plant Physiology*), P. Groom (*Woods and Fibres Technology*), H. M. Lefroy (*Entomology*); S. B. Schryvor (*Biochemistry*); *Geology*: W. W. Watts, F.R.S., C. G. Cullis (*Economic Mineralogy*).

Royal School of Mines.

Mining: S. J. Truscott; *Mine Surveying*, L. H. Cooke; *Mining Geology*, W. W. Watts, F.R.S.; *Metallurgy*: H. C. H. Carpenter, F.R.S.; *Oil Technology*: W. W. Watts, F.R.S.

City and Guilds (Engineering) College.

Mechanical Engineering and Motive Power: W. E. Dalby, F.R.S.; *Civil Engineering*: S. M. Dixon; *Electrical Engineering*: C. L. Fortescue.

Rector, Sir T. H. Holland, K.C.S.I., K.C.I.E., D.Sc., F.R.S.

Secretary, A. Gow, M.A.

City and Guilds of London Institute,
Gresham College, E.C. 2.

(1.) *City Guilds Engineering College* (see Imperial College of Science and Technology).

(2.) *Finsbury Technical College*, Leonard Street, Finsbury, E.C.

(3.) *Technical Art School*, 122 and 124 Kennington Park Road, S.E.

(4.) *Department of Technology*, 29 Roland Gardens, S.W. 7.

CRYSTAL PALACE (School of Practical Engineering).—*Principal*, J. W. Wilson, M.Inst.C.E.

EAST LONDON COLLEGE (*see* University of London).

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE (Southampton Row, W.C. 1.).—*Princ.*, A. Russell, D.Sc.

INSTITUTE OF CERTIFICATED GROCERS (Incorporated), 4 Cullum St., E.C. 3.—*Sec.*, C. L. T. Beeching.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Motor, Aero, and Mechanical), 307-311 Regent Street, W. 1.—*Headmaster*, A. R. Horne, O.B.E., B.Sc.

SCHOOL OF MOTOR BODY AND CARRIAGE BUILDING (Balderton St., W.).—*Head of Dept.*, Ernest Bailey.

SOUTH OF ENG. COLL. OF PHARMACY (186 Clapham Rd., S.W.9).—*Principal*, H. Lucas, F.C.S.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield Street, W. 1.—*Director*, Sir Banister Fletcher, F.R.I.B.A.

WILLESDEN POLYTECHNIC, Priory Park Road, N.W. 6.—*Principal*, A. J. Bird.

ENGLISH TECHNICAL COLLEGES.

ACCRINGTON (Munic.).—*Princ.*, J. P. Ackroyd, B.Sc.

ASHTON-UNDER-LYNE (Heginbottom).—*Principal*, G. W. Handforth, B.A.

BACUP AND RAWTENSTALL.—*Headmaster*, H. Bromiley.

BANBURY (Munic.).—*Headmaster*, R. Luscombe, B.A.

BARNSLEY (Central Techn. Sch., &c.).—*Princ.*, D. Paton Grubb, B.Sc.

BARROW-IN-FURNESS.—*Princ.*, David Hardman, M.Sc.

BATH (Munic.).—*Principal*, A.G. Day, A.M.I.M.E.

BATLEY (Techn. and Art Sch.).—*Principal*, N. B. Radcliffe, M.Sc.

BIRKENHEAD (Holt Techn. Sch., Tranmere).—*Princ.*, J. E. L. Barnes, M.I.M.E.

BIRMINGHAM (Munic. Techn. Sch.).—*Princ.*, W. E. Sumpner, D.Sc.

,, (Vittoria St.—For Jewellers and Silversmiths).—*Headmaster*, A. J. Gaskin.

,, (Tech. Sch., Handsworth).—*Princ.*, W. E. Harrison, B.Sc.

,, (Techn. Sch., Aston).—*Princ.*, C. A. White, M.B.E., M.Sc.

BLACKBURN (Munic.).—*Princ.*, F. J. Harlow, B.Sc.

BLACKPOOL.—*Princ.*, D. T Setterington, B.Sc.

BOLTON (Munic.).—*Director*, F. Wilkinson, C.B.E., F.G.S.

BOOTLE (Munic.).—*Princ.*, Laurence Small, B.Sc.

BOURNEMOUTH (Munic.).—*Princ.*, H. Painter, B.Sc.

BRADFORD (Techn. Coll.).—*Princ.*, H. Richardson, M.Sc.

BRIERLEY HILL, STAFFS (Techn. Inst.).—*Princ.*, H. B. Cronshaw, B.A.

BRIGHOUSE (Techn. Sch.).—*Sec.*, A. W. Hoyle, B.Sc.

VETERINARY COLLEGE, Buccleuch St., Glasgow.

Director of Studies, A. W. Whitehouse, M.A. M.R.C.V.S.

ROYAL VETERINARY COLLEGE OF IRELAND, Shelbourne Road, Ballsbridge, Dublin.

Principal, Prof. J. F. Craig, M.A., M.R.C.V.S.

THE WORLD'S LITERATURE.

BOOKS.—It is estimated that over 155,000 books, pamphlets and magazines are published annually in the various countries of the world, and that over 14,000,000 separate works have been published since printing was invented in the fifteenth century. The three largest libraries in the world are the *Bibliotheque Nationale*, Paris, which contains over 5,000,000 volumes, the *British Museum Library*, London, where there are 40 miles of shelves, and an estimated total of about 5,000,000 volumes, and the *Library of Congress*, Washington, D.C., which contains 2,000,000 volumes. A copy of every book published in Great Britain must be sent to the British Museum, *London*, the Bodleian, *Oxford*, the University Library, *Cambridge*, the Advocates' Library, *Edinburgh*, and to the National Library of *Wales*. The "best selling" book in 1922 was *If Winter Comes* (A. S. M. Hutchinson), published in England by Hodder & Stoughton and in America by Little, Brown & Co. ; upwards of 175,000 copies of this novel were sold in the British Isles between the date of publication (Aug., 1921) and October, 1922.

Secondary Education (Boys).

For List of Schools and Climates, see pp. 1004 to 1030.

*The * denotes membership of the Head Masters' Conference ; the §, of the Incorporated Association of Head Masters ; the ‡ denotes Coeducational Schools (for Boys and Girls).*

SCHOLASTIC ASSOCIATIONS.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Bulkeley-Evans, C.B.E., M.A., 5 Paper Buildings, Temple, E.C. 4.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Scheme or other Instrument under which the School is administered, the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C. 1. (*Joint Hon. Secs.*, R. F. Cholmeley, O.B.E., M.A.; W. Jenkyn Thomas, M.A.).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Secy.*, J. Thompson, M.A., The High School, Dublin), is similar to the I.A.H.M. in aims and objects.

BROTHERHOODS.

THE BROTHERHOOD MOVEMENT, "to lead men and women into the Kingdom of God, to unite in Brotherhood of mutual help, to win the masses of the people for Jesus Christ, and to encourage the study of social service," may be said to have been founded in 1875 as the outcome of the "Pleasant Sunday Afternoon" movement initiated by John Blackham of West Bromwich. The movement is non-political and unsectarian, and connected with it are other societies—Sisterhoods, P.S.A., Bible Classes, etc. *President*, W. B. J. Pickering, Manchester; *Secretary of the National Brotherhood Council*, Rev. Tom Sykes, 37 Norfolk Street, Strand, W.C. 2.

THE BOYS' BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. Many of the Battalions and Companies are now recognised as Cadet Units. The total strength is 60,000 officers and boys. *Sec.*, R. S. Peacock, 34 Paternoster Row, E.C. 4.

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 500,000 lads have had the advantage of the Brigade's training, and to-day there are 1,416 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. 2. *Chaplain-General and Secretary*, Rev. Edgar Rogers, O.B.E., M.A.

BOY SCOUTS. (Incorporated).

A Movement initiated and organised by Lieut.-General Sir Robert Baden-Powell, Bart., K.C.B., K.C.V.O., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

During the War some 100,000 Boy Scouts were employed on war work, over 100,000 joined the Colours, and a continuous service of coast-watching under the Admiralty was maintained. The Movement has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, S.W. 1.

ASSOCIATION OF HEAD MISTRESSES.—Head mistresses of Public Secondary Schools with at least 50 pupils are eligible for membership. Members are marked ◊ in the lists on pp. 315–320. A Conference is held annually in June. *President* (1921–23), Miss Fanner, M.A., County Secondary School, Putney. *Secretary*, Miss R. Young, 29 Gordon Square, W.C. 1.

THE GIRL GUIDES.

A movement, incorporated by Charter in 1915, founded by Sir Robert Baden-Powell in 1910. *President* (since 1920), H.R.H. the Princess Mary; *Chief Guide*, Lady Baden-Powell. The aim of the movement is to develop a better practical knowledge of housekeeping, mothercraft and citizenship in the girl of to-day. The method of training is to give the girls pursuits which appeal to them, such as games, recreative exercise and badge tests which lead them on to learn for themselves many useful crafts, training them in habits of observance, obedience and self-reliance, promoting their physical development, and inculcating loyalty and thoughtfulness for others. The movement is non-military, non-political, non-class and interdenominational. Its desire is to co-operate with educational and other bodies working to the same end, and holding the same principles. The number of Girl Guides is approximately 240,000 in the British Empire, and the movement has spread to nearly every civilized country throughout the world, its total membership being approximately 407,000. *Imperial headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

CIVIL LIST PENSIONS, 1921–22.

A list of Pensions granted during the year ended March 31, 1922, under the provisions of the Civil List Act, 1910.

1918	58,073	169·4
1919	46,312	125·8
1920	42,545	112·8

The fall in the rate of 56·6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions, and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows:—

Year.	No. of beds in public institutions.	Dispensaries.
1912	1,500	8
1918	6,749	375
1921	9,879	470

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of beds from 4,300 in 1912 to 17,447 in 1921.
